

## CONTENTS

O.D. ANDERSON, International Time Series Meeting (ITSM): Nottingham University, 26-30 March 1979	1
O.D. ANDERSON and J.G. DE GOOIJER, Classifying Series Realisations from IMA(1,1) and ARMA(1,1) Processes	5
O.D. ANDERSON and J.G. DE GOOIJER, Distinguishing between IMA(1,1) and ARMA(1,1) Models: a large scale Simulation Study of two particular Box-Jenkins Time Processes	15
H. TONG, A view on Non-Linear Time Series Model Building	41
V. HAGGAN and T. OZAKI, Amplitude-Dependent Exponential AR Model Fitting for Non-Linear Random Vibrations	57
K.W. HIPEL and A.I. McLEOD, Perspectives in Stochastic Hydrology	73
K.J. ÅSTRÖM, Piece-Wise Deterministic Signals	103
F. EICKER, Consistent Parameter Estimation in Mixed Autoregressions and in General Linear Stochastic Regressions	119
C.L. MALLOWS, Resistant Smoothing	147
L. LJUNG, Asymptotic Theory of Prediction Error Estimation Methods	157
P.M. ROBINSON, Estimation and Forecasting for Time Series containing Censored or Missing Observations	167
W. BRUGGEMAN and D.E. O'NEILL, Comparison of Classical Econometric Methods and Multivariate Time Series Analysis in Assessing the Relationship between Consumption and Income	183
S. DOSSOU-GBETE, P. ETtingER and A. DE FALGUEROLLES, Identification and Preliminary Estimation of ARMA type Processes: Some Comments	209
D. PFEFFERMANN and J. FISHER, Festival and Working Days Prior Adjustments in Economic Time Series	219
G. HYMAN and D. BOOTH, The Application of Multivariate Time Series Analysis to Local Area Employment and Demographic Forecasting	235
W. POLASEK, ACF-Patterns in Seasonal MA-Processes	259
J. BRODE, On Forecasting Discontinuous, Non-Normal Stochastic Processes	277

K.P. PFEIFFER and T. KENNER, Characterization of Cardiac Arrhythmia using a Moving-Average Model with Non-Linear Terms	287
S. KALTIO, A System for Time Series Analysis	295
E. KHABIE-ZEITOUNE, Closed Form Likelihood in Multivariate Weakly Stationary Time Series	311
G. MÉLARD, Some Links between the Harrison-Stevens and Box-Jenkins Methods for Univariate Time Series	319
W.A. NURI, Estimations in Regression Models with Errors following an Autoregressive-Moving Average Scheme	325
L.-E. ÖLLER, Are Speculative Price Series Random Walks?	333
A. RAVEH, Least Polytone Analysis (LPA): A Nonmetric Technique for Analyzing Time Series Data	335
A.D. THRALL, A Spectral Analysis of a Time Series in which Probabilities of Observation are Periodic	357
M. DEISTLER, Parameterization and Consistent Estimation of ARMA Systems	373
G. WAHBA, Continuous Space Series on the Plane and in $d$ Dimensions	387
V.S. PUGACHEV, Estimation of Markov Processes	389
V.G. ALEKSEEV and A.M. YAGLOM, Nonparametric and Parametric Spectrum Estimation Methods for Stationary Time Series	401
J.-M. BEGUIN, C. GOURIEROUX and A. MONFORT, Identification of a Mixed Autoregressive-Moving Average Process: The Corner Method	423
O.D. ANDERSON, Time Series Analysis and Forecasting (TSA&F) Activities	437
