

CONTENTS

- 1 KEYNOTE ADDRESS
- 3 A Current View of Random Number Generators
George Marsaglia, Washington State University
- 11 WHAT'S NEW AND INNOVATIVE IN COMPUTER GRAPHICS
Organizer: *Ingram Olkin, Stanford University*
- 13 Min/Max Autocorrelation Factors for Multivariate Spatial Imagery
Paul Switzer, Stanford University
- 17 GEOMETRIC AND SET-VALUED STATISTICS
Organizer: *William F. Eddy, Carnegie-Mellon University*
- 19 Aspects of Random Sets
Richard A. Vitale, Claremont Graduate School
- 25 Ordering of Multivariate Data
William F. Eddy, Carnegie-Mellon University
- 31 DEVELOPING STATISTICAL WORKSTATIONS
Organizer: *L. Billard, University of Georgia*
- 33 Statistical Software: Progress and Prospects
J. A. Nelder and R. J. Baker, Rothamsted Experimental Station
- 39 Responsibilities, Problems and Some Solutions for the Profession's Input into Microcomputer Software
Brian P. Murphy, University of Western Australia
- 45 RELIABILITY OF COMPUTER SOFTWARE AND COMPUTING NETWORKS
Organizer: *Nozer D. Singpurwalla, The George Washington University*
- 47 A Bayes Empirical Bayes Approach for (Software) Reliability Growth
Michio Horigome, Tokyo University of Mercantile Marine, Nozer D. Singpurwalla, The George Washington University, and Refik Soyer, Tokyo University of Mercantile Marine

- 57 Bayesian Inference for the Weibull Process with Applications to Assessing Software Reliability Growth and Predicting Software Failures
Jerzy Kyparisis, Florida International University and Nozer D. Singpurwalla, The George Washington University
- 65 NUMERICAL METHODS
Organizer: *Douglas M. Bates, Queen's University and University of Wisconsin*
- 67 Computational Methods for Generalized Cross-Validation
Douglas M. Bates, University of Wisconsin and Queen's University
- 75 Secondary Storage Methods for Statistical Computational Operations
Setrag N. Khoshafian, Douglas M. Bates and David J. Dewitt, University of Wisconsin
- 83 COMPUTATIONAL GEOMETRY AND STATISTICAL APPLICATIONS
Organizer: *Robert J. Serfling, The Johns Hopkins University*
- 85 A Class of Problems in Statistical Computation: Generalized L- and Related Statistics
Robert J. Serfling, The Johns Hopkins University
- 89 Algorithms for Selection in Sets, with Applications to Statistics
Greg N. Frederickson, Purdue University and Donald B. Johnson, The Pennsylvania State University
- 97 The Application of Voronoi Diagrams to Nonparametric Decision Rules
Godfried T. Toussaint, McGill University, Binay K. Bhattacharya, Simon Frazer University, and Ronald S. Poulsen, McGill University
- 109 Multidimensional Sorting -- An Overview
Jacob E. Goodman, City College CUNY and Richard Pollack, Courant Institute NYU
- 115 COMPUTER-SUPPORTED INSTRUCTION: PROSPECTS AND PITFALLS
Organizer: *Lucio Chiaraviglio, Georgia Institute of Technology*
- 117 Computer-Supported Instruction: Prospects and Pitfalls
Lucio Chiaraviglio, Georgia Institute of Technology
- 119 OPTIMAL TRANSFORMATIONS IN REGRESSION
Organizer: *John P. Sall, SAS Institute*
- 121 Estimating Optimal Transformations for Multiple Regression
Leo Breiman, University of California, and Jerome H. Friedman, Stanford Linear Accelerator Center and Stanford University
- 135 Quantitative Analysis of Qualitative Data
Forrest W. Young, University of North Carolina

- 159 A Comparison of the ACE and MORALS Algorithms in an Application to Engine Exhaust Emissions Modeling
Robert N. Rodriguez, SAS Institute
- 169 TIME SERIES
Organizer: *G. C. Tiao, University of Chicago*
- 171 Computer Investigation of Some Non-linear Time Series Models
Clive Granger, Frank Huynh, Alvaro Escribano and Chowdhury Mustafa, University of California at San Diego
- 179 Model-Based Treatment of a Manic-Depressive Series
Agustín Maravall, Bank of Spain
- 189 Seasonality and Seasonal Adjustment of Time Series
Steven Hillmer, University of Kansas
- 199 GRAPHICAL TOOLS FOR DATA ANALYSIS
Organizer: *R. McGill, Bell Laboratories*
- 201 Looking at More than Three Dimensions
W. L. Nicholson and D. B. Carr, Pacific Northwest Laboratory
- 211 STATISTICAL DATABASES
Organizer: *Harry K. T. Wong, Lawrence Berkeley Laboratory*
- 213 Anti-Sampling for Estimation
Neil C. Rowe, Naval Postgraduate School
- 215 CONTRIBUTED PAPERS
- 217 Nonparametric Estimation of the Modes of High-Dimensional Densities
Steven B. Boswell, Georgia Institute of Technology
- 227 SPIRIT: An Intelligent Tutoring System for Tutoring Probability Theory
Amos Barzilay, University of Pittsburgh and XEROX Palo Alto Research Center, and Terrold H. May and Harry E. Pople Jr., University of Pittsburgh
- 233 Interval Estimation of the Noncentrality Parameter of a Gamma Distribution
Paul Chiou and Chien-Pai Han, East Texas State University and University of Texas
- 237 Fuzzy Set Theory Used to Prioritize Geochemical Nuclear Waste Research
Kenneth S. Czyscinski and William V. Harper, Battelle Memorial Institute
- 247 Biplot for Exploration and Diagnosis -- Examples and Software
K. R. Gabriel and C. L. Odoroff, University of Rochester

- 253 Statistical and Data Digitization Techniques Applied to an Analysis of Leaf Initiation in Plants
Colin R. Goodall, Princeton University
- 265 An Alternative Test for Normality
Thomas R. Gullledge Jr. and Stephen W. Looney, Louisiana State University
- 269 Computer Generated Distributions for a Random Statistic of Mixtures of Gamma Populations
K. J. Kapoor, Henry Ford Hospital, and D. S. Tracy, University of Windsor
- 277 Quality Control on Microcomputers
T. Bruce McLean, Georgia Southern College and McElrath and Associates, Inc.
- 281 Sampling Distribution of Skewness Coefficient for Normal Mixtures
Derrick S. Tracy, University of Windsor and Kunwar J. Kapoor, Henry Ford Hospital
- 287 Diagnostics for Assessing Multimodality
M. Anthon Wong and Christian Schaack, Massachusetts Institute of Technology
