

Contents

PART 1. Numerical Fluid Dynamics

1. Continuation Methods in Computational Fluid Dynamics <i>H. B. Keller</i>	3
2. Experiments on Initial and Boundary Conditions <i>G. Moretti</i>	15
3. Hybrid Procedures for Computing General Viscous Flows <i>J. C. Wu</i>	35
4. State of the Art in Subgrid-Scale Modeling <i>J. H. Ferziger</i>	53
5. Three-Dimensional Instability of Plane Channel Flows at Subcritical Reynolds Numbers <i>S. A. Orszag and A. T. Patera</i>	69
6. Scaling of High-Reynolds-Number Weakly Separated Channel Flows <i>P. J. Roache</i>	87
7. Some Observations on Numerical Solutions of the Three-Dimensional Navier–Stokes Equations <i>H. McDonald and W. R. Briley</i>	99
REFERENCES	121

PART 2. Interactive Steady Boundary Layers

Introduction	
<i>T. Cebeci</i>	127
8. Some Recent Studies in Triple-Deck Theory	
<i>K. Stewartson</i>	129
9. Spectral Computation of Triple-Deck Flows	
<i>O. R. Burggraf and P. W. Duck</i>	145
10. Nonasymptotic Theory of Unseparated Turbulent- Boundary-Layer–Shock-Wave Interactions with Application to Transonic Flows	
<i>G. R. Inger</i>	159
11. A Review of Marching Procedures for Parabolized Navier–Stokes Equations	
<i>S. G. Rubin</i>	171
12. Progress on Interacting Boundary-Layer Computations at High Reynolds Number	
<i>R. T. Davis and M. J. Werle</i>	187
13. On the Turbulent Viscid–Inviscid Interaction at a Wedge-Shaped Trailing Edge	
<i>R. E. Melnik and B. Grossman</i>	211
14. A Comparison of the Second-Order Triple-Deck Theory with Interacting Boundary Layers	
<i>S. A. Ragab and A. H. Nayfeh</i>	237
REFERENCES	255

PART 3. Singularities in Unsteady Boundary Layers

Introduction	
<i>T. Cebeci</i>	261
15. Unsteady Separation	
<i>T. Cebeci</i>	265
16. On the Current Controversy about Unsteady Separation	
<i>K. C. Wang</i>	279
17. The Genesis of Separation	
<i>L. L. van Dommelen and S. F. Shen</i>	293
18. Some Characteristics of Unsteady Two- and Three-Dimensional Reversed Boundary-Layer Flows	
<i>H. A. Dwyer and F. S. Sherman</i>	313
19. Large-Time Boundary-Layer Computations at a Rear Stagnation Point Using the Asymptotic Structure	
<i>P. G. Williams</i>	325

20.	Form Factors near Separation <i>C. Barbi and D. Telionis</i>	337
21.	Unsteady Development of the Boundary Layer in the Vicinity of a Rear Stagnation Point <i>J. C. Williams, III</i>	347
	REFERENCES	365

PART 4. Transonic Flows

22.	Advances and Opportunities in Transonic-Flow Computations <i>W. F. Ballhaus, Jr., G. S. Deiwert, P. M. Goorjian, T. L. Holst and P. Kutler</i>	371
23.	The Transonic-Flow Theories of High- and Low-Aspect-Ratio Wings <i>H. K. Cheng</i>	397
24.	Perturbation of Transonic Flow with Shocks <i>M. Hafez</i>	421
25.	On the Definition of Freestream Conditions in Wind-Tunnel Testing <i>W. R. Sears</i>	439
26.	Basic Advances in the Finite-Volume Method for Transonic Potential-Flow Calculations <i>D. A. Caughey and A. Jameson</i>	445
27.	Flow Structures Associated with Upper-Surface-Blown Airfoils <i>N. D. Malmuth, W. D. Murphy, V. Shankar, J. D. Cole, and E. Cumberbatch</i>	463
28.	Transonic-Shock–Boundary-Layer Interaction: A Case for Phenomenology <i>J. Wai and H. Yoshihara</i>	479
29.	Unsteady Transonic Flows: Time-Linearized Calculations <i>A. R. Seebass and K.-Y. Fung</i>	493
	REFERENCES	507

PART 5. Experimental Fluid Dynamics

	Introduction <i>A. Roshko</i>	517
30.	Local and Global Dynamics of Free Shear Layers <i>C.-M. Ho</i>	521
31.	Laser Velocimetry Applied to Transonic Flow Past Airfoils <i>D. A. Johnson</i>	535

32. Imbedded Longitudinal Vortices in Turbulent Boundary Layers <i>R. D. Mehta, I. M. M. A. Shabaka, and P. Bradshaw</i>	551
33. Experimental Investigation of Oscillating Subsonic Jets <i>D. J. Collins, M. F. Platzer, J. C. S. Lai and J. M. Simmons</i>	575
34. Measurements in Ducted Flows by Laser Doppler Anemometry <i>A. M. K. P. Taylor, J. H. Whitelaw, and M. Yianneskis</i>	589
35. Fluid-Mechanics Mechanisms in the Stall Process of Airfoils for Helicopters <i>W. H. Young, Jr.</i>	601
36. On the Behavior of an Unsteady Turbulent Boundary Layer <i>P. G. Parikh, W. C. Reynolds, and R. Jayaraman</i>	617
REFERENCES	633
