A. DIJKSMA, H. LANGER and H. de SNOO, Unitary colligations in Krein spaces and their role in the extension theory of isometries and symmetric linear relations in Hilbert spaces	1
Introduction	1
1. Preliminary results	3
2. Characteristic functions of unitary colligations in Krein spaces	8
3. Isometries, unitary extensions and characteristic functions	21
4. Symmetric linear relations in a Hilbert space	24
5. Štraus extensions and generalized resolvents of symmetric subspaces	28
6. Canonical differential relations	32
7. Characteristic functions according to A.V. Štraus	36
S. KUREPA, Quadratic and sesquilinear forms.	
Contributions to characterizations of inner product spaces	43
Introduction	43
1. Some preliminary notions	44
2. Jordan-von Neumann theorem	45
3. Quadratic forms on normed spaces	49
4. Solution of Halperin's problem for complex spaces	51
5. Halperin's problem for additive functions	54
6. Some regularity properties of a quadratic form	56
7. Solution of Halperin's problem for real vector spaces.	60
8. Quadratic functionals conditioned on an algebraic basic set	65
9. Quadratic forms on abelian groups	68
10. Quadratic forms on groups	73
J. HOFFMANN-JØRGENSEN, The general marginal problem	77
1. Introduction	78
2. Function spaces	80
3. Positive functionals	104
4. Probability contents	149

5. Outer probability contents	187
6. Marginal and projective systems	243
7. Functionals on product spaces	290
Appendices	341
A. Arithmetics on $\bar{\mathbb{R}}$	341
B. Ordered sets	343
C. Stable pavings and function spaces	345
D. Measures	348
E. Topology	351
F. Function spaces	352
G. Baire and Borel measures	354
H. Correspondances	356
References	358
List of Symbols	360
Subject Index	363

S.SULJAGIĆ, Invariant subspaces of shifts in quaternionic Hilbert space	368
--	-----

Z.R.POP-STOJANOVIĆ, Energy in Markov processes	374
--	-----

D.BUTKOVIĆ, H.KRALJEVIĆ and N.SARAPA, On the almost convergence..	396
1. Generalities on matrix limiting methods	396
2. Almost convergence and strong regularity	397
3. A theorem on almost convergent sequences	407
4. A formula for Markov chains	410
5. Some remarks on chains and strong regularity	413

N.ELEZOVIĆ, p-nuclear operators and cylindrical measures on tensor products of Banach spaces	418
1. Introduction	418
2. Some classes of nuclear operators	419
3. Cylindrical measures on $E \odot F$ and its images	423
4. p-Radonifying operators of nuclear type	425
5. Examples: p-Radonifying operators between tensor products of ℓ_q -spaces	430
