## Introduction

A. de Meijere

<b>Introduction</b> .....	<b>1</b>
---------------------------	----------

## 24.1 Product Class 1: 1,1-Bis(heteroatom-functionalized) Allenes

### 24.1.1 Product Subclass 1: 1,1-Dihaloallenes

R. R. Kostikov

<b>24.1.1</b>	<b>Product Subclass 1: 1,1-Dihaloallenes</b> .....	<b>17</b>
<b>24.1.1.1</b>	Synthesis of Product Subclass 1 .....	17
<b>24.1.1.1.1</b>	Method 1: Synthesis from Allenes and Acetylenes by Substitution Reactions .....	18
<b>24.1.1.1.1.1</b>	Variation 1: Substitution of the Stannyl Group .....	18
<b>24.1.1.1.1.2</b>	Variation 2: From Acetylenes by Substitution Reactions .....	18
<b>24.1.1.1.1.3</b>	Variation 3: Via ( <i>gem</i> -Difluoroallenyl)indium Derivatives .....	20
<b>24.1.1.1.2</b>	Method 2: Dehydrohalogenation of DihaloPROPANES or HALOPROPENES ..	20
<b>24.1.1.1.2.1</b>	Variation 1: Direct Dehydrohalogenation .....	20
<b>24.1.1.1.2.2</b>	Variation 2: Dehydrochlorination through <i>gem</i> -Lithio,Halo-Substituted Carbenoid or Carbene Intermediates .....	23
<b>24.1.1.1.3</b>	Method 3: Synthesis by the Shapiro Reaction .....	24
<b>24.1.1.1.4</b>	Method 4: Dehalogenation of Fluoropropenes .....	24
<b>24.1.1.1.4.1</b>	Variation 1: Direct Dehalogenation of Fluoropropenes .....	24
<b>24.1.1.1.4.2</b>	Variation 2: Defluorosilylation of Silyl-Substituted Fluoropropenes .....	25
<b>24.1.1.1.5</b>	Method 5: Isomerization of Acetylenes, CycloPROPENES, or MethyleneCycloPROPANES .....	25
<b>24.1.1.2</b>	Applications of Product Subclass 1 in Organic Synthesis .....	26
<b>24.1.1.2.1</b>	Method 1: Addition of Nucleophilic and Electrophilic Reagents .....	27
<b>24.1.1.2.1.1</b>	Variation 1: 1,2-Addition to 1,1-Difluoroallenes .....	27
<b>24.1.1.2.1.2</b>	Variation 2: Nucleophilic Addition to 1,1-Dichloroallenes .....	28
<b>24.1.1.2.1.3</b>	Variation 3: Electrophilic Addition of Acyl Chlorides .....	28
<b>24.1.1.2.1.4</b>	Variation 4: Oxygenolytic Solvolysis of Polyiodoallenes .....	28
<b>24.1.1.2.2</b>	Method 2: [2 + 2] Cycloaddition .....	29
<b>24.1.1.2.2.1</b>	Variation 1: Dimerization .....	29
<b>24.1.1.2.2.2</b>	Variation 2: Allene-Alkene [2 + 2] Cycloaddition .....	30
<b>24.1.1.2.2.3</b>	Variation 3: Allene-Alkyne [2 + 2] Cycloaddition .....	31
<b>24.1.1.2.3</b>	Method 3: [2 + 3]-Dipolar Cycloaddition .....	31
<b>24.1.1.2.4</b>	Method 4: [2 + 4] Cycloaddition .....	32
<b>24.1.1.2.5</b>	Method 5: Metal Complexes .....	33

<b>24.1.2</b>	<b>Product Subclass 2: 1-Halo-1-(organooxy)allenes</b> R. Zimmer	
<b>24.1.2</b>	<b>Product Subclass 2: 1-Halo-1-(organooxy)allenes</b> .....	37
<b>24.1.2.1</b>	Synthesis of Product Subclass 2 .....	37
<b>24.1.2.1.1</b>	Method 1: Halogenation of 1-Alkoxyallenes .....	37
<b>24.1.3</b>	<b>Product Subclass 3: 1-Halo-1-(organochalcogeno)allenes and 1-Halo-1-(organochalcogeno)butatrienes</b> R. Zimmer	
<b>24.1.3</b>	<b>Product Subclass 3: 1-Halo-1-(organochalcogeno)allenes and 1-Halo-1-(organochalcogeno)butatrienes</b> .....	39
<b>24.1.3.1</b>	Synthesis of Product Subclass 3 .....	39
<b>24.1.3.1.1</b>	Method 1: 1-Halo-1-(organochalcogeno)allenes by the Isomerization of 3-Halo-3-(organochalcogeno)alk-1-yne with Base .....	39
<b>24.1.3.1.2</b>	Method 2: 1-Halo-1-(organochalcogeno)allenes by the Reaction of 1-Haloalk-1-yn-3-ols with Sulfur Compounds, and Subsequent Rearrangement .....	40
<b>24.1.3.1.3</b>	Method 3: 1-Halo-1-(organochalcogeno)butatrienes by Dehydrochlorination of 1,2-Dichloro- 1-(organochalcogeno)buta-1,3-dienes .....	41
<b>24.1.4</b>	<b>Product Subclass 4: 1-Nitrogen-Functionalized 1-Haloallenes</b> R. Zimmer	
<b>24.1.4</b>	<b>Product Subclass 4: 1-Nitrogen-Functionalized 1-Haloallenes</b> .....	43
<b>24.1.4.1</b>	Synthesis of Product Subclass 4 .....	43
<b>24.1.4.1.1</b>	Method 1: Halogenation of an Allene-1,1,3-triamine .....	43
<b>24.1.5</b>	<b>Product Subclass 5: 1-Phosphorus-Functionalized 1-Haloallenes</b> R. Zimmer	
<b>24.1.5</b>	<b>Product Subclass 5: 1-Phosphorus-Functionalized 1-Haloallenes</b> .....	45
<b>24.1.5.1</b>	Synthesis of Product Subclass 5 .....	45
<b>24.1.5.1.1</b>	Method 1: Reaction of 1-Haloalk-1-yn-3-ols with Phosphorus Compounds, and Subsequent Rearrangement .....	45
<b>24.1.5.2</b>	Applications of Product Subclass 5 in Organic Synthesis .....	46
<b>24.1.5.2.1</b>	Method 1: Palladium-Catalyzed Cross Coupling .....	46

<b>24.1.6</b>	<b>Product Subclass 6: 1,1-Bis(organooxy)allenes, 1,1-Bis(organooxy)-butatrienes, 1-(Organooxy)-1-siloxyallenes, and 1-(Organooxy)-allen-1-olates</b>	
	R. Zimmer	
<hr/>		
<b>24.1.6</b>	<b>Product Subclass 6: 1,1-Bis(organooxy)allenes, 1,1-Bis(organooxy)-butatrienes, 1-(Organooxy)-1-siloxyallenes, and 1-(Organooxy)-allen-1-olates</b>	49
<b>24.1.6.1</b>	Synthesis of Product Subclass 6	49
<b>24.1.6.1.1</b>	Synthesis of 1,1-Bis(organooxy)allenes and 1,1-Bis(organooxy)butatrienes	49
<b>24.1.6.1.1.1</b>	Method 1: 1,1-Bis(organooxy)allenes and 1,1-Bis(organooxy)butatrienes by Deprotonation–Alkylation of 1,1-Bis(organooxy)alk-2-yne	49
<b>24.1.6.1.1.2</b>	Method 2: 1,1-Bis(organooxy)allenes by Ring Opening of Highly Functionalized Cyclopropanes	50
<b>24.1.6.1.1.3</b>	Method 3: 1,1-Bis(organooxy)allenes by Wittig Alkenation	50
<b>24.1.6.1.2</b>	Synthesis of 1-(Organooxy)-1-siloxyallenes	51
<b>24.1.6.1.2.1</b>	Method 1: Cuprate Addition and Silylation of Alkyl Propynoates	51
<b>24.1.6.1.3</b>	Synthesis of 1-(Organooxy)allen-1-olates	51
<b>24.1.6.1.3.1</b>	Method 1: Deprotonation of Dialkyl Malonates	51
<b>24.1.6.1.3.2</b>	Method 2: Synthesis from Alkyl Propynoates	51
<b>24.1.6.2</b>	Applications of Product Subclass 6 in Organic Synthesis	52
<b>24.1.6.2.1</b>	Method 1: [2 + 2]-Cycloaddition Reactions of 1,1-Bis(organooxy)allenes	52
<b>24.1.6.2.2</b>	Method 2: Synthesis of 2 <i>H</i> -Pyran-2,4(3 <i>H</i> )-diones and Furan-2,5-diones from Tetraalkoxyallenes	52
<b>24.1.7</b>	<b>Product Subclass 7: 1-(Organochalcogeno)-1-(organooxy)allenes</b>	
	R. Zimmer	
<hr/>		
<b>24.1.7</b>	<b>Product Subclass 7: 1-(Organochalcogeno)-1-(organooxy)allenes</b>	55
<b>24.1.7.1</b>	Synthesis of Product Subclass 7	55
<b>24.1.7.1.1</b>	Method 1: Deprotonation–Addition Reaction of 1-(Organooxy)allenes	55
<b>24.1.7.1.2</b>	Method 2: Wittig Alkenation	55
<b>24.1.8</b>	<b>Product Subclass 8: 1-Nitrogen-Functionalized 1-(Organooxy)allenes and Allen-1-olates</b>	
	R. Zimmer	
<hr/>		
<b>24.1.8</b>	<b>Product Subclass 8: 1-Nitrogen-Functionalized 1-(Organooxy)allenes and Allen-1-olates</b>	57
<b>24.1.8.1</b>	Synthesis of Product Subclass 8	57
<b>24.1.8.1.1</b>	Method 1: 1-(Organooxy)allen-1-amines by Alkylation–Deprotonation of Malonamides	57

24.1.8.1.2	Method 2:	1-(Organooxy)-1-(1 <i>H</i> -1,2,4-triazol-1-yl)allenes by Deprotonation–Alkylation of 3-(Organooxy)- 3-(1 <i>H</i> -1,2,4-triazol-1-yl)prop-1-ynes .....	57
24.1.8.1.3	Method 3:	Generation of 1-Nitrogen-Functionalized Allen-1-olates from $\alpha$ -Hydrazono N-Monosubstituted Amides by the Shapiro Reaction .....	58
24.1.9	<b>Product Subclass 9: 1-Phosphorus-Functionalized 1-(Organooxy)allenes and 1-Siloxyallenes</b> R. Zimmer		
<hr/>			
24.1.9	<b>Product Subclass 9: 1-Phosphorus-Functionalized 1-(Organooxy)allenes and 1-Siloxyallenes</b> .....		61
24.1.9.1	Synthesis of Product Subclass 9 .....		61
24.1.9.1.1	Method 1:	1-Phosphorus-Functionalized 1-(Organooxy)allenes by the Addition of Phosphorus Compounds to 1-Alkoxyalk-1-ynes	61
24.1.9.1.2	Method 2:	1-Phosphorus-Functionalized 1-Siloxyallenes by the Reaction of Carbon Suboxide with Silylated Phosphites ...	61
24.1.10	<b>Product Subclass 10: 1,1-Bis(organochalcogeno)allenes and 1,1-Bis(organochalcogeno)butatrienes</b> R. Zimmer		
<hr/>			
24.1.10	<b>Product Subclass 10: 1,1-Bis(organochalcogeno)allenes and 1,1-Bis(organochalcogeno)butatrienes</b> .....		63
24.1.10.1	Synthesis of Product Subclass 10 .....		63
24.1.10.1.1	Synthesis of 1,1-Bis(organochalcogeno)allenes .....		63
24.1.10.1.1.1	Method 1:	Deprotonation–Addition Sequence .....	63
24.1.10.1.1.1.1	Variation 1:	Starting from an Alk-1-yn-3-ol .....	63
24.1.10.1.1.1.2	Variation 2:	Starting from an Alk-1-enyl-Substituted Allene .....	63
24.1.10.1.1.2	Method 2:	Alkylation–Elimination Starting from a Vinylphosphonium Salt	64
24.1.10.1.1.3	Method 3:	Isomerization of 2-Ethynyl-1,3-dithianes .....	64
24.1.10.1.1.4	Method 4:	Reaction of 1-(Organosulfanyl)alk-1-yn-3-ols with Sulfenyl Halides and Subsequent Rearrangement .....	64
24.1.10.1.2	Synthesis of 1,1-Bis(organochalcogeno)butatrienes .....		65
24.1.10.1.2.1	Method 1:	Nucleophilic Substitution .....	65
24.1.10.1.2.1.1	Variation 1:	Of a Perchlorinated Enyne .....	65
24.1.10.1.2.1.2	Variation 2:	Of Chloro-Substituted Butatrienes .....	65
24.1.10.1.2.2	Method 2:	Reaction of 1,4-Dilithiobuta-1,3-diyne with Electrophiles .....	66
24.1.10.1.2.3	Method 3:	Wittig Alkenation of Diarylketenes .....	66
24.1.10.1.2.4	Method 4:	Elimination–Isomerization Starting from 4-Alkoxy-1,1-bis(organothioalkyl)alk-2-ynes .....	67

