<i>Editorial preface</i>	<i>page vii</i>
1 HISTORICAL INTRODUCTION AND FUNDAMENTAL NOTIONS	1
Discussion of formalism and pre-intuitionism; first and second acts of intuitionism; fleeing properties; species, basic notions; principles of judgeability and reciprocity; $\aleph_1 = \aleph_2$ ; spreads, basic notions	
2 GENERAL PROPERTIES OF SPECIES, SPREAD DIRECTIONS, SPREADS AND SPACES	21
Blocks, pyramids, etc.; weak forms of union; cardinal numbers; individualized spreads; Cartesian spaces ( $R^n$ ); basic topological notions, points of closure, accumulation, etc.; compactness, locatedness; characterization of compact located species; located infinite species $F$	
3 ORDER	40
Basic notions; intuitive between does not order the continuum; well-ordered species; marked well-ordered species; mathematical deductions; well-ordered blocks, stumps; virtual order, inextensible order	

4	PRECISION ANALYSIS OF THE CONTINUUM	57
	Intercalation subdivision; first-order precision, second-order precision; ordinal density, separability, connectedness, everywhere-density, local compactness	
5	THE BUNCH THEOREM	77
	Crude blocks contain well-ordered blocks; bunch (fan) theorem; uniform continuity theorem; Heine–Borel theorem; unsplittability of the continuum; unorderability of the continuum.
