

C O N T E N T S

PREFACE	3
CONTENTS	5
SCIENTIFIC PROGRAM	7
LIST OF PARTICIPANTS	11
D.M. ACKETA, Some results on "small" matroids	15
A. BJÖRNER, On matroids, groups and exchange matroids	25
T. BRYLAWSKI, Coordinatizing the Dilworth truncation	61
R. CORDOVIL, On simplicial matroids and Sperner's lemma	97
H. CRAPO, The combinatorial theory of structures	107
F. JAEGER, Graphic description of binary spaces	215
L. KÁSZONYI, On homogeneous forms related to four-colourings	233
B. KORTE - L. LOVÁSZ, Posets, matroids and greedoids	239
J. NEŠETŘIL - S. POLJAK - D. TURZÍK, Special amalgams and Ramsey matroids	267
R. PEELE, Finite partition sublattice representations for some geometric lattices	299

A. RECSKI,	Some open problems of matroid theory, suggested by its applications	311
A. SCHRIJVER,	Supermodular colourings	327
P.D. SEYMOUR,	Applications of the regular matroid decomposition	345
É. TARDOS,	Generalized matroids and supermodular colourings	359
J. TUMA,	Dilworth truncations and modular cuts	383
U. ZIMMERMANN,	Augmenting circuit methods for submodular flow problems	401