<b>24.1.11</b>	<b>Product Subclass 11: 1-Nitrogen-Functionalized 1-(Organochalcogeno)allenes</b> R. Zimmer	
<hr/>		
<b>24.1.11</b>	<b>Product Subclass 11: 1-Nitrogen-Functionalized 1-(Organochalcogeno)allenes</b>	69
<b>24.1.11.1</b>	Synthesis of Product Subclass 11	69
<b>24.1.11.1.1</b>	Method 1: Deprotonation–Addition Reaction of 1-Nitrogen-Functionalized Allenes	69
<b>24.1.11.1.2</b>	Method 2: Deprotonation of Amidinium Salts	69
<b>24.1.11.1.3</b>	Method 3: Alkylation of 2-Ethynylbenzothiazolium Salts	70
<b>24.1.11.1.4</b>	Method 4: Isomerization of 1-Azido-1-(phenylsulfanyl)prop-2-yne	70
<b>24.1.12</b>	<b>Product Subclass 12: 1-Phosphorus-Functionalized 1-(Organochalcogeno)allenes</b> R. Zimmer	
<hr/>		
<b>24.1.12</b>	<b>Product Subclass 12: 1-Phosphorus-Functionalized 1-(Organochalcogeno)allenes</b>	73
<b>24.1.12.1</b>	Synthesis of Product Subclass 12	73
<b>24.1.12.1.1</b>	Method 1: Deprotonation–Addition Reaction of 1-Phosphorus-Functionalized Allenes	73
<b>24.1.13</b>	<b>Product Subclass 13: 1,1-Bis(nitrogen-functionalized) Allenes and Butatrienes</b> R. Zimmer	
<hr/>		
<b>24.1.13</b>	<b>Product Subclass 13: 1,1-Bis(nitrogen-functionalized) Allenes and Butatrienes</b>	75
<b>24.1.13.1</b>	Synthesis of Product Subclass 13	75
<b>24.1.13.1.1</b>	Method 1: 1,1-Bis(nitrogen-functionalized) Allenes by Deprotonation of Amidinium Salts	75
<b>24.1.13.1.2</b>	Method 2: 1,1-Bis(nitrogen-functionalized) Allenes by Dehydrobromination of 2-Bromopropenes	75
<b>24.1.13.1.3</b>	Method 3: 1,1-Bis(nitrogen-functionalized) Allenes by the Reaction of 3,6-Dihydropyrimidinium-4-olates with <i>N,N</i> -Diethylprop- 1-yn-1-amine	75
<b>24.1.13.1.4</b>	Method 4: 1,1-Bis(nitrogen-functionalized) Butatrienes by the Condensation Reaction of 1,1-Dichloroethenes with <i>N,N,N',N'</i> -Tetramethylethene-1,1-diamine	76

<b>24.1.14</b>	<b>Product Subclass 14: 1-Nitrogen-Functionalized 1-Phosphorus-Functionalized Allenes</b> R. Zimmer	
<b>24.1.14</b>	<b>Product Subclass 14: 1-Nitrogen-Functionalized 1-Phosphorus-Functionalized Allenes</b> .....	79
<b>24.1.14.1</b>	Synthesis of Product Subclass 14 .....	79
<b>24.1.14.1.1</b>	Method 1: Reaction of an Iminium Iodide with Triphenylphosphine .....	79
<b>24.1.15</b>	<b>Product Subclass 15: 1,1-Bis(phosphorus-functionalized) Allenes</b> M. Stankević and K. M. Pietrusiewicz	
<b>24.1.15</b>	<b>Product Subclass 15: 1,1-Bis(phosphorus-functionalized) Allenes</b> .....	81
<b>24.1.15.1</b>	Synthesis of Product Subclass 15 .....	81
<b>24.1.15.1.1</b>	Method 1: Synthesis from Phosphorus-Functionalized Alkynes .....	81
<b>24.1.15.1.2</b>	Method 2: Synthesis from Other Phosphorus-Functionalized Allenes .....	82
<b>24.2</b>	<b>Product Class 2: 1,1-Bis(heteroatom-functionalized) Alk-1-enes</b>	
<b>24.2.1</b>	<b>Product Subclass 1: 1,1-Dihaloalk-1-enes</b> R. R. Kostikov	
<b>24.2.1</b>	<b>Product Subclass 1: 1,1-Dihaloalk-1-enes</b> .....	85
<b>24.2.1.1</b>	Synthesis of Product Subclass 1 .....	85
<b>24.2.1.1.1</b>	Method 1: Vinylic Substitution of Halogens, Metals, or Other Groups .....	85
<b>24.2.1.1.1.1</b>	Variation 1: Substitution of a Silyl Group or a Metal in 1-Metal-Substituted 1-Haloalk-1-enes .....	86
<b>24.2.1.1.1.2</b>	Variation 2: From 1-Substituted Alk-1-yne .....	87
<b>24.2.1.1.2</b>	Method 2: 2-Aryl- and 2-Hetaryl-Substituted 1,1-Dihaloalk-1-enes from Hydrazones of Aromatic Aldehydes and Ketones .....	88
<b>24.2.1.1.3</b>	Method 3: Dehydrohalogenation of Oligohaloalkanes and Halovinyl Intermediates .....	89
<b>24.2.1.1.3.1</b>	Variation 1: Dehydrohalogenation of Oligohaloalkanes .....	89
<b>24.2.1.1.3.2</b>	Variation 2: From Vinylolithium Reagents .....	90
<b>24.2.1.1.3.3</b>	Variation 3: From Halovinylzinc or Halovinylmagnesium Reagents .....	91
<b>24.2.1.1.4</b>	Method 4: From 2,2,2-Trihaloethanols and Derivatives .....	93
<b>24.2.1.1.5</b>	Method 5: Dehalogenation of Oligohaloalkanes .....	94
<b>24.2.1.1.6</b>	Method 6: Wittig-Type Reaction .....	95
<b>24.2.1.1.7</b>	Method 7: Synthesis from Ketones and Lithium Carbenoids .....	99
<b>24.2.1.1.8</b>	Method 8: Electrophilic Addition to 1-Haloalk-1-yne .....	100
<b>24.2.1.1.8.1</b>	Variation 1: Halogen Addition to 1-Haloalk-1-yne .....	100
<b>24.2.1.1.8.2</b>	Variation 2: Dimerization of 1-Aryl-2-iodoacetylenes .....	102
<b>24.2.1.1.9</b>	Method 9: Synthesis by Rearrangement .....	102

24.2.1.1.9.1	Variation 1: Friedel–Crafts Reactions .....	102
24.2.1.1.9.2	Variation 2: From 1-Haloalk-1-yn-3-ols .....	103
24.2.1.2	Applications of Product Subclass 1 in Organic Synthesis .....	104
24.2.1.2.1	Method 1: Substitution of Halogen for Hydrogen .....	104
24.2.1.2.2	Method 2: Substitution of Halogen for Nitrogen, Phosphorus, and Other Elements .....	105
24.2.1.2.3	Method 3: Synthesis of Substituted Allyl Alcohols with Vinylithium Derivatives .....	107
24.2.1.2.4	Method 4: Styrene Synthesis with Perfluoroalk-1-enylzinc Derivatives .....	107
24.2.1.2.5	Method 5: Synthesis of 1,3-Dienes .....	109
24.2.1.2.6	Method 6: Synthesis of Acrylates .....	111
24.2.1.2.7	Method 7: Alkylation and Acylation .....	111
24.2.1.2.8	Method 8: Synthesis of Stilbenes by Suzuki Coupling .....	112
24.2.1.2.9	Method 9: Synthesis of Enynes by Sonogashira Coupling .....	112
24.2.1.2.10	Method 10: Intramolecular Cyclization for Fused Carbocycles and Heterocycles .....	113
24.2.1.2.11	Method 11: Synthesis of Alkynes .....	116
24.2.1.2.11.1	Variation 1: Synthesis of 1-Haloalk-1-ynes .....	116
24.2.1.2.11.2	Variation 2: Synthesis of 1,3-Diynes .....	117
24.2.1.2.12	Method 12: Synthesis of Oligohaloalkanes by Addition to Oligohaloalk-1-enes .....	117
24.2.1.2.13	Method 13: Addition of Alcohols .....	118
24.2.1.2.14	Method 14: Synthesis of Esters .....	120
24.2.1.2.14.1	Variation 1: Synthesis of Esters by Reaction with Alkoxides .....	120
24.2.1.2.14.2	Variation 2: Synthesis of Esters by Mukaiyama-Type Condensation of Acetals .....	120
24.2.1.2.15	Method 15: [2 + 1], [2 + 2], [2 + 3], and [2 + 4] Cycloadditions .....	121
24.2.2	<b>Product Subclass 2: 1-Halo-1-(organooxy)alk-1-enes</b> A. P. Molchanov and R. R. Kostikov	
24.2.2	<b>Product Subclass 2: 1-Halo-1-(organooxy)alk-1-enes</b> .....	129
24.2.2.1	Synthesis of Product Subclass 2 .....	129
24.2.2.1.1	Method 1: Substitution of Hydrogen for Halogen .....	129
24.2.2.1.2	Method 2: Substitution of Halogen for Oxygen .....	129
24.2.2.1.2.1	Variation 1: From 1,1-Dihaloalk-1-enes with a Hydrogen Atom in the $\alpha$ -Position .....	130
24.2.2.1.2.2	Variation 2: From 1,1,2-Trihaloalk-1-enes without a Hydrogen Atom in the $\alpha$ -Position .....	131
24.2.2.1.3	Method 3: Elimination of Hydrogen Halides or Halogens .....	132
24.2.2.1.4	Method 4: Decarboxylation or Elimination of Carbonyl Difluoride .....	134
24.2.2.1.5	Method 5: Addition of Oxygen Nucleophiles to 1-Haloalk-1-ynes .....	136
24.2.2.1.6	Method 6: Addition of Hydrogen Halides to 1-Alkoxyalk-1-ynes .....	136
24.2.2.1.7	Method 7: Addition of Phosgene to 1-Alkoxyalk-1-ynes .....	137
24.2.2.1.8	Method 8: Addition of Halogens to 1-(Organooxy)alk-1-ynes .....	138

