TABLE OF CONTENTS

Preface ix
Acknowledgements xiii

CHAPTER 1: Basic Concepts
Introductory Remarks 1
A First Problem 3
How to Count 14
The Use of Induction 20
Problems of Logic 30
Issues of Parity 35
Exercises 43

CHAPTER 2: A Deeper Look at Geometry

Classical Planar Geometry 49
Analytic Geometry 71
Miscellaneous and Exotic Geometry Problems 81
Solid Geometry 103
Exercises 121

CHAPTER 3: Problems Involving Counting

Elementary Problems in Probability 129
More Sophisticated Problems in Probability 139
More on Counting 155
The Classical Marriage Problem and Related Ideas 163
Exercises 167

CHAPTER 4: Problems of Logic

Straight Logic 177
Games 183
Tracing Routes, and Learning from Parity 191
Mysterious Arithmetic Problems 201
Surprises 214
Exercises 219

CHAPTER 5: Recreational Math

Magic Squares and Related Ideas 235
Problems Involving Weighings 246
Exercises 257

CHAPTER 6: Algebra and Analysis

A Little Algebra 263
Inequalities 271
Trigonometry and Related Ideas 279
Exercises 286

CHAPTER 7: A Miscellany

Crossing the River and Similar Exercises 295
Things That Are Impossible 299
Exercises 309

CHAPTER 8: Real Life

Introductory Remarks 315
Everyday Objects 315
Some Case Studies 336
Statistics 341
Exercises 347

BIBLIOGRAPHY 361

INDEX 365

SOLUTIONS TO ODD-NUMBERED PROBLEMS 369
