Preface

VOLUME III

1. STEFAN PROBLEMS

M. BERTSCH, P. de MOTTONI, L.A. PELETIER

The Stefan problem with a heating term 1

DING ZHENGZHONG

A phase-change problem with time-dependent melting temperature 8

LI-SHANG JIANG

Remarks on the Stefan-Signorini problem 13

A.A. LACEY

Singularity formation in moving boundary problems 20

A. MAGENES, C. VERDI

The semigroup approach to the two-phase Stefan problem with
nonlinear flux conditions 28

A.M. MEIRMANOV, I.A. KALIEV

One-dimensional Stefan problem with an arbitrary initial
enthalpy. Periodical solutions 40

R.H. NOCHETTO

Error estimates for multidimensional Stefan problems with
general boundary conditions 50

M. PRIMICERIO, M. UGHI

Phase-change problems with mushy regions 61

J.F. RODRIGUES

Aspects of the variational approach to a continuous casting
problem 72

D. TARZIA	
Analysis of a bibliography on moving and free boundary problems for the heat equation. Some results for the one-dimensional Stefan problem using the Lamé-Clapeyron and Neumann solutions	84
2. GENERALIZED STEFAN PROBLEMS	
J. BUCKMASTER, C. ANDERSON Jr., A. NACHMAN	
Response of intumescent paints to heat	103
G. CAGINALP	
Phase field models of solidification: free boundary problems as systems of nonlinear parabolic differential equations	107
A.B. CROWLEY	
Numerical solution of alloy solidification problems revisited	122
A. FASANO, R. RICCI	
Penetration of solvents into glassy polymers	132
W. KOSINSKI	
Thermodynamics of singular surfaces and phase transitions	140
J.A. McGEOGH	
Unsolved moving boundary problems in electro-chemical machining	152
J. OCKENDON, A.B. TAYLER	
A model for alloy solidification	157
L. RUBINSTEIN	
Mathematical modelling of the growth of a monocomponent crystal from its melt in a non-homogeneous temperature field	166
M. SHILLOR	
Weak solution to the problem of a free boundary in a concentrated capacity	179
J. SZEKELY	
Moving boundary problems in weldpool operations	187
A. VISINTIN	
Models for supercooling and superheating effects	200

The 1984 model of binary alloy solidification 208

3. POROUS MEDIA

H.W. ALT

Nonsteady fluid flow through porous media 222

J.C. BRUCH Jr, A. SHECHTER

Seepage from channels through layered porous media 229

A. FRIEDMAN

Periodic behaviour for the evolutionary dam problem and related free boundary problems 243

J. HULSHOF, L.A. PELETIER

The interface in an elliptic-parabolic problem 248

S. KAMIN, L.A. PELETIER

Large and short time behaviour of solutions of the diffusion equation with absorption 255

P. KNABNER

Salt leaching as a free boundary problem 263

D. KRÖNER

Global behaviour of the solution to the nonsteady filtration problem 272

C.J. VAN DUYN, D. HILHORST

The interface between fresh and salt groundwater in horizontally extended aquifers 287

S. XIAO, Z. HUANG, C. ZHOU

The infiltration problem with constant rate in partially saturated porous media 293

VOLUME IV

4. SOLID MECHANICS

J. AGUIRRE PUENTE, G. LAMBRINOS, M. SAKLY

Sublimation of ice and frozen dispersed media: physical phenomena, equations and experimental study 305

G. ARONSSON	
A new finite element method for estimating the penetration of frost into ground	318
E. DIBENEDETTO	
A problem in ground freezing	330
H. GUIDOUCHE, N. POINT	
Unilateral contact with adherence	340
B. LADANYI	
Creep closure of frozen ground around a thawing soil column	347
5. FLUID MECHANICS	
G. ALLAIN	
Small-time existence for the Navier-Stokes equations with a free surface and surface tension	355
G. BAYADA, M. CHAMBAT	
Several aspects of cavitation in lubrication	365
M. BOUDOURIDES	
A case of non-uniqueness of the free boundary Navier-Stokes equations	373
C. CUVELIER, J.M. DRIESSEN	
A Navier-Stokes capillary free boundary in open boat crystal growth	379
E. HANSEN	
Slow flow into a large pool. An extended summary	391
J.J. MOREAU	
Variational characterization of inviscid incompressible flows with abrupt inhomogeneity or free surface	395
V.V. PUKHNACHOV	
Free boundary problems in the theory of thermo-capillary convection	405
B. SHERMAN	
A subsidence problem with free boundary	416

D. SOCOLESCU	
The steady viscous fluid flow past a viscous fluid drop in the presence of gravity and surface tension	425
6. REACTION DIFFUSION	
C. BANDLE, I. STAKGOLD	
Reaction-diffusion and dead cores	436
M. BERTSCH, M.E. GURTIN, D. HILHORST, L.A. PELETIER	
Localization of two interacting biological populations	449
J. NORBURY	
Interior transition layers for singular elliptic problems are located near extremal geodesics	457
A POZIO, A. TESEI	
Nonlinear diffusion systems modelling biological interactions	466
7. CONTROL	
A. BERMUDEZ, C. SAGUEZ	
Optimal control of variational inequalities: optimality conditions and numerical methods	478
J. BLUM, T. GALLOUET, J. SIMON	
Equilibrium of a plasma in a Tokamak	488
J.P. BRANCHER, M. GARNIER, O. SERO GUILLAUME	
Electromagnetic control of liquid metal free surfaces	497
K.H. HOFFMANN, J. SPREKELS	
The method of asymptotic regularization and restricted parameter identification problems in variational inequalities	508
M. NIEZGODKA, I. PAWLOW	
Discrete approximation of multiphase Stefan problems with possible degenerations	514
I. PAWLOW	
Boundary control of degenerate two-phase Stefan problems	526

J. SOKOLOWSKI, J.P. ZOLESIO	
Differential stability of solutions to unilateral problems	537
8. MATHEMATICAL METHODS - NUMERICAL METHODS	
J.M. AITCHISON, A. KARAGEORGHIS	
Boundary integral techniques for free boundary problems	548
A. BOSSAVIT	
See how they run - a computer-generated movie on free boundaries in induction heating	554
F. CONRAD, F. ISSARD-ROCH, C.M. BRAUNER, B. NICOLAENKO	
Nonlinear elliptic variational inequalities with multiple solutions	568
T. T. LI	
Some free boundary problems for quasilinear hyperbolic systems	582
G. MEYER	
Continuous orthonormalization for stiff free boundary problems	593
K. TACKE	
Discretization of the enthalpy method for planar phase change	604