24.2.2.1.9	Method 9:	Addition of Heteroelement Halides to 1-(Organooxy)alk-1-yne	139
24.2.2.1.9.1	Variation 1:	Addition of Boron Halides	139
24.2.2.1.9.2	Variation 2:	Addition of Carbon, Silicon, Germanium, and Tin Halides	140
24.2.2.1.9.3	Variation 3:	Addition of Phosphorus Halides	140
24.2.2.1.9.4	Variation 4:	Addition of Sulfur Halides	142
24.2.2.1.9.5	Variation 5:	Addition of Mercury(II) Chloride	143
24.2.2.1.10	Method 10:	Addition of Carbonyl Compounds to 1-Halo- or 1-Alkoxyalk-1-yne	143
24.2.2.1.11	Method 11:	O-Acylation of Acyl Halides or Aldehydes	143
24.2.2.2	Applications of Product Subclass 2 in Organic Synthesis		145
24.2.2.2.1	Method 1:	Thermolysis	145
24.2.2.2.2	Method 2:	Substitution of Halogen	145
24.2.2.2.3	Method 3:	Elimination of Hydrogen Halides	148
24.2.2.2.4	Method 4:	Elimination of Halogens	149
24.2.2.2.5	Method 5:	Addition of Mineral Acids, Halogens, and Water	150
24.2.2.2.6	Method 6:	Addition of Alcohols, Phenols, and Amines	153
24.2.2.2.7	Method 7:	Addition of Carboxylic Acids and Their Derivatives	155
24.2.2.2.8	Method 8:	Radical Addition	157
24.2.2.2.9	Method 9:	Addition of Alkyl Hypofluorites	157
24.2.2.2.10	Method 10:	Addition of Sulfur-Containing Reagents	158
24.2.2.2.11	Method 11:	Cycloadditions	159
24.2.2.2.11.1	Variation 1:	[2 + 1] Cycloadditions	159
24.2.2.2.11.2	Variation 2:	[2 + 2] Cycloadditions	159
24.2.2.2.11.3	Variation 3:	Synthesis of Heterocyclic Compounds	160
24.2.2.2.12	Method 12:	Rearrangements	161
24.2.3	<b>Product Subclass 3: 1-Halo-1-(organochalcogeno)alk-1-enes</b>		
	A. F. Khlebnikov and R. R. Kostikov		
24.2.3	<b>Product Subclass 3: 1-Halo-1-(organochalcogeno)alk-1-enes</b>		167
24.2.3.1	Synthesis of Product Subclass 3		167
24.2.3.1.1	Method 1:	Substitution of Metal for Halogen	167
24.2.3.1.2	Method 2:	Substitution of Halogen for Chalcogen	170
24.2.3.1.3	Method 3:	Substitution of Oxygen for Halogen	175
24.2.3.1.4	Method 4:	Elimination of Hydrogen Halides or Halogens	176
24.2.3.1.5	Method 5:	Wittig-Type Reactions	180
24.2.3.1.6	Method 6:	Miscellaneous Eliminations	185
24.2.3.1.7	Method 7:	Addition of Hydrogen Halides to Alk-1-yne	188
24.2.3.1.8	Method 8:	Addition of Halogens to Alk-1-yne	190
24.2.3.1.9	Method 9:	Addition of Heteroelement Halides to Alk-1-yne	191
24.2.3.1.10	Method 10:	Miscellaneous Additions to Alk-1-yne	193
24.2.3.1.11	Methods 11:	Miscellaneous Reactions	195
24.2.3.2	Applications of Product Subclass 3 in Organic Synthesis		196
24.2.3.2.1	Method 1:	Substitution of Halogen by Hydrogen, Deuterium, or a Metal	197
24.2.3.2.2	Method 2:	Substitution of a Halogen for a Carbon Group	199

24.2.3.2.3	Method 3:	Substitution of a Halogen for a Heteroatom Group	204
24.2.3.2.4	Method 4:	Substitution of a Sulfonyl Group	207
24.2.3.2.5	Method 5:	Elimination Reactions	208
24.2.3.2.6	Method 6:	Addition Reactions	210
24.2.3.2.7	Method 7:	Cyclizations	213
24.2.3.2.8	Methods 8:	Miscellaneous Reactions	217
<b>24.2.4</b>	<b>Product Subclass 4: 1-Nitrogen-Functionalized 1-Haloalk-1-enes</b>		
	J. G. Schantl		
<b>24.2.4</b>	<b>Product Subclass 4: 1-Nitrogen-Functionalized 1-Haloalk-1-enes</b>		<b>223</b>
24.2.4.1	Synthesis of Product Subclass 4		223
24.2.4.1.1	1-Haloalk-1-en-1-amines		223
24.2.4.1.1.1	Method 1:	1,2-Dehydrohalogenation of 1,2-Dihaloalk-1-amines	223
24.2.4.1.1.1.1	Variation 1:	1,2-Dehydrobromination of Oligohalogenated <i>N,N</i> -Bis(trifluoromethyl)ethanamines	223
24.2.4.1.1.1.2	Variation 2:	1,2-Dehydrochlorination of 1-(1,2,2,2-Tetrachloroethyl)- pyridinium Chloride	224
24.2.4.1.1.2	Method 2:	1,2-Dehalogenation	224
24.2.4.1.1.3	Method 3:	Monosubstitution of 1,1-Dihaloalk-1-enes by Nitrogen Nucleophiles	225
24.2.4.1.1.3.1	Variation 1:	Nucleophilic Substitution of Vinylic Fluorine by Amide Anions	225
24.2.4.1.1.3.2	Variation 2:	Nucleophilic Substitution of 1,1-Difluoroalk-1-enes by Amines	225
24.2.4.1.1.3.3	Variation 3:	Nucleophilic Substitution of 2,2-Dichlorovinyl Ketones	226
24.2.4.1.1.3.4	Variation 4:	Substitution of Vinylic Bromine or Chlorine by Amines	226
24.2.4.1.1.3.5	Variation 5:	Nucleophilic Monosubstitution of Vinylic Chlorine by Amines	227
24.2.4.1.1.3.6	Variation 6:	Nucleophilic Monosubstitution of Vinylic Chlorine by Amides	228
24.2.4.1.1.3.7	Variation 7:	Nucleophilic Monosubstitution of Vinylic Chlorine by Heterocyclic Amides	229
24.2.4.1.1.3.8	Variation 8:	Nucleophilic Monosubstitution of a Vinylic Chlorine by Nucleic Acid Bases and Related Heterocycles	230
24.2.4.1.1.3.9	Variation 9:	Nucleophilic Monosubstitution of a Vinylic Chlorine by Lithium Diisopropylamide	231
24.2.4.1.1.4	Method 4:	Nucleophilic Addition of a Nitrogen Functionality to 1-Haloalk-1-yne	231
24.2.4.1.1.4.1	Variation 1:	Addition of Nitrogen Nucleophiles to 1-Haloalk-1-yne	231
24.2.4.1.1.4.2	Variation 2:	Nucleophilic Addition of Dimethyl Hydrazine-1,2-dicarboxylate to Dichloroacetylene	232
24.2.4.1.1.4.3	Variation 3:	Nucleophilic Addition of Amines to Dichloroacetylene	232
24.2.4.1.1.5	Method 5:	Addition of Hydrogen Halides or Halide Anions to Ynamines or <i>N</i> -Ynecarboxamides	232
24.2.4.1.1.5.1	Variation 1:	Addition of Hydrogen Halides to <i>N,N</i> -Dimethylalk-1-yn-1-amines	232
24.2.4.1.1.5.2	Variation 2:	Addition of Hydrogen Halides to 1-Acyl- <i>N,N</i> -dialkylalk- 1-en-3-yn-4-amines	233

24.2.4.1.1.5.3	Variation 3:	Hydrohalogenation of <i>N</i> -Alk-1-ynylcarboxamides with Magnesium Halides .....	233
24.2.4.1.1.5.4	Variation 4:	Addition of <i>N,N</i> -Diethyl-2-(trimethylstannyl)acetylen-1-amine to 2-(Chloromethylene)malononitrile .....	235
24.2.4.1.1.6	Method 6:	Treatment of Carboxamides with Phosphoryl Chloride .....	235
24.2.4.1.1.7	Method 7:	Transformation of Imidoyl Chlorides or of Amides via Imidoyl Chlorides .....	236
24.2.4.1.1.7.1	Variation 1:	Conversion of <i>N,N</i> -Disubstituted Amides .....	236
24.2.4.1.1.7.2	Variation 2:	Isomerization of Imidoyl Chlorides .....	238
24.2.4.1.1.7.3	Variation 3:	Conversion of Imidoyl Chlorides with Trialkyl Phosphites (Aza-Perkow Reaction) .....	238
24.2.4.1.1.7.4	Variation 4:	Nucleophilic Substitution of <i>N</i> -(Dichloromethylene)- <i>N,N</i> -dimethyliminium Chloride by an In Situ Generated Allyl Anion Intermediate .....	239
24.2.4.1.1.7.5	Variation 5:	Nucleophilic Substitution of <i>N</i> -(Dichloromethylene)- <i>N,N</i> -dimethyliminium Chloride by an In Situ Generated Enamine Intermediate .....	239
24.2.4.1.1.8	Method 8:	Synthesis from Nitriles (via Ketenimine Intermediates) .....	240
24.2.4.1.1.8.1	Variation 1:	Addition of Hydrogen Halides to Dicyanoacetates .....	240
24.2.4.1.1.8.2	Variation 2:	Addition of Hydrogen Halides to Tri- and Tetracyanomethanes .....	241
24.2.4.1.1.8.3	Variation 3:	Addition of Hydrogen Halides to 2-(1-Hydroxyalkylidene)-malononitriles .....	241
24.2.4.1.1.8.4	Variation 4:	Addition of Hydrogen Chloride to 2-Sulfonyl-Substituted Malononitriles .....	242
24.2.4.1.1.8.5	Variation 5:	Addition of Hydrogen Halides to 2-[2-(Dicyanomethylene)-hydrazino]malononitrile .....	242
24.2.4.1.1.8.6	Variation 6:	Addition of Hydrogen Chloride to Ethane-1,1,2,2-tetracarboxitrile .....	242
24.2.4.1.1.8.7	Variation 7:	Addition of Liquid Hydrogen Bromide to Malononitrile .....	243
24.2.4.1.1.8.8	Variation 8:	Reaction of Hydrogen Chloride with Nitriles Containing an $\alpha$ -Hydrogen To Form [2 + 2] Adducts .....	243
24.2.4.1.1.8.9	Variation 9:	Phosphorus Halide Addition to Oligocyanomethanes .....	245
24.2.4.1.1.8.10	Variation 10:	Addition of Sulfur Chlorides to Oligocyanomethanes .....	245
24.2.4.1.1.9	Method 9:	Conversion of Ketenimines .....	246
24.2.4.1.1.9.1	Variation 1:	Thermal Rearrangement of Vinyl Azides to Ketenimine Intermediates .....	246
24.2.4.1.1.9.2	Variation 2:	Addition of Chlorine to a Ketenimine .....	246
24.2.4.1.1.10	Methods 10:	Miscellaneous Reactions .....	247
24.2.4.1.1.10.1	Variation 1:	Iodolysis of In Situ Generated Amino-Substituted Titanacyclopentadienes .....	247
24.2.4.1.1.10.2	Variation 2:	Rearrangement of a Heterocyclic Azide .....	248
24.2.4.1.1.10.3	Variation 3:	Rearrangement of an Alkyl Azide in the Presence of an Alkyne .....	248
24.2.4.1.1.10.4	Variation 4:	Pyrolysis of 1,2,3,3,4,4-Hexafluoro- <i>N,N,N',N'</i> -tetrakis-(trifluoromethyl)cyclobutane-1,2-diamine .....	248
24.2.4.1.1.11	Method 11:	Transformation of 1-Nitrogen-Functionalized 1-Haloalk-1-enes into 1-Haloalk-1-en-1-amines and Derivatives .....	249

