Part 1

| | |
|---|------|
| Preface | xi |
| List of Participants | xiii |
| Integrable Systems | |
| Oscillations and instabilities in near integrable PDE's N. Ercolani, M. Forest and D. W. McLaughlin | 3 |
| Basic form for Riemann matrices A. Finkel and H. Segur | 47 |
| A review of superintegrable systems B. A. Kupershmidt | 83 |
| Integrable systems in general relativity B. K. Harrison | 123 |
| Modulational instabilities of periodic sine Gordon waves: A geometric analysis N. Ercolani, M. G. Forest and D. W. McLaughlin | 149 |
| On completely integrable systems with higher order corrections Y. Kodama | 167 |
| Forced integrable systems – An overview D. J. Kaup | 195 |
| Note on the inverse problem for a class of first order multidimensional systems A. I. Nachman, A. S. Fokas and M. J. Ablowitz | 217 |
| The diagonalization of nonlinear differential operators – A new approach to complete integrability M. S. Berger | 223 |
| Hyperbolic Systems | |
| Oscillations in nonlinear partial differential equations: Compensated compactness and homogenization L. Tartar | 243 |

| | |
|---|-----|
| Nonlinear P. D. E. and the weak topology R. J. DiPerna | 267 |
| Shock waves and diffusion waves T. P. Liu | 283 |
| The null condition and global existence to nonlinear wave equations S. Klainerman | 293 |
| Wave propagation in a bubbly liquid R. E. Caflisch, M. J. Miksis, G. C. Papanicolaou and L. Ting | 327 |
| Stability in systems of conservation laws with dissipation R. L. Pego | 345 |
| On the convergence of the viscosity method for the system of non-linear (1-D) elasticity M. Rascle | 359 |
| The Riemann problem for nonmonotone stress-strain functions: A "hysteresis" approach B. L. Keyfitz | 379 |
| The Riemann problem for a van der Waals fluid H. Hattori | 397 |
| The geometry of continuous Glimm functionals M. Schatzmann | 417 |
| A PDE approach to some large deviations problems W. H. Fleming and P. E. Souganidis | 441 |
| On using semigroups and the Trotter product formula to solve quasi-linear systems G. H. Pimbley | 449 |
| Part 2 | |
| Dispersive Systems | |
| On the infinitely many standing waves of some nonlinear Schroedinger equations C. K. R. T. Jones | 3 |
| On the solitary traveling wave of the generalized Korteweg-de Vries equation M. A. Weinstein | 23 |
| Wave operators for the scattering of solitary waves in multiple spatial dimensions H. A. Warchall | 31 |
| Global solutions of a dispersive equation in higher dimensions J. Avrin and J. A. Goldstein | 55 |

| | |
|---|-----|
| Energy decay of the damped nonlinear Klein-Gordon equation J. Avrin | 61 |
| Nonlinear focusing of dispersive waves R. Haberman and R. J. Sun | 67 |
| Variational Problems | |
| Noether's theorems and systems of Cauchy-Kovalevskaya type P. J. Olver | 81 |
| Some Ginzburg-Landau type vector field equations E. H. Lieb | 105 |
| Existence and regularity theory for Isoperimetric variational problems on Orlicz-Sobolev spaces: A review P. A. Vuillermot | 109 |
| Evolutionary Systems | |
| Pattern selection and low-dimensional chaos in dissipative many degree-of-freedom systems A. R. Bishop, J. S. Eilbeck, I. Satija and G. Wysin | 125 |
| Existence, regularity, and decay of viscous surface waves J. T. Beale | 137 |
| Attractors for the Kuramoto-Sivashinsky equations B. Nicolaenko, B. Scheurer and R. Temam | 149 |
| Nonlinear stability of the Kelvin-Stuart cat's eyes flow D. D. Holm, J. E. Marsden and T. Ratiu | 171 |
| Collapse and amplification of a vortex filament E. Siggia | 187 |
| A priori estimates and existence results for the Vlasov and Boltzmann equations C. Bardos, P. Degond and F. Golse | 189 |
| Invariant manifolds for perturbations of nonlinear parabolic systems with symmetry P. Bates | 209 |
| Analysis of nonlinear parabolic equations modeling plasma diffusion across a magnetic field J. M. Hyman and P. Rosenau | 219 |
| Self-similar solutions for semilinear parabolic equations Y. Giga | 247 |
| On blow up of solutions of evolution equations in bounded domains P. Korman | 253 |
| Nonlinear initial-boundary value problems in R^N F. A. Howes | 259 |

| | |
|---|-----|
| A non-linear, singular perturbation problem with some unusual features C. M. Brauner, W. Eckhaus, M. Garbey and A. van Harten | 275 |
| Reduction methods in flame theory P. C. Fife and B. Nicolaenko | 311 |
| Saw-tooth evolution in a Stefan problem G. S. S. Ludford | 331 |
| Solidification problems as systems of nonlinear differential equations G. Caginalp | 347 |
| Global solutions for systems of parabolic conservation laws with nonsmooth initial data D. Hoff and J. Smoller | 371 |
| Multidimensional travelling fronts R. Gardner | 383 |
