

CONTENTS

Volume II

| | |
|---|-----|
| M. Las Vergnas , Eulerian circuits of 4-valent graphs imbedded in surfaces | 451 |
| V.A. Liskovets , A census of non-isomorphic planar maps | 479 |
| L. Lovász , The matroid matching problem | 495 |
| J.H. Mason , Glueing matroids together: A study of Dilworth truncations and matroid analogues of exterior and symmetric powers | 519 |
| V. Neumann-Lara , Clique divergence in graphs | 563 |
| J. Nešetřil – A. Pultr , Product and other representations of graphs and related characteristics | 571 |
| J. Pach – L. Surányi , Graphs of diameter 2 and linear programming | 599 |
| S. Poljak – A. Pultr – V. Rödl , On the dimension of Kneser graphs | 631 |
| A. Recski , An algorithm to determine whether the sum of some graphic matroids is graphic | 647 |
| H. Sachs – M. Stiebitz , Automorphism group and spectrum of a graph | 657 |
| A. Schrijver , Association schemes and the Shannon capacity: Eberlein polynomials and the Erdős – Ko – Rado theorem | 671 |
| J.J. Seidel – D.E. Taylor , Two-graphs, a second survey | 689 |
| P.D. Seymour , Some applications of matroid decomposition | 713 |
| M. Stern , Generalized matroid lattices | 727 |
| M.M. Sysło , An efficient cycle vector space algorithm for listing all cycles of a planar graph | 749 |
| V. Trnková , Cardinal multiplication of relational structures | 763 |
| W.T. Tutte , On chain-groups and the factors of graphs | 793 |
| K. Vesztergombi , Chromatic number of strong product of graphs | 819 |
| R. Weiss , s -transitive graphs | 827 |

Volume I

| | |
|--|-----|
| PREFACE | 3 |
| CONTENTS | 4 |
| SCIENTIFIC PROGRAM | 7 |
| LIST OF PARTICIPANTS | 13 |
| I. Bárány, System of representatives for sets whose convex hull contains zero | 19 |
| N.L. Biggs, Aspects of symmetry in graphs | 27 |
| R.C. Bose – R. Miskimins, Partial geometric spaces of m -dimensions | 37 |
| D.M. Cvetković, Some possible directions in further investigations of graph spectra | 47 |
| J. Demel, On rotational tournaments and their output tournaments | 69 |
| J. Dénes, A generalization of a result of A. Hurwitz | 85 |
| D.Ž. Djoković, Automorphisms of regular graphs and finite simple group-amalgams | 95 |
| P. Ecsedi-Tóth – A. Varga – F. Mórićz, On a connection between algebraic and graph-theoretic minimization of truth | 119 |
| P. Erdős, Some applications of graph theory and combinatorial methods to number theory and geometry | 137 |
| U. Faigle, On supermatroids with submodular rank function. | 149 |
| A. Frank, On disjoint trees and arborescences | 159 |
| P. Frankl, Intersecting hypergraphs with transitive group | 171 |
| Z. Füredi, Erdős – Ko – Rado type theorems with upper bounds on the maximum degree | 177 |
| A. Gardiner, When is an array realised by a distance-regular graph? | 209 |
| C.D. Godsil, GRR's for non-solvable groups | 221 |
| C.D. Godsil – I. Gutman, On the matching polynomial of a graph. | 241 |

| | |
|--|-----|
| E. Győri , Strongly connected digraphs with few cycles | 251 |
| W. Haemers , An upper bound for the Shannon capacity of a graph | 267 |
| P. Hell – D.G. Kirkpatrick , Scheduling, matching, and coloring | 273 |
| P.M. Jensen , Binary fundamental matroids | 281 |
| G.A. Jones , Graph imbeddings, groups, and Riemann surfaces | 297 |
| F. Juhász , On the spectrum of a random graph | 313 |
| A.K. Kelmans , Graph expansion and reduction | 317 |
| A.K. Kelmans , The concept of a vertex in a matroid, the non-separating cycles of a graph and a new criterion for graph planarity | 345 |
| G. Kéri , On the reduction of a bipartite graph to irreducible components. | 389 |
| M.H. Klin , On edge but not vertex transitive graphs | 399 |
| M.H. Klin – R. Pöschel , The König problem, the isomorphism problem for cyclic graphs and the method of Schur rings | 405 |
| P. Krivka , The dimension of odd cycles and Cartesian cubes | 435 |
