

TABLE OF CONTENTS

Foreword	vii
PART I	
BIFURCATION IN MATHEMATICS AND APPLICATIONS	
M. G. Crandall and P. H. Rabinowitz / Notes by E. Buzano and C. Canuto: Mathematical Theory of Bifurcation	3
C. Conley and J. Smoller / Remarks on the Stability of Steady-State Solutions of Reaction-Diffusion Equations	47
M. Ghil / Successive Bifurcations and the Ice-Age Problem	57
PART II	
BIFURCATION IN THEORETICAL PHYSICS AND STATISTICAL MECHANICS; APPLICATIONS	
M. E. Fisher / Critical Phenomena in Statistical Mechanics Aspects of Renormalization Group Theory	61
B. M. Mc Coy and T. T. Wu / Lattice Renormalization of Non-Perturbative Quantum Field Theory	69
G. A. Baker, Jr. / The Continuous-Spin, Ising Model of Field Theory and the Renormalization Group	91
J. P. Eckmann / Bifurcations for $\text{Map}^3$	115
B. Derrida / Critical Properties of One Dimensional Mappings	137
Y. Pomeau / Intermittency: A Simple Mechanism of Continuous Transition from Order to Chaos	155
S. Aubry / Metal-Insulator Transition in One-Dimensional Deformable Lattices	163
J. Nuttall / Sets of Minimum Capacity, Padé Approximants and the Bubble Problem	185
D. Bessis / Bifurcations in the Diophant Moment Problem	203

PART III  
YANG-MILLS FIELD THEORY

R. Stora / Yang-Mills Fields: Semi Classical Aspects	219
R. T. Glassey and W. A. Strauss / Propagation of the Energy of Yang-Mills Fields	231
B. Gidas / Euclidean Yang-Mills and Related Equations	243
H. Berestycki, P. L. Lions / Existence of Stationary States in Nonlinear Scalar Field Equations	269

PART IV  
SOLITONS IN PHYSICS AND IN ALGEBRAIC GEOMETRY

R. K. Bullough / Solitons: Inverse Scattering Theory and its Applications	295
M. F. Barnsley and G. Turchetti / New Results on the Nonlinear Boltzmann Equation	351
F. Calogero / Solvable Many-Body Problems and Related Mathematical Findings (and Conjectures)	371
D. V. Chudnovsky / Riemann Monodromy Problem, Isomonodromy Deformation Equations and Completely Integrable Systems	385
G. V. Chudnovsky / Padé Approximation and the Riemann Monodromy Problem	449

PART V  
NONLINEAR PARTIAL DIFFERENTIAL EQUATIONS AND APPLICATIONS

H. Brezis / Nonlinear Evolution Equations of Schrödinger Type	513
C. M. Dafermos / Asymptotic Behavior of Solutions of Hyperbolic Balance Laws	521
J. P. Dias / Nonlinear Problems Arising in the Study of Nematic Liquid Crystals	535
R. Teman / Some Properties of Functional Invariant Sets for Navier-Stokes Equations	551
B. G. Giraud / An Introduction to the Time-Dependent Hartree-Fock Theory in Nuclear Physics	555
List of Participants	585
