

Contents

Preface *xiii*

Chapter 1 SETS *1*

- 1.1 Concept of a Set *1*
- 1.2 Operations on Sets *7*
- 1.3 Number of Elements in Finite Sets *15*
- 1.4 Cartesian Products *23*

Chapter 2 FUNCTIONS *27*

- 2.1 Introduction *27*
- 2.2 Functions and Equations *28*
- 2.3 Coordinate System *38*
- 2.4 Distance Between Two Points *40*
- 2.5 The Graph of a Function *43*
- 2.6 Sum, Difference, Product, and Quotient Functions *53*
- 2.7 Composition of Functions *55*
- 2.8 Inverse Functions *60*

Chapter 3 LINEAR FUNCTIONS *65*

- 3.1 Introduction *65*
- 3.2 Linear Functions *65*
- 3.3 Equation of a Straight Line *73*
- 3.4 Applications *83*

**Chapter 4 SYSTEMS OF LINEAR EQUATIONS AND
LINEAR INEQUALITIES** *87*

- 4.1 Introduction *87*
- 4.2 Linear Equations in Two Variables *87*
- 4.3 Break-Even Analysis *95*
- 4.4 Systems of Linear Inequalities in Two Variables *98*

Chapter 5	VECTORS AND MATRICES	<i>107</i>
5.1	Introduction	<i>107</i>
5.2	Vectors	<i>107</i>
5.3	What Is a Matrix?	<i>114</i>
5.4	Addition and Subtraction of Matrices	<i>117</i>
5.5	Scalar Multiples of Matrices	<i>119</i>
5.6	Multiplication of Matrices	<i>121</i>
5.7	Properties of Matrix Multiplication	<i>127</i>
Chapter 6	MATRICES AND LINEAR SYSTEMS	<i>135</i>
6.1	Introduction	<i>135</i>
6.2	Solution of Linear Equations: Gauss-Jordan Elimination Method	<i>135</i>
6.3	Some Special Cases of the Matrix Solution	<i>145</i>
6.4	Geometric Interpretations	<i>149</i>
6.5	Inverse of a Square Matrix	<i>150</i>
6.6	Input-Output Model	<i>162</i>
Chapter 7	INTRODUCTION TO LINEAR PROGRAMMING	<i>167</i>
7.1	Introduction	<i>167</i>
7.2	Graphical Solutions to Linear Programming Problems	<i>168</i>
7.3	Algebraic Solutions to Linear Programming Problems	<i>183</i>
7.4	The Simplex Method	<i>191</i>
7.5	The Dual Problem	<i>203</i>
Chapter 8	SPECIAL TYPES OF LINEAR PROGRAMMING PROBLEMS	<i>209</i>
8.1	Introduction	<i>209</i>
8.2	The Transportation Problem	<i>209</i>
8.3	The Initial Basic Feasible Solution	<i>213</i>
8.4	An Optimal Solution—Stepping-Stone Method	<i>223</i>
8.5	An Optimal Solution—Modified Distribution Method	<i>228</i>
8.6	Unequal Supply and Demand Conditions	<i>231</i>
8.7	Degenerate Case	<i>238</i>
8.8	The Assignment Model	<i>245</i>
Chapter 9	PERMUTATIONS AND COMBINATIONS	<i>253</i>
9.1	Counting and the Multiplication Rule	<i>253</i>
9.2	Permutations	<i>257</i>
9.3	Combinations	<i>266</i>
9.4	The Binomial Theorem	<i>272</i>
Chapter 10	PROBABILITY	<i>279</i>
10.1	Introduction	<i>279</i>
10.2	The Finite Sample Space	<i>280</i>

10.3	The Concept of Probability	284
10.4	Some Rules of Probability	289
10.5	Random Selections	296
10.6	Conditional Probability	300
10.7	Bayes's Theorem	307
10.8	Bernoulli Trials	313
Chapter 11	EXPECTATION, VARIATION, AND NORMAL DISTRIBUTION	317
11.1	Random Variable	317
11.2	Expected Value of a Random Variable	318
11.3	Variance of a Random Variable	324
11.4	Chebyshev's Inequality	332
11.5	Continuous Distributions	334
11.6	The Normal Distribution	337
11.7	Normal Approximation of the Binomial Distribution	350
Chapter 12	DECISIONS UNDER UNCERTAINTY— A STOCKING PROBLEM	357
12.1	Introduction	357
12.2	Discrete Probability Distribution	358
12.3	Conditional and Expected Profits	359
12.4	Conditional Losses	361
12.5	Expected Profits with Perfect Information	362
12.6	Marginal Analysis Approach	363
12.7	Continuous Probability Distribution	367
Chapter 13	THEORY OF GAMES AND FINITE MARKOV CHAINS	375
13.1	Introduction	375
13.2	Two-Person, Zero-Sum Matrix Games	375
13.3	Strictly Determined Games	377
13.4	Mixed Strategies in 2×2 Matrix Games	382
13.5	Relations of Dominance	387
13.6	Optimal Strategies and Simplex Method	389
13.7	Finite Markov Chains	398
Chapter 14	EXPONENTIAL AND LOGARITHMIC FUNCTIONS	413
14.1	Introduction	413
14.2	Integral and Rational Exponents	413
14.3	Exponential Functions	420
14.4	Applications of Exponential Functions	425
14.5	Logarithmic Functions	430
14.6	Fundamental Properties of Logarithmic Functions	432

14.7 Common Logarithms	435
14.8 Interpolation	439
14.9 Natural Logarithms	443

Chapter 15 SEQUENCES AND MATHEMATICS OF FINANCE 447

15.1 Introduction	447
15.2 Sequences	448
15.3 Arithmetic Progressions	451
15.4 Geometric Progressions	455
15.5 Simple Interest and Simple Discount	460
15.6 Compound Interest and Compound Depreciation	462
15.7 Annuities	471
15.8 Present Value of an Annuity	475

Chapter 16 LIMITS AND CONTINUITY 479

16.1 Introduction	479
16.2 Limit of a Sequence	479
16.3 Limit of a Function	490
16.4 Properties of Limits	498
16.5 Limits as x Approaches Infinity	501
16.6 Continuity	504

Chapter 17 DIFFERENTIAL CALCULUS 511

17.1 Introduction	511
17.2 Instantaneous Rate of Change	511
17.3 Geometric Interpretation of the Derivative	521
17.4 Differentiability and Continuity	524
17.5 Some Fundamental Rules of Differentiation	527
17.6 Product and Quotient Rules	532
17.7 The Chain Rule	538
17.8 Derivatives of Exponential Functions	542
17.9 Derivatives of Logarithmic Functions	545
17.10 Higher Derivatives	550
17.11 Implicit Functions	553

Chapter 18 DIFFERENTIAL CALCULUS—APPLICATIONS 557

18.1 Introduction	557
18.2 Maxima and Minima	557
18.3 The First Derivative Test	564
18.4 The Second Derivative Test	571
18.5 Applications of Maxima and Minima	575

Chapter 19 INTEGRAL CALCULUS 583

19.1 Introduction	583
19.2 The Definite Integral	583

19.3	Properties of the Definite Integral	589
19.4	Evaluation of Definite Integrals	591
19.5	Indefinite Integrals	594
19.6	Integration by Substitution	598
19.7	Integration by Parts	602
19.8	Applications	605
Appendix A	THE REAL NUMBER SYSTEM	615
Appendix B	SUMMATION NOTATION	633
Appendix C	TABLES	637
Answers to Odd-Numbered Exercises		674
Index		721
