|--|----|
| Dedication   |    |
| Acknowledgements   |    |
| Preface  |    |
| Addresses of contributors  |    |
| <br>   |    |
| Part 1: 3-manifolds  |    |
| <br>   |    |
| The classification of compact 3-manifolds                                  | 3  |
| P.SCOTT  |    |
| <br>   |    |
| Hyperbolic geometry and 3-manifolds  | 9  |
| W.THURSTON   |    |
| <br>   |    |
| Sewing-up link exteriors   | 27 |
| W.R. BRAKES  |    |
| <br>   |    |
| Periodic transformations in homology 3-spheres and<br>the Rohlin invariant | 39 |
| L. CONTRERAS-CABALLERO   |    |
| <br>   |    |
| Part 2: Knot theory  |    |
| <br>   |    |
| The universal abelian cover of a link                                      | 51 |
| D. COOPER  |    |
| <br>   |    |
| Levine's theorem- a remark   | 67 |
| L.H. KAUFFMAN  |    |
| <br>   |    |
| The factorisation of knots   | 71 |
| C. KEARTON   |    |
| <br>   |    |
| Seven excellent knots  | 81 |
| R. RILEY   |    |

|  |     |
|--|-----|
| <b>Part 3: Two-dimensional homotopy theory</b>   |     |
| Identities among relations<br>R. BROWN and J. HUEBSCHMANN                                    | 153 |
| On Peiffer transformations, link diagrams<br>and a question of J.H.C. Whitehead<br>P. STEFAN | 203 |
| Higher-dimensional group theory<br>R. BROWN  | 215 |
| <b>Part 4: 4-manifolds</b>   |     |
| Actions of compact connected groups on 4-manifolds<br>P. ORLIK                               | 241 |