<b>24.2.4.1.1.11.1</b>	Variation 1:	Reactions Involving the Nitrogen Functionality of 1-Nitrogen-Functionalized 1-Haloalk-1-enes: Conversion into Amines .....	249
<b>24.2.4.1.1.11.2</b>	Variation 2:	Derivatization Reactions at a Remote Site of the Nitrogen Moiety .....	251
<b>24.2.4.1.1.11.3</b>	Variation 3:	Halogen Exchange at C1 .....	251
<b>24.2.4.1.1.11.4</b>	Variation 4:	Remote Reaction at C2 .....	252
<b>24.2.4.2</b>		1-Halo-1-iminoalk-1-enes (3-Halo-2-azabuta-1,3-dienes) .....	252
<b>24.2.4.2.1</b>	Method 1:	1,2-Dehydrohalogenation .....	252
<b>24.2.4.2.2</b>	Method 2:	1,2-Dehalogenation .....	253
<b>24.2.4.2.3</b>	Method 3:	Nucleophilic Substitution of Vinylic Fluorine by Imines .....	253
<b>24.2.4.2.4</b>	Method 4:	Treatment of Acylureas with Phosphorus Chlorides .....	254
<b>24.2.4.2.4.1</b>	Variation 1:	Conversion of <i>N</i> -Acetylureas .....	254
<b>24.2.4.2.4.2</b>	Variation 2:	Conversion of <i>N</i> -Acylureas .....	254
<b>24.2.4.2.5</b>	Method 5:	1,4-Dehydrochlorination of <i>N</i> -Alkyl-Substituted $\alpha$ -Chloroimidoyl Chlorides .....	255
<b>24.2.4.2.6</b>	Method 6:	Addition of Ketenimines to Chloroiminium Chlorides .....	256
<b>24.2.4.2.7</b>	Method 7:	Wittig-Type Condensation .....	256
<b>24.2.4.2.8</b>	Method 8:	Transformation of 1-Nitrogen-Functionalized 1-Haloalk-1-enes into 1-Halo-1-iminoalk-1-enes .....	256
<b>24.2.4.2.8.1</b>	Variation 1:	Reactions Involving the Nitrogen Functionality of 1-Nitrogen-Functionalized 1-Haloalk-1-enes .....	256
<b>24.2.4.2.8.2</b>	Variation 2:	Derivatization Reactions at Remote Sites at C2 and in the Imine Moiety .....	257
<b>24.2.4.2.8.3</b>	Variation 3:	Remote Reactions at C2 .....	257
<b>24.2.4.2.8.4</b>	Variation 4:	Reaction of Isothiocyanates with Triethyl Phosphite .....	258
<b>24.2.4.3</b>		1-Halo-1-isocyanatoalk-1-enes .....	258
<b>24.2.4.3.1</b>	Method 1:	1,2-Dehydrochlorination .....	258
<b>24.2.4.3.2</b>	Method 2:	1,2-Debromination .....	258
<b>24.2.4.3.3</b>	Method 3:	Synthesis from Carbamates .....	259
<b>24.2.4.3.4</b>	Method 4:	Synthesis from Nitriles .....	259
<b>24.2.4.3.5</b>	Method 5:	Synthesis by Curtius Reaction .....	259
<b>24.2.4.3.6</b>	Methods 6:	Miscellaneous Reactions .....	260
<b>24.2.4.4</b>		1-Halo-1-isothiocyanatoalk-1-enes .....	260
<b>24.2.4.4.1</b>	Method 1:	$\alpha$ -Halogenation of Alkyl Isothiocyanates .....	260
<b>24.2.4.4.2</b>	Method 2:	Nucleophilic Substitution of Vinylic Fluorine by Thiocyanate Anion .....	261
<b>24.2.4.5</b>		1-Haloalk-1-enyl Isocyanides .....	261
<b>24.2.4.5.1</b>	Method 1:	1,2-Dehydrohalogenation .....	261
<b>24.2.4.5.2</b>	Method 2:	1,2-Dehalogenation .....	261
<b>24.2.4.5.2.1</b>	Variation 1:	1,2-Dechlorination of (1,1,2,2-Tetrachloroalkyl isocyanide)- and (1,2-Dichloro-1,1,2,2-pentahaloethyl isocyanide)- chromium Complexes .....	261
<b>24.2.4.5.2.2</b>	Variation 2:	1,2-Dechlorination of (1,2-Dichlorooligothaloethyl isocyanide)- chromium Complexes .....	262

24.2.4.5.3	Method 3:	Horner–Wadsworth–Emmons Reaction	262
24.2.4.5.4	Method 4:	Derivatization of 1-Haloalk-1-enyl Isocyanides with Retention of the Functional Group	263
24.2.4.5.4.1	Variation 1:	Nucleophilic Substitution at C2	263
24.2.4.5.4.2	Variation 2:	Remote Reactions at the Nitrogen Moiety	264
24.2.4.6		1-Haloalk-1-enyldiazenes (1-Halo-1-diazenylalk-1-enes)	264
24.2.4.6.1	Method 1:	1,4-Elimination of Hydrogen Halides from $\alpha$ -Halohydrazoneyl Halides	264
24.2.4.6.1.1	Variation 1:	1,4-Dehydrofluorination of <i>N</i> -Phenylperfluoroalkanehydrazoneyl Fluorides	264
24.2.4.6.1.2	Variation 2:	1,4-Dehydrohalogenation of $\alpha$ -Chlorohydrazoneyl Chlorides	265
24.2.4.6.2	Method 2:	Reaction of $\beta$ -Functionalized $\alpha$ -Halohydrazoneyl Halides	265
24.2.4.6.3	Method 3:	1,2-Dehydrohalogenation of 2-Alkyl-1-(1,2-dihaloalkyl)-diazene 1-Oxides	266
24.2.4.6.4	Method 4:	Azo Coupling onto Activated Halomethyl Groups	267
24.2.4.6.4.1	Variation 1:	Coupling of Diazonium Salts with Halomethyl-Substituted Hetareneium Salts	267
24.2.4.6.4.2	Variation 2:	Azo Coupling of $\alpha$ -Chloro Ketones	267
24.2.4.6.5	Method 5:	Nucleophilic Substitution of Vinyl Halides by Nitrogen Nucleophiles	267
24.2.4.6.6	Method 6:	Nucleophilic Substitution of Chlorine in Carbonohydrazone Dichlorides	268
24.2.4.7		1-Azido-1-haloalk-1-enes	268
24.2.4.7.1	Method 1:	Nucleophilic Substitution of Vinylic Fluorine	268
24.2.4.8		1-Halo-1-nitroalk-1-enes	269
24.2.4.8.1	Method 1:	1,2-Elimination of Hydrogen Halides	269
24.2.4.8.1.1	Variation 1:	1,2-Dehydrohalogenation of 1,2-Dihalo-1-nitroalkanes	269
24.2.4.8.1.2	Variation 2:	1,2-Dehydrobromination of 1,2-Dibromo-1-nitroalkanes	270
24.2.4.8.1.3	Variation 3:	1,2-Dehydrochlorination of 1,2-Dichloro-1-nitroalkanes	272
24.2.4.8.1.4	Variation 4:	1,2-Dehydrochlorination of 1,2,2-Trichloro-1-nitroethane	272
24.2.4.8.1.5	Variation 5:	1,2-Dehydration of 2-Bromo-2-nitroethanol	273
24.2.4.8.1.6	Variation 6:	1,2-Elimination of Nitrous Acid from a 1-Fluoro-2,2-dinitroalkane	273
24.2.4.8.2	Method 2:	Introduction of a Nitro Group	274
24.2.4.8.2.1	Variation 1:	By Displacement of Bromine	274
24.2.4.8.2.2	Variation 2:	By Nitration	274
24.2.4.8.3	Method 3:	Iodonitration of Silylacetylenes	275
24.2.4.8.4	Method 4:	C=C Bond Formation by Condensation of Halonitromethanes with Carbonyl Compounds	275
24.2.4.8.4.1	Variation 1:	Condensation of Bromonitromethane with Aromatic Aldehydes	275
24.2.4.8.4.2	Variation 2:	Condensation of Halonitromethanes with Aromatic and Heteroaromatic Aldehydes	276
24.2.4.8.4.3	Variation 3:	Condensation of Bromonitromethane with an <i>N</i> -Alkylbenzaldimine	277

24.2.4.8.4.4	Variation 4: Condensation of Bromonitromethane with Triethyl Orthoformate .....	277
24.2.4.8.5	Method 5: Pyrolysis .....	278
24.2.4.8.6	Method 6: Derivatization Reactions of 1-Halo-1-nitroalk-1-enes .....	278
24.2.4.8.6.1	Variation 1: Nucleophilic Substitution at C2 .....	278
24.2.4.8.6.2	Variation 2: Nucleophilic Substitution at C4 of 1,1,4-Trichloro-2,4-dinitrobuta-1,3-diene .....	279
24.2.5	<b>Product Subclass 5: 1-Phosphorus-Functionalized 1-Haloalk-1-enes</b> M. Stankević and K. M. Pietrusiewicz	
24.2.5	<b>Product Subclass 5: 1-Phosphorus-Functionalized 1-Haloalk-1-enes</b> .....	285
24.2.5.1	Synthesis of Product Subclass 5 .....	285
24.2.5.1.1	Method 1: Synthesis from 1,1-Dihaloalkenes .....	285
24.2.5.1.2	Method 2: Synthesis from Alkynes .....	286
24.2.5.1.3	Method 3: Synthesis from 1-Phosphorus-Functionalized 1-Haloalkanes and Carbonyl Compounds .....	287
24.2.5.1.3.1	Variation 1: By the Horner–Wadsworth–Emmons Reaction .....	287
24.2.5.1.3.2	Variation 2: By Peterson Alkenation .....	288
24.2.5.1.3.3	Variation 3: By Condensation .....	288
24.2.5.2	Applications of Product Subclass 5 in Organic Synthesis .....	289
24.2.6	<b>Product Subclass 6: 1,1-Bis(organooxy)alk-1-enes</b> C. Schneider	
24.2.6	<b>Product Subclass 6: 1,1-Bis(organooxy)alk-1-enes</b> .....	293
24.2.6.1	Synthesis of Product Subclass 6 .....	295
24.2.6.1.1	Method 1: Elimination from 2-Halo Acetals .....	295
24.2.6.1.1.1	Variation 1: Phase-Transfer-Catalyzed Elimination from 2-Halo Acetals ..	296
24.2.6.1.1.2	Variation 2: Ultrasound-Accelerated Elimination from 2-Halo Acetals ..	296
24.2.6.1.1.3	Variation 3: Elimination from 2-Bromo Peracetyl Glycosides .....	296
24.2.6.1.1.4	Variation 4: Elimination from 2-Selanyl Acetals .....	297
24.2.6.1.2	Method 2: Elimination from Ortho Esters .....	297
24.2.6.1.2.1	Variation 1: Acid-Catalyzed Elimination from In Situ Formed Ortho Esters	298
24.2.6.1.3	Method 3: O-Heteroacylation of Ester Enolates .....	299
24.2.6.1.4	Method 4: O-Alkylation of Ester Enolates .....	300
24.2.6.1.5	Method 5: Alkenation of Carbonates with Transition Metal–Carbene Complexes .....	301
24.2.6.1.6	Method 6: Horner–Wittig Alkenation of Carbonyl Compounds .....	302
24.2.6.1.7	Method 7: Nucleophilic Addition to Alkoxyalkynes .....	303
24.2.6.1.8	Method 8: Nucleophilic Addition to 1,1-Dihaloalk-1-enes .....	303
24.2.6.1.9	Method 9: Decarboxylation of $\beta$ -Lactones .....	304
24.2.6.2	Applications of Product Subclass 6 in Organic Synthesis .....	305
24.2.6.2.1	Method 1: Alkylation and Arylation of Ketene O,O-Acetals .....	305
24.2.6.2.1.1	Variation 1: Lewis Acid Catalyzed Arylation of Ketene O,O-Acetals .....	306

