

CONTENTS

Preface.....	v
Yoshikazu GIGA: A Local Characterization of Blowup Points of Semilinear Heat Equations.....	1
Shuichi KAWASHIMA and Yasushi SHIZUTA: The Navier-Stokes Equation Associated with the Discrete Boltzmann Equation	15
Shigeo KIDA, Michio YAMADA and Kohji OHKITANI: Route to Chaos in a Navier-Stokes Flow	31
Akitaka MATSUMURA and Takaaki NISHIDA: Periodic Solutions of a Viscous Gas Equation.....	49
Takeyuki NAGASAWA: On the One-dimensional Free Boundary Problem for the Heat-conductive Compressible Viscous Gas.....	83
Mitsuhiro T. NAKAO: A Computational Verification Method of Existence of Solutions for Nonlinear Elliptic Equations.....	101
Hisashi OKAMOTO: Degenerate Bifurcations in the Taylor-Couette Problem.....	121
Shigeru SAKAGUCHI: Uniqueness of Critical Point of the Solution to the Prescribed Constant Mean Curvature Equation Over Convex Domain in \mathbf{R}^2	129
Takashi SUZUKI: Symmetric Domains and Elliptic Equations	153
Seiji UKAI: On the Cauchy Problem for the KP Equation.....	179
Atsushi YOSHIKAWA: Weak Asymptotic Solutions to Hyperbolic Systems of Conservation Laws	195
Nobuyuki KENMOCHI and Irena PAWLOW: The Vanishing Viscosity Method in Two-Phase Stefan Problems with Nonlinear Flux Conditions.....	211
