

# Contents

## Introduction

A biographical sketch of Stephen C. Kleene . . . . .	vii
A summary of Kleene's work in recursion theory . . . . .	x
The bibliography of Stephen C. Kleene . . . . .	xii
Ph.D. students of Stephen C. Kleene . . . . .	xvii
The program of the Kleene Symposium . . . . .	xviii

## Invited Papers

Stephen C. Kleene, <i>Recursive functionals and quantifiers of finite types revisited II</i> . . . . .	1
Peter Aczel, <i>Frege structures and the notions of proposition, truth and set</i> . . . . .	31
Robert L. Constable, <i>The role of finite automata in the development of modern computing theory</i> . . . . .	61
Haskell B. Curry, <i>Some philosophical aspects of combinatory logic</i> . . . . .	85
Dick H. J. de Jongh, <i>A Class of intuitionistic connectives</i> . . . . .	103
Harvey Friedman, <i>A strong conservative extension of Peano arithmetic</i> . . . . .	113
Robin Gandy, <i>Church's Thesis and principles for mechanisms</i> . . . . .	123
Alexander S. Kechris, <i>Recent advances in the theory of higher level projective sets</i> . . . . .	149
Joan Rand Moschovakis, <i>Kleene's realizability and "divides" notions for formalized intuitionistic mathematics</i> . . . . .	167
Anil Nerode and Richard A. Shore, <i>Second order logic and first order theories of reducibility orderings</i> . . . . .	181
Gerald E. Sacks, <i>Post's problem, absoluteness and recursion in finite types</i> . . . . .	201
Dana Scott, <i>Lambda Calculus: Some models, some philosophy</i> . . . . .	223
Stephen G. Simpson, <i>The hierarchy based on the jump operator</i> . . . . .	267
A. S. Troelstra, <i>Extended bar induction of type zero</i> . . . . .	277
Richard Vesley, <i>Intuitionistic analysis: The search for axiomatization and understanding</i> . . . . .	317

## Contributed Papers

Robert P. Daley, <i>The busy beaver method</i> . . . . .	333
Karel Hrbacek and Stephen G. Simpson, <i>On Kleene degrees of analytic sets</i> . . . . .	347
David P. Kierstead, <i>A semantics for Kleene's <math>j</math>-expressions</i> . . . . .	353
Phokion G. Kolaitis, <i>Recursion and nonmonotone induction in a quantifier</i> . . . . .	367
Shih-Chao Liu, <i>A proof-theoretic approach to non-standard analysis with emphasis on distinguishing between constructive and non-constructive results</i> . . . . .	391
Arnold W. Miller, <i>Covering <math>2^\omega</math> with <math>\omega_1</math> disjoint closed sets</i> . . . . .	415
Peter M. Winkler, <i>Computational characterization of abelian groups</i> . . . . .	423