24.2.6.2.2	Method 2:	Acylation of Ketene <i>O,O</i> -Acetals	306
24.2.6.2.3	Method 3:	Bromination of Ketene <i>O,O</i> -Acetals	307
24.2.6.2.4	Method 4:	Silylation of Ketene <i>O,O</i> -Acetals	308
24.2.6.2.5	Method 5:	Reaction of Ketene <i>O,O</i> -Acetals with Diazo Compounds	309
24.2.6.2.6	Method 6:	Dihydroxylation of Ketene <i>O,O</i> -Acetals	310
24.2.6.2.7	Method 7:	[2 + 2] Cycloadditions of Ketene <i>O,O</i> -Acetals with Carbonyl Compounds	311
24.2.6.2.7.1	Variation 1:	Lewis Acid Catalyzed [2 + 2] Cycloadditions	312
24.2.6.2.7.2	Variation 2:	High-Pressure-Promoted [2 + 2] Cycloadditions with Carbonyl Compounds	313
24.2.6.2.8	Method 8:	[2 + 2] Cycloadditions of Ketene <i>O,O</i> -Acetals with Electron-Deficient Alkenes	313
24.2.6.2.8.1	Variation 1:	Thermal [2 + 2] Cycloadditions	314
24.2.6.2.8.2	Variation 2:	Lewis Acid Catalyzed [2 + 2] Cycloadditions	315
24.2.6.2.8.3	Variation 3:	[2 + 2] Cycloadditions with 2-Halo-1,4-quinones	315
24.2.6.2.9	Method 9:	[4 + 2] Cycloadditions of Ketene <i>O,O</i> -Acetals with Electron-Deficient Heterodienes	316
24.2.6.2.10	Method 10:	[4 + 2] Cycloadditions of Ketene <i>O,O</i> -Acetals with Electron-Deficient Dienes	318
24.2.6.2.11	Method 11:	1,3-Dipolar Cycloadditions of Ketene <i>O,O</i> -Acetals	319
24.2.7	<b>Product Subclass 7: 1-(Organooxy)-1-(organosulfanyl)alk-1-enes</b> W. Dölling		
24.2.7	<b>Product Subclass 7: 1-(Organooxy)-1-(organosulfanyl)alk-1-enes</b>		323
24.2.7.1	Synthesis of Product Subclass 7		323
24.2.7.1.1	Method 1:	1-(Organooxy)-1-(organosulfanyl)alk-1-enes from Acylated Ketene Acetals	323
24.2.7.1.2	Method 2:	1-(Organooxy)-1-(organosulfanyl)alk-1-enes by Addition of Sodium Alkanethiolates to Either Ethoxyacetylene or Phenoxyacetylene	324
24.2.7.1.3	Method 3:	1-(Organooxy)-1-(organosulfanyl)alk-1-enes by Alkylation of <i>O</i> -Alkyl Thiocarboxylates	324
24.2.7.1.4	Method 4:	2-Alkylidene-1,3-oxathiolanes from the Anions of Alkyl Thiocarboxylates and 4-Toluenesulfonates	325
24.2.7.1.5	Method 5:	1-(Organooxy)-1-(organosulfanyl)alk-1-enes from Carbonyl Compounds	326
24.2.7.1.5.1	Variation 1:	From Aldehydes or Ketones by Horner–Emmons Reactions	326
24.2.7.1.5.2	Variation 2:	From Ketones by the Peterson Reaction	326
24.2.7.1.6	Method 6:	1-(Organooxy)-1-(organosulfanyl)alk-1-enes by Treatment of Sulfanylacetylenes with 4-Toluenesulfonic Acid	328
24.2.7.1.7	Method 7:	1-(Organooxy)-1-(organosulfanyl)alk-1-enes from Ketene Dithioacetals	328
24.2.7.1.8	Method 8:	1-(Organooxy)-1-(organosulfanyl)alk-1-enes by Other Routes	329

<b>24.2.8</b>	<b>Product Subclass 8: 1-(Organooxy)-1-(organoselanyl)- and 1-(Organooxy)-1-(organotellanyl)alk-1-enes</b> W. Dölling	
<hr/>		
<b>24.2.8</b>	<b>Product Subclass 8: 1-(Organooxy)-1-(organoselanyl)- and 1-(Organooxy)-1-(organotellanyl)alk-1-enes</b> .....	331
<b>24.2.8.1</b>	Synthesis of Product Subclass 8 .....	331
<b>24.2.8.1.1</b>	Method 1: Synthesis from Selenoates or Telluroates .....	331
<b>24.2.8.1.1.1</b>	Variation 1: Se-Alkylation of <i>O</i> -Alkyl Selenoates .....	331
<b>24.2.8.1.1.2</b>	Variation 2: <i>O</i> -Silylation of Se-Phenyl or Se-Methyl 2-Methylpropane-selenoates and <i>Te</i> -Butyl Diphenylethanetelluroate .....	332
<b>24.2.8.1.1.3</b>	Variation 3: Reaction of Halogenated Esters and Carbamates .....	332
<b>24.2.8.1.2</b>	Method 2: Addition of 4-Toluenesulfonic Acid to 1-(Phenylselanyl)alk-1-ynes .....	333
<b>24.2.8.1.3</b>	Method 3: Synthesis from Oxygen Heterocycles .....	333
<b>24.2.9</b>	<b>Product Subclass 9: 1-Nitrogen-Functionalized 1-(Organooxy)alk-1-enes (Ketene <i>O,N</i>-Acetals)</b> W. Kantlehner	
<hr/>		
<b>24.2.9</b>	<b>Product Subclass 9: 1-Nitrogen-Functionalized 1-(Organooxy)alk-1-enes (Ketene <i>O,N</i>-Acetals)</b> .....	337
<b>24.2.9.1</b>	Synthesis of Product Subclass 9 .....	337
<b>24.2.9.1.1</b>	Method 1: Synthesis from Dimethyl 3-Oxopentanedioate and Ortho Amide Derivatives of Alkyne-carboxylic Acids .....	337
<b>24.2.9.1.2</b>	Method 2: Synthesis from Oxazoles and Their Derivatives and Isocyanates .....	337
<b>24.2.9.1.3</b>	Method 3: Synthesis from $\beta$ -Dicarbonyl Compounds and Isocyanates .....	338
<b>24.2.9.1.4</b>	Method 4: Synthesis from Aldehydes and Activated Isocyanates .....	338
<b>24.2.9.1.5</b>	Method 5: Synthesis from 2-Alkyloxazolium Salts .....	339
<b>24.2.9.1.6</b>	Method 6: Synthesis from Alkyl Carboximidates and Ethyl 2-Cyano-3-ethoxyacrylate .....	339
<b>24.2.9.1.7</b>	Method 7: Synthesis from Oxazoles and Their Derivatives by Self-Condensation .....	340
<b>24.2.9.1.8</b>	Method 8: Synthesis from 2-Alkyloxazoles and Halogens .....	340
<b>24.2.9.1.9</b>	Method 9: Synthesis from 3-Iodo-4 <i>H</i> -1-benzopyran-4-one and Piperidine .....	341
<b>24.2.9.1.10</b>	Method 10: Synthesis from 5-(Ethoxymethylene)-1,3-bis(2-methoxyphenyl)thiobarbituric Acid .....	341
<b>24.2.9.1.11</b>	Method 11: Synthesis from 4-Halo- $\beta$ -oxo Esters and Isocyanates .....	342
<b>24.2.9.1.12</b>	Method 12: Synthesis from Carboxamides by Alkylation .....	342
<b>24.2.9.1.13</b>	Method 13: Synthesis from 3-Aminoalk-2-enenitriles and Alcohols or Phenols .....	345
<b>24.2.9.1.14</b>	Method 14: Synthesis from 5-(4-Chloro-5 <i>H</i> -1,2,3-dithiazol-5-ylidene)-2,2-dimethyl-1,3-dioxane-4,6-dione .....	345
<b>24.2.9.1.15</b>	Method 15: Synthesis from Oligohaloalkane Derivatives by Substitution and Concomitant Dehydrohalogenation .....	346

24.2.9.1.16	Method 16:	Synthesis from 1,1-Dihaloalkenes and Related Compounds	346
24.2.9.1.17	Method 17:	Synthesis from $\beta$ -Bromoamines	350
24.2.9.1.18	Method 18:	Synthesis from Ketene <i>O,O</i> -Acetals	350
24.2.9.1.19	Method 19:	Synthesis from $\alpha$ -Phosphoryl Thioamide Derivatives	353
24.2.9.1.20	Method 20:	Synthesis from <i>O,O</i> -Dialkyl Dithiomalonates or Thiomalonic Acid <i>O</i> -Ester Nitriles and Amines	354
24.2.9.1.21	Method 21:	Synthesis from Iminocarbonic <i>O,S</i> -Esters	357
24.2.9.1.22	Method 22:	Synthesis from Benzoxazole-2-thiones	358
24.2.9.1.23	Method 23:	Synthesis from Ketene <i>S,S</i> -Acetals	358
24.2.9.1.24	Method 24:	Synthesis from Ketene <i>S,N</i> -Acetals	360
24.2.9.1.25	Method 25:	Synthesis from Ketene <i>N,N</i> -Acetals	363
24.2.9.1.26	Method 26:	Deprotonation of Alkoxy(alkyl)(dialkylamino)carbenium Salts (Iminium Salts)	364
24.2.9.1.27	Method 27:	Elimination of Hydrogen Halides, Alcohols, or Sulfonic Acids from $\alpha$ -Halo or $\alpha$ -Oxy Aldehyde <i>O,N</i> -Acetals	370
24.2.9.1.28	Method 28:	Elimination of Alcohols or Amines from Amide <i>O,O</i> -Acetals or Ester <i>N,N</i> -Acetals	372
24.2.9.1.29	Method 29:	Addition to 3-Oxocarboxylic Acid Derivatives	375
24.2.9.1.30	Method 30:	Addition of CH-Acidic Compounds to Dialkoxy(amino)-carbenium Salts, Dialkoxy(diamino)methanes, (Trialkoxy)-aminomethanes, and Alkoxy(alkylsulfanyl)aminocarbenium Salts	375
24.2.9.1.31	Method 31:	Addition of CH-Acidic Compounds to Imidocarbonates	379
24.2.9.1.32	Method 32:	Addition of CH-Acidic Compounds to Alkyl or Aryl Cyanates	380
24.2.9.1.33	Method 33:	Synthesis from Carbonyl Compounds and Barbituric Acid Derivatives	382
24.2.9.1.34	Method 34:	Synthesis from $\alpha,\beta$ -Unsaturated Carbonyl Compounds and Malononitrile or Alkyl Cyanoacetates	382
24.2.9.1.35	Method 35:	Synthesis from Alkyl Methylenecyanoacetates or Methylenemalononitriles and Hydroxyarenes, Hydroxyhetarenes, or Enolizable Ketones	383
24.2.9.1.36	Method 36:	Synthesis from Isocyanides by Multicomponent Reactions	390
24.2.9.1.37	Method 37:	Synthesis from Furan-2,3-diones	391
24.2.9.1.38	Method 38:	Synthesis from 2-(Alk-1-enyl)oxazole Derivatives by Cycloaddition Reactions	392
24.2.9.1.39	Method 39:	Synthesis from Vinyliminophosphoranes	393
24.2.9.1.40	Method 40:	Synthesis from Nitriles and Alcohols	393
24.2.9.1.41	Method 41:	Synthesis from Ketenes	400
24.2.9.1.42	Method 42:	Synthesis from Ketenimines	402
24.2.9.1.43	Method 43:	Synthesis from 1-Alkoxyalk-1-yne	403
24.2.9.1.44	Method 44:	Synthesis from Alk-1-yn-1-amines	404
24.2.9.1.45	Method 45:	Rearrangement of Cyclobuta-1,3-diene-2,4-diamines	407
24.2.9.1.46	Method 46:	Synthesis from Oxazoles or Isoxazolium Salts	407
24.2.9.1.47	Method 47:	Synthesis from 2,6-Dialkoxyppyridines and Electron-Rich Alkenes	408
24.2.9.1.48	Method 48:	Synthesis from 2-Amino-4,5-dihydrothiophene-3-carbonitriles and Dibenzoyldiazomethane	408
24.2.9.1.49	Method 49:	Synthesis from <i>N</i> -Hydroxyamines	409

