

CONTENTS

Preface	7
Kirillov, A. A.: Introduction to the representation theory of finite and compact groups	9
Feigin, B. L., Zelevinsky, A. V.: Representations of contragredient Lie algebras and the Kac–MacDonald identities	25
Zhelobenko, D. P.: On Gelfand–Zetlin bases for classical Lie algebras	79
Tanaka, S.: Representations of $SL(2, \mathbb{F}_q)$	107
Gelfand, I. M., Graev, M. I., Vershik, A. M.: Models of representations of current groups	121
Olshansky, G. I.: Unitary representations of the infinite symmetric group: a semigroup approach	181
Mackey, G. W.: On the applications of induced representations to quantum mechanics	199
