

## CONTENTS

Preface

List of Participants

### CLASSICAL RECURSION THEORY

Fundamental Methods for Constructing Recursively Enumerable Degrees R.I.SOARE	1
A Survey of Non-RE Degrees $\leq 0'$ D.B.POSNER	52
Degrees of Generic Sets C.G.JOCKUSCH	110
The Degrees of Unsolvability: Some Recent Results M. LERMAN	140

### GENERALISATIONS

Some Constructions in $\alpha$ -Recursion Theory R.SHORE	158
The Recursion Theory of the Continuous Functionals D.NORMANN	171
Three Aspects of Recursive Enumerability in Higher Types G.E.SACKS	184

### APPLICATIONS

Computing in Algebraic Systems J.V.TUCKER	215
--	-----

Applications of Classical Recursion Theory to Computer Science C.H.SMITH	236
"Natural" Programming Languages and Complexity Measures for Subrecursive Programming Languages: An Abstract Approach D.A.ALTON	248
Complexity Theory with Emphasis on the Complexity of Logical Theories R.E.LADNER	286