24.2.9.1.50	Method 50:	Synthesis by Transformation with Retention of the Functional Group .....	410
24.2.9.1.51	Method 51:	Reaction in the Ene Moiety with Formation of New C—C Bonds	410
24.2.9.1.51.1	Variation 1:	Substitution of the $\beta$ -Hydrogen Atom by 2,4,6-Trichloro-1,3,5-triazine, Ortho Esters, Methyleneamalononic Acid Derivatives, Trimethylsilyl Trifluoromethanesulfonate, and Dialkyl Imidodithiocarbonates .....	411
24.2.9.1.51.2	Variation 2:	Substitution of the $\beta$ -Hydrogen Atom by Isocyanates and Isothiocyanates .....	412
24.2.9.1.51.3	Variation 3:	Substitution of the $\beta$ -Hydrogen Atom by Ketenes and Ketene Dimers .....	414
24.2.9.1.51.4	Variation 4:	Substitution of the $\beta$ -Hydrogen Atom by $\alpha,\beta$ -Unsaturated Carboxylic Acid Derivatives .....	414
24.2.9.1.51.5	Variation 5:	From Ortho Amide Derivatives as Precursors .....	414
24.2.9.1.51.6	Variation 6:	Substitution of the $\beta$ -Hydrogen Atom by Alkynes .....	415
24.2.9.1.51.7	Variation 7:	From Carboxylic Acid Ortho Amide Derivatives and $\alpha,\beta$ -Unsaturated Carbonyl Compounds .....	416
24.2.9.1.51.8	Variation 8:	Substitution of the $\beta$ -Hydrogen Atom by the N=N Bond of Dialkyl Azodicarboxylates .....	417
24.2.9.1.52	Method 52:	Reactions at the Ene Moiety with Cleavage of C—C Bonds ..	417
24.2.9.1.53	Method 53:	Reaction at the Acetal Moiety .....	417
24.2.9.1.53.1	Variation 1:	Exchange of Alkoxy Groups .....	417
24.2.9.1.53.2	Variation 2:	Exchange of Amino Groups .....	418
24.2.9.1.53.3	Variation 3:	Alteration of Substituents on the Oxygen or Nitrogen Atom ..	419
24.2.9.1.54	Method 54:	Reactions in the Ene and Acetal Moieties .....	426
24.2.9.1.55	Method 55:	Alteration of Substituents on Remote Functional Groups ..	431
24.2.10	<b>Product Subclass 10: 1-Phosphorus-Functionalized 1-(Organooxy)alk-1-enes</b>		
	H. Heydt		
24.2.10	<b>Product Subclass 10: 1-Phosphorus-Functionalized 1-(Organooxy)alk-1-enes</b> .....		441
24.2.10.1	Synthesis of Product Subclass 10 .....		442
24.2.10.1.1	Method 1:	Alkylation, Acylation, Phosphorylation, and Metalation of Enols or Enolates of Acylphosphoryl Compounds .....	442
24.2.10.1.2	Method 2:	Alkylation, Acylation, Silylation, Sulfonylation, and Phosphorylation of Anions of (1-Methoxyalk-2-enyl)-phosphonium Salts and Related Compounds .....	444
24.2.10.1.3	Method 3:	Acylation of Dialkyl Phosphonates .....	448
24.2.10.1.4	Method 4:	Reaction of Esters of Phosphinous, Phosphonous, and Phosphorous Acids (Michaelis–Arbuzov and Related Reactions) .....	448
24.2.10.1.5	Method 5:	Substitution of 1-Alkoxy-1-haloalk-1-enes with Phosphines under Palladium Catalysis .....	450
24.2.10.1.6	Method 6:	Elimination of Hydrogen Halides from Phosphorylated 1,2-Difunctionalized Compounds .....	451

24.2.10.1.7	Method 7:	Generation of (1-Alkoxyalk-1-enyl)phosphonates by the Horner–Emmons Reaction	452
24.2.10.1.8	Method 8:	Generation of (1-Alkoxyalk-1-enyl)phosphonates by the Peterson Alkenation Reaction	453
24.2.10.1.9	Method 9:	[4+2]-Cycloaddition Reactions of Phosphorylated Hetero-1,3-dienes with Enol Ethers	453
24.2.10.1.10	Method 10:	Addition of Phosphines, Phosphinites, Phosphonites, and Phosphites to Ketenes	454
24.2.10.1.11	Method 11:	Addition of Esters of Diphenylphosphinous Acid to Unsaturated Acyl Phosphonates	455
24.2.10.1.12	Method 12:	Addition of Trialkyl Phosphites or 1,1,2,2-Tetraalkoxy-diphosphines to Alk-1-ynyl Ethers	455
24.2.10.2		Applications of Product Subclass 10 in Organic Synthesis	456
24.2.11		<b>Product Subclass 11: 1,1-Bis(organosulfanyl)alk-1-enes (Ketene S,S-Acetals)</b> W. Dölling	
24.2.11		<b>Product Subclass 11: 1,1-Bis(organosulfanyl)alk-1-enes (Ketene S,S-Acetals)</b>	461
24.2.11.1		Synthesis of Product Subclass 11	461
24.2.11.1.1	Method 1:	Alkylation of Dithiocarboxylic Acids and Their Derivatives	461
24.2.11.1.1.1	Variation 1:	From Dithiocarboxylic Acids	461
24.2.11.1.1.2	Variation 2:	From Alkyl Dithiocarboxylates	462
24.2.11.1.1.3	Variation 3:	From 1,1,1-Tris(alkylsulfanyl)ethanes	464
24.2.11.1.1.4	Variation 4:	Reactions of Carboxylic Esters, Lactones, and Carboxylic Acids with Metal Thiolates	465
24.2.11.1.2	Method 2:	Ketene S,S-Acetals from 1,1-Dihaloalkenes	466
24.2.11.1.3	Method 3:	Ketene S,S-Acetals from 2-Substituted 1,1-Disulfanylated Ethanes	468
24.2.11.1.3.1	Variation 1:	O-Acylation of 1-Aryl-2,2-bis(methylsulfanyl)ethanones	468
24.2.11.1.3.2	Variation 2:	Dehydrochlorination of 2-Chloro-1,1-disulfanylethanes	468
24.2.11.1.3.3	Variation 3:	Dehydration of 2,2-Bis(methylsulfanyl)ethanols	469
24.2.11.1.3.4	Variation 4:	Elimination of a Thiol from 1,1,2-Tris(organosulfanyl)ethanes	472
24.2.11.1.3.5	Variation 5:	Elimination of an Amine from 2-(Aminomethyl)-1,3-dithiane S,S-Dioxides	473
24.2.11.1.4	Method 4:	Alkenation of Carbonyl Compounds	473
24.2.11.1.4.1	Variation 1:	Using Bis(phenylsulfanyl)methylboronates	474
24.2.11.1.4.2	Variation 2:	Wittig and Horner–Emmons Reactions	474
24.2.11.1.4.3	Variation 3:	Peterson Reactions	477
24.2.11.1.5	Method 5:	Synthesis from 1,3-Dithianes, Nitriles, and Amides	479
24.2.11.1.6	Method 6:	Reactions of Carbon Disulfide with Carbanions	480
24.2.11.1.6.1	Variation 1:	From Aldehydes and Ketones	481
24.2.11.1.6.2	Variation 2:	From Esters, Lactones, Amides, Nitriles, and Hydrazones	486
24.2.11.1.6.3	Variation 3:	From Isocyanides or Nitroalkanes	494
24.2.11.1.6.4	Variation 4:	From Sulfur-Stabilized Carbanions	494

24.2.11.1.6.5	Variation 5:	From Phosphorus-Stabilized Carbanions	497
24.2.11.1.6.6	Variation 6:	From $\alpha$ -Aminated Carbanions or Nitrogen Ylides	498
24.2.11.1.6.7	Variation 7:	From Heterocycles Containing Endocyclic Methylene Groups	500
24.2.11.1.6.8	Variation 8:	From Other Resonance-Stabilized Carbanions	501
24.2.11.1.6.9	Variation 9:	From Nonstabilized Carbanions	501
24.2.11.1.7	Method 7:	Transformations of Other Ketene <i>S,S</i> -Acetals	503
24.2.11.1.8	Method 8:	Synthesis from the Diesters of Trithiocarbonates	507
24.2.11.1.8.1	Variation 1:	Reactions with Acetonitriles and Other CH-Acidic Compounds	507
24.2.11.1.8.2	Variation 2:	By Desulfurization	508
24.2.11.1.8.3	Variation 3:	By the Reactions of Carbenes or Ylides	509
24.2.11.1.9	Method 9:	Ring Opening and/or Rearrangement	509
24.2.11.2		Applications of Product Subclass 11 in Organic Synthesis	510
24.2.12	<b>Product Subclass 12: 1-(Organoselanyl)-1-(organosulfanyl)alk-1-enes and 1-(Organosulfanyl)-1-(organotellanyl)alk-1-enes</b>		
	M. Yoshimatsu		
24.2.12	<b>Product Subclass 12: 1-(Organoselanyl)-1-(organosulfanyl)alk-1-enes and 1-(Organosulfanyl)-1-(organotellanyl)alk-1-enes</b>		
24.2.12.1	Synthesis of Product Subclass 12		517
24.2.12.1.1	Method 1:	Alkylation of Alkaneselenothioate Esters	517
24.2.12.1.1.1	Variation 1:	By Alkylation of Lithium Enethiolates or Eneselenolates	517
24.2.12.1.1.2	Variation 2:	By Alkylation of Ammonium Eneselenolates of S-Alkyl Alkaneselenothioates	519
24.2.12.1.1.3	Variation 3:	By Cadmium(II) Acetate Mediated Conversion of S-Alkyl Alkaneselenothioates	520
24.2.12.1.1.4	Variation 4:	By Reaction of S-Alkyl Alkaneselenothioates with Trialkyl Phosphites	521
24.2.12.1.2	Method 2:	Chalcogenation of $\alpha$ -Metalated 1-(Organochalcogeno)alkenes	521
24.2.12.1.3	Method 3:	Horner–Emmons Alkenation of Carbonyl Compounds	524
24.2.12.1.4	Method 4:	Alkylation with Thiols of Lithium Eneselenolates Generated from Alkynylselenolates	525
24.2.12.1.5	Method 5:	Selenenylation of 1-(Organosulfonyl)alkynes	526
24.2.12.2	Applications of Product Subclass 12 in Organic Synthesis		526
24.2.13	<b>Product Subclass 13: 1-Nitrogen-Functionalized 1-(Organosulfanyl)alk-1-enes</b>		
	W. Dölling

<hr/>		
24.2.17.1	<b>Alk-1-ene-1,1-diamines</b> .....	571
24.2.17.1.1	Synthesis of Alk-1-ene-1,1-diamines .....	571
24.2.17.1.1.1	Method 1: Synthesis from Chloroformamidinium Salts and Alkylolithium Compounds .....	571
24.2.17.1.1.2	Method 2: Synthesis from But-2-yne-1,1,1,4,4,4-hexamines and Trimethylsilyl Cyanide .....	571
24.2.17.1.1.3	Method 3: Synthesis from Amines and Carbenes or Carbenoids .....	572
24.2.17.1.1.4	Method 4: Synthesis from Nitroketene <i>N,N</i> -Acetals and (Ethoxymethylene)malonic Acid Derivatives .....	572
24.2.17.1.1.5	Method 5: Synthesis from Diaziridinones and Malonic Acid Derivatives	573
24.2.17.1.1.6	Method 6: Synthesis from Alk-1-yn-1-amines .....	573
24.2.17.1.1.7	Method 7: Synthesis from <i>N</i> -Aryl-2-chloroacetamides and Malononitrile	575
24.2.17.1.1.8	Method 8: Synthesis from Alkylidenemalononitriles and Compounds Containing a CH-Acidic Group .....	576
24.2.17.1.1.9	Method 9: Synthesis from Alkylidene Malononitriles and Amines or Amine Derivatives .....	578
24.2.17.1.1.10	Method 10: Synthesis from Aziridines and Malonic Acid Derivatives .....	580
24.2.17.1.1.11	Method 11: Synthesis from 1,1,1-Trihaloalkanes .....	581

24.2.17.1.1.12	Method 12:	Synthesis from a Triethylammonium Dichloromethane-sulfonate Derivative .....	582
24.2.17.1.1.13	Method 13:	Synthesis from Anhydrides, Esters, or Amides and Tetrakis(dimethylamino)titanium .....	583
24.2.17.1.1.14	Method 14:	Synthesis from Dithioesters and Amines .....	587
24.2.17.1.1.15	Method 15:	Synthesis from Dithioamides and Amines .....	587
24.2.17.1.1.16	Method 16:	Synthesis from 3 <i>H</i> -1,2-Dithiole-3-thiones and Related Heterocycles .....	589
24.2.17.1.1.17	Method 17:	Synthesis from Benzodiazepines .....	590
24.2.17.1.1.18	Method 18:	Synthesis from (3-Oxo-3-phenylpropanoyl)malononitrile .....	591
24.2.17.1.1.19	Method 19:	Synthesis from Malononitrile and <i>N,N'</i> -Bis(2-aminoethyl)-ethane-1,2-diamine .....	592
24.2.17.1.1.20	Method 20:	Synthesis from Ketenes and Diaziridines .....	592
24.2.17.1.1.21	Method 21:	Synthesis from 1-Haloalk-1-ynes or Alk-1-yn-1-amines and Amines, Amides, or Betaines .....	593
24.2.17.1.1.22	Method 22:	Synthesis from 2,2-Dichloroalkanamines .....	601
24.2.17.1.1.23	Method 23:	Synthesis from Hetarenes .....	602
24.2.17.1.1.24	Method 24:	Synthesis from Chloroformamidinium Salts .....	604
24.2.17.1.1.25	Method 25:	Synthesis from 1,1-Dialkoxymethanediamines .....	608
24.2.17.1.1.26	Method 26:	Synthesis from Alkoxy- <i>N,N,N',N'</i> -tetraalkylformamidinium Salts .....	609
24.2.17.1.1.27	Method 27:	Synthesis from Isouronium Salts .....	610
24.2.17.1.1.28	Method 28:	Synthesis from Urea-Phosphoryl Chloride Adducts .....	611
24.2.17.1.1.29	Method 29:	Synthesis from Imidothiocarbamates .....	612
24.2.17.1.1.30	Method 30:	Synthesis from Isothiuronium Salts .....	614
24.2.17.1.1.31	Method 31:	Synthesis from Alkoxytris(dimethylamino)methanes or Tetrakis(dimethylamino)methane .....	616
24.2.17.1.1.32	Method 32:	Synthesis from Guanidinium Salts .....	618
24.2.17.1.1.33	Method 33:	Synthesis from Carbodiimides .....	619
24.2.17.1.1.34	Method 34:	Synthesis from Cyanamides .....	620
24.2.17.1.1.35	Method 35:	Synthesis from 1- <i>tert</i> -Butoxy- <i>N,N,N',N'</i> -tetramethylmethane-diamine or 1,1-Diethoxy- <i>N,N</i> -dimethylethanamine .....	622
24.2.17.1.1.36	Method 36:	Synthesis from Alkyne- and Allene-Substituted Ortho Amides .....	623
24.2.17.1.1.37	Method 37:	Synthesis from Amidines (With C—C Bond Formation) .....	629
24.2.17.1.1.38	Method 38:	Synthesis from 1,2,4-Triazolium Salts .....	633
24.2.17.1.1.39	Method 39:	Synthesis from Amidinium Salts and Amidines (Without C—C Bond Formation) .....	634
24.2.17.1.1.40	Method 40:	Synthesis from 2-Haloethane-1,1-diamines .....	640
24.2.17.1.1.41	Method 41:	Synthesis from Diaminopropanenitriles .....	641
24.2.17.1.1.42	Method 42:	Synthesis from 1,1-Dihaloalk-1-enes .....	641
24.2.17.1.1.43	Method 43:	Synthesis from 1-Haloalk-1-en-1-amines or 6-Chloropyrimidine Derivatives .....	649
24.2.17.1.1.44	Method 44:	Synthesis from 1-Chloro-1-sulfonylalk-1-enes .....	655
24.2.17.1.1.45	Method 45:	Synthesis from Ketene <i>O,O</i> -Acetals .....	657
24.2.17.1.1.46	Method 46:	Synthesis from Ketene <i>O,N</i> -Acetals .....	659
24.2.17.1.1.47	Method 47:	Synthesis from Ketene <i>S,S</i> -Acetals .....	664
24.2.17.1.1.48	Method 48:	Synthesis from Ketene <i>S,N</i> -Acetals .....	673
24.2.17.1.1.49	Method 49:	Synthesis from Ketenimines .....	678

24.2.17.1.1.50	Method 50:	Synthesis from 2-Bromoethenamines .....	682
24.2.17.1.1.51	Method 51:	Synthesis from Heterocyclic or Heteroaromatic Compounds .....	682
24.2.17.1.1.52	Method 52:	Synthesis from 3,3,3-Trihaloprop-1-en-2-amines .....	683
24.2.17.1.1.53	Method 53:	Synthesis from 2-Aminoacrylonitriles, 2-(Alkylsulfanyl)- acrylonitriles, or Alkylidenemalonitriles .....	684
24.2.17.1.1.54	Method 54:	Synthesis from Amino-Substituted Hetarenes or Dihydrohetarenes .....	686
24.2.17.1.1.55	Method 55:	Synthesis Using Carbonic Acid Derivatives .....	688
24.2.17.1.1.56	Method 56:	Synthesis from (Diethylamino)(diethylimino)dithioacetate .....	693
24.2.17.1.1.57	Method 57:	Synthesis from Imidazolium Salts via Nucleophilic Carbenes .....	694
24.2.17.1.1.58	Method 58:	Synthesis from 2-Oxocyclododecane-1-carbonitrile .....	694
24.2.17.2	<b>Alk-1-ene-1,1-diamines with Retention of the Functional Group</b> P. A. Keller and J. Morgan		
<hr/>			
24.2.17.2	<b>Alk-1-ene-1,1-diamines with Retention of the Functional Group</b> .....		707
24.2.17.2.1	Synthesis with Formation of C—C Bonds .....		707
24.2.17.2.1.1	Method 1:	Reactions of Ketene <i>N,N</i> -Acetals with Carboxylic Acid Derivatives .....	707
24.2.17.2.1.2	Method 2:	Reactions of Ketene <i>N,N</i> -Acetals with Activated Chloroalkenes, Enamines, or Nitro Compounds .....	709
24.2.17.2.1.3	Method 3:	Reactions of Ketene <i>N,N</i> -Acetals with Alkynes or Allenes .....	711
24.2.17.2.1.4	Method 4:	Reactions of Ketene <i>N,N</i> -Acetals with Activated Alkenes .....	714
24.2.17.2.1.5	Method 5:	Reactions of Ketene <i>N,N</i> -Acetals with Alkyl or Aryl Halides, Related Alkylating Reagents, or Aryldiazenes .....	717
24.2.17.2.1.6	Method 6:	Reactions of Ketene <i>N,N</i> -Acetals with Activated Methylene Compounds .....	719
24.2.17.2.2	Synthesis without Formation of New C—C Bonds .....		720
24.2.17.2.2.1	Method 1:	Disulfide Reduction with Hydrogen .....	720
24.2.17.2.2.2	Method 2:	Reactions of Ketene <i>N,N</i> -Acetals with Halogens or Halogen Carriers .....	720
24.2.17.2.2.3	Method 3:	Reactions of Ketene <i>N,N</i> -Acetals with Sulfur Electrophiles .....	721
24.2.17.2.2.4	Method 4:	Reactions of Ketene <i>N,N</i> -Acetals with Metal Halides, Other Metal Salts, or Metal Carbonyl Compounds .....	722
24.2.17.2.3	Synthesis with Cleavage of C—C Bonds .....		723
24.2.17.2.3.1	Method 1:	Deacylation Reactions .....	723
24.2.17.2.4	Reactions at the Ketene <i>N,N</i> -Acetal Moiety .....		725
24.2.17.2.4.1	Method 1:	Reactions of Ketene <i>N,N</i> -Acetals with Carbonic Acid Derivatives .....	725
24.2.17.2.4.2	Method 2:	Reactions of Ketene <i>N,N</i> -Acetals with Carboxylic Acid Derivatives .....	726
24.2.17.2.4.3	Method 3:	Reactions of Ketene <i>N,N</i> -Acetals with Alkynoic Acid Derivatives .....	729
24.2.17.2.4.4	Method 4:	Reactions of Ketene <i>N,N</i> -Acetals with Ketones .....	729

24.2.17.2.4.5	Method 5:	Reactions of Ketene <i>N,N</i> -Acetals with Alkylating and Arylating Reagents	729
24.2.17.2.4.6	Method 6:	Reactions of Ketene <i>N,N</i> -Acetals with Mineral Acids, Potassium Iodide, and Acidic Hydrolysis	730
24.2.17.2.4.7	Method 7:	Reactions of Ketene <i>N,N</i> -Acetals with Aqueous Sodium Hydroxide or Alcoholic Alkoxides (Hydrolysis, Cyclizations, and <i>N</i> -Deacylation)	732
24.2.17.2.4.8	Method 8:	Reactions of Ketene <i>N,N</i> -Acetals with Sulfur and Phosphorus Electrophiles	732
24.2.17.2.4.9	Method 9:	Reactions of Ketene <i>N,N</i> -Acetals with Amines	733
24.2.17.2.4.10	Method 10:	Reactions of Ketene <i>N,N</i> -Acetals with Hydrogen	734
24.2.17.2.5		Reactions at the Periphery of the System	735
24.2.17.2.5.1	Method 1:	Aminodechlorination Reactions	735
24.2.17.2.5.2	Method 2:	Reactions of Imidoyl Chloride Groups	736
24.2.17.2.5.3	Method 3:	Hydrolysis of Remote Ester or Amide Groups	737
24.2.17.2.5.4	Method 4:	Addition of Chloro Compounds across a $\beta$ -Cyano Group	737
24.2.17.2.5.5	Method 5:	Reactions of $\beta$ -Cyano Groups with Hydrogen Sulfide	738
24.2.17.2.5.6	Method 6:	Transformations of $\beta$ -Carbonyl Groups	739
24.2.17.2.5.7	Method 7:	Transformations of $\beta$ -Imidoyl Groups	739
24.2.17.2.5.8	Method 8:	Transformations of Remote Nitro or Amino Groups	740
24.2.17.2.5.9	Method 9:	Transformations of C=O Bonds	741
24.2.17.2.5.10	Method 10:	Transformations by Oxidation or Reduction	741
24.2.17.2.5.11	Method 11:	Alkylation Reactions	742
24.2.17.2.6		Transformations of Hydrazino or <i>N</i> -Hydroxyamino Derivatives of Ketene <i>N,N</i> -Acetals	743
24.2.17.2.6.1	Method 1:	Reactions of Ketene <i>N,N</i> -Acetals with Isocyanates and Isothiocyanates	743
24.2.17.2.6.2	Method 2:	Reactions of Ketene <i>N,N</i> -Acetals with Carboxylic Acid Derivatives	743
24.2.17.2.6.3	Method 3:	Reactions of Ketene <i>N,N</i> -Acetals with Aldehydes or Ketones	744
24.2.17.2.6.4	Method 4:	Reactions of Ketene <i>N,N</i> -Acetals with Diazomethane	744
24.2.17.2.6.5	Method 5:	Reactions of Ketene <i>N,N</i> -Acetals with Sodium Nitrite/Hydrochloric Acid	744
24.2.17.3		<b>1,1-Bisazo-, 1,1-Diazo-, and 1,1-Dinitroalk-1-enes</b> K. Banert	
24.2.17.3		<b>1,1-Bisazo-, 1,1-Diazo-, and 1,1-Dinitroalk-1-enes</b>	747
24.2.17.3.1		Synthesis of 1,1-Bisazo-, 1,1-Diazo-, and 1,1-Dinitroalk-1-enes	747
24.2.17.3.3.1	Method 1:	1,1-Bisazoalk-1-enes from Formazans	747
24.2.17.3.1.1.1	Variation 1:	By Dehydrogenation	747
24.2.17.3.1.1.2	Variation 2:	By Base-Induced Deprotonation	748
24.2.17.3.1.1.3	Variation 3:	By Dehydration	748
24.2.17.3.1.2	Method 2:	1,1-Diazoalk-1-enes from 3,3-Dichloroacrylonitriles	749
24.2.17.3.1.3	Method 3:	1,1-Dinitroalk-1-enes by Formation of the C=C Bond from Two Carbon Components	750

24.2.17.3.1.3.1	Variation 1:	Reactions between Di- or Trinitromethyl Reagents and Diazo Compounds	750
24.2.17.3.1.3.2	Variation 2:	Reactions between Tetra- or Dinitromethane and Other Reagents	750
24.2.17.3.1.4	Method 4:	1,1-Dinitroalk-1-enes by Formation of the C=C Bond by Elimination	752
24.2.17.3.1.5	Method 5:	1,1-Dinitroalk-1-enes by Introduction of the Nitro Groups at the C=C Bonds of Alkenes	753
24.2.17.3.1.6	Method 6:	1,1-Dinitroalk-1-enes from Methyl-Substituted Heterocycles	755
24.2.17.3.1.7	Method 7:	1,1-Dinitroalk-1-enes by Substitution of Other 1,1-Dinitroalk-1-enes	757
24.2.17.3.1.7.1	Variation 1:	By Substitution at the C=C Bond	757
24.2.17.3.1.7.2	Variation 2:	By Other Substitutions	759
24.2.17.3.2		Applications of 1,1-Bisazo-, 1,1-Diazo-, and 1,1-Dinitroalk-1-enes in Organic Synthesis	760
24.2.18	<b>Product Subclass 18: 1-Nitrogen-Functionalized 1-Phosphorus-Functionalized Alk-1-enes</b>		
	M. Stankević and K. M. Pietrusiewicz		
24.2.18	<b>Product Subclass 18: 1-Nitrogen-Functionalized 1-Phosphorus-Functionalized Alk-1-enes</b>		
24.2.18.1		Synthesis of Product Subclass 18	767
24.2.18.1.1	Method 1:	Synthesis from Haloenamines and Haloimines	767
24.2.18.1.2	Method 2:	Synthesis from 1-Phosphorus-Functionalized Alkanamines	768
24.2.18.1.2.1	Variation 1:	By Condensation with Carbonyl Compounds	768
24.2.18.1.2.2	Variation 2:	By the Horner–Wadsworth–Emmons Reaction	769
24.2.18.1.2.3	Variation 3:	By Elimination	769
24.2.18.2		Applications of Products Subclass 18 in Organic Synthesis	770
24.2.19	<b>Product Subclass 19: 1,1-Bis(phosphorus-functionalized) Alk-1-enes</b>		
	M. Stankević and K. M. Pietrusiewicz		
24.2.19	<b>Product Subclass 19: 1,1-Bis(phosphorus-functionalized) Alk-1-enes</b>		
24.2.19.1		Synthesis of Product Subclass 19	775
24.2.19.1.1	Method 1:	Substitution Reactions of 1,1-Dihaloalkenes	775
24.2.19.1.2	Method 2:	Synthesis from Methylenebis(phosphonates) and Methylenebis(phosphine sulfides)	776
24.2.19.1.3	Method 3:	Synthesis from $\alpha$ -Acyl Ylides	777
24.2.19.2		Applications of Product Subclass 19 in Organic Synthesis	777

<b>24.3</b>	<b>Product Class 3: Bis(heteroatom-functionalized) Acetylenes</b>	
<hr/>		
<b>24.3.1</b>	<b>Product Subclass 1: Dihaloacetylenes</b>	
	B. Witulski and C. Alayrac	
<hr/>		
<b>24.3.1</b>	<b>Product Subclass 1: Dihaloacetylenes</b>	781
<b>24.3.1.1</b>	Synthesis of Product Subclass 1	783
<b>24.3.1.1.1</b>	Method 1: Vacuum Pyrolysis	783
<b>24.3.1.1.2</b>	Method 2: Electrical Discharge	784
<b>24.3.1.1.3</b>	Method 3: Photolysis	784
<b>24.3.1.1.4</b>	Method 4: Dehydrohalogenation and Dehalogenation Reactions	785
<b>24.3.1.1.4.1</b>	Variation 1: Dehydrohalogenation of 2-Fluoro-1,1-dihaloalkenes	785
<b>24.3.1.1.4.2</b>	Variation 2: Dehydrohalogenation of Trihaloalkanes	786
<b>24.3.1.1.4.3</b>	Variation 3: Dehalogenation of Tetrahaloalkenes	786
<b>24.3.1.1.4.4</b>	Variation 4: Dehydrochlorination of Trichloroethene	787
<b>24.3.1.1.5</b>	Method 5: Halogenation of Acetylene	789
<b>24.3.1.1.5.1</b>	Variation 1: Metalation and Chlorination of Acetylene	790
<b>24.3.1.1.5.2</b>	Variation 2: Metalation and Bromination of Acetylene	790
<b>24.3.1.1.5.3</b>	Variation 3: Iodination of Acetylene Using Iodine in Liquid Ammonia	791
<b>24.3.1.1.5.4</b>	Variation 4: Iodination of Acetylenes Using Bis(2,4,6-collidine)iodonium Hexafluorophosphate	792
<b>24.3.1.2</b>	Applications of Product Subclass 1 in Organic Synthesis	792
<b>24.3.2</b>	<b>Product Subclass 2: 1-Heteroatom-Functionalized 2-Haloacetylenes</b>	
	B. Witulski and C. Alayrac	
<hr/>		
<b>24.3.2</b>	<b>Product Subclass 2: 1-Heteroatom-Functionalized 2-Haloacetylenes</b>	797
<b>24.3.2.1</b>	Synthesis of Product Subclass 2	798
<b>24.3.2.1.1</b>	Method 1: Synthesis of 1-Halo-2-(triorganosilyl)acetylenes	798
<b>24.3.2.1.1.1</b>	Variation 1: Halogenation of Silylated Acetylenes	798
<b>24.3.2.1.1.2</b>	Variation 2: Halogenation of Metal Silylacetylides	799
<b>24.3.2.1.1.3</b>	Variation 3: Synthesis of 1-Fluoro-2-(triisopropylsilyl)acetylene from 1,1-Difluoroethene	800
<b>24.3.2.1.1.4</b>	Variation 4: Silylation of Metal Chloro- or Bromoacetylides	801
<b>24.3.2.1.1.5</b>	Variation 5: Iodination of Disilylated Acetylenes	803
<b>24.3.2.1.2</b>	Method 2: Synthesis of 1-Alkoxy-2-haloacetylenes	803
<b>24.3.2.1.3</b>	Method 3: Synthesis of 1-Halo-2-(organosulfonyl)- and 1-Halo-2-(organosulfanyl)acetylenes	804
<b>24.3.2.1.3.1</b>	Variation 1: Bromination of Sulfonylated Acetylenes with <i>N</i> -Bromosuccinimide	804
<b>24.3.2.1.3.2</b>	Variation 2: By the Hypobromite or Hypochlorite Methods	805
<b>24.3.2.1.3.3</b>	Variation 3: Halogenation of Lithium 2-Sulfonylacetylides	806
<b>24.3.2.1.3.4</b>	Variation 4: Alkylthiolation of Lithium Chloroacetylide	806

24.3.2.1.3.5	Variation 5:	1-(Alkylsulfanyl)-2-chloroacetylenes under Phase-Transfer Conditions	807
24.3.2.1.4	Method 4:	Synthesis of 2-Haloacetylen-1-amines	808
24.3.2.1.4.1	Variation 1:	By the Hypobromite Method	808
24.3.2.1.4.2	Variation 2:	From 1,1-Dichloro-2-fluoroethene	808
24.3.2.1.4.3	Variation 3:	From Chloroenamines	809
24.3.2.1.5	Method 5:	Synthesis of 1-Halo-2-(phosphoryl)acetylenes	810
24.3.2.1.5.1	Variation 1:	By the Hypochlorite Method	811
24.3.2.1.5.2	Variation 2:	By the Ionin–Petrov Method	811
24.3.2.2	Applications of Product Subclass 2 in Organic Synthesis		812
24.3.2.2.1	Method 1:	Substitution Reactions toward Diheterosubstituted Acetylenes	812
24.3.2.2.1.1	Variation 1:	Heterosubstituted Ynamines	812
24.3.2.2.1.2	Variation 2:	1-Heteroatom-Functionalized 2-(Phosphoryl)acetylenes	813
24.3.2.2.2	Method 2:	Cross-Coupling Reactions in the Presence of Transition Metals	813
24.3.2.2.2.1	Variation 1:	With Aryl- or Alkylcopper Reagents	813
24.3.2.2.2.2	Variation 2:	With Alkenylcopper Reagents	814
24.3.2.2.2.3	Variation 3:	1-Bromo-2-silylacetylenes in Cadiot–Chodkiewicz Coupling Reactions	814
24.3.2.2.2.4	Variation 4:	Chemoselective Two-Carbon Homologation of Aldehydes	815
24.3.2.2.2.5	Variation 5:	Catalytic <i>ortho</i> -Ethynylation of Phenols and Anilines with 1-Chloro-2-(triethylsilyl)acetylene	816
24.3.2.2.3	Method 3:	Cycloaddition Reactions	816
24.3.3	<b>Product Subclass 3: Bis(organooxy)acetylenes</b>		
	B. Witulski and C. Alayrac		
24.3.3	<b>Product Subclass 3: Bis(organooxy)acetylenes</b>		821
24.3.3.1	Synthesis of Product Subclass 3		824
24.3.3.1.1	Method 1:	Synthesis of Diphenoxyacetylene by Substitution Reactions	824
24.3.3.1.2	Method 2:	Synthesis of Bis(organooxy)acetylenes by Elimination Reactions	825
24.3.3.1.2.1	Variation 1:	From Polymeric Glyoxal	825
24.3.3.1.2.2	Variation 2:	Dialkoxycetylenes from Bromoalkenes	826
24.3.3.1.2.3	Variation 3:	Di- <i>tert</i> -butoxyacetylene from <i>trans</i> -2,3-Dichloro-1,4-dioxane	828
24.3.3.1.3	Method 3:	Photochemical Synthesis of Acetylenediol	829
24.3.3.2	Applications of Product Subclass 3 in Organic Synthesis		829
24.3.3.2.1	Method 1:	Synthesis of Hexasubstituted Benzenes	829
24.3.3.2.2	Method 2:	Synthesis of Deltic Acid	830
24.3.3.2.3	Method 3:	Synthesis of Squaric and Semisquaric Acids	830
24.3.3.2.4	Method 4:	Synthesis of Hydrocroconic Acid and Croconate Dianion	831

24.3.4	<b>Product Subclass 4: 1-(Organochalcogeno)-2-(organooxy)acetylenes</b> B. Witulski and C. Alayrac	
24.3.4	<b>Product Subclass 4: 1-(Organochalcogeno)-2-(organooxy)acetylenes</b> .....	835
24.3.4.1	Synthesis of Product Subclass 4 .....	836
24.3.4.1.1	Method 1: Substitution Reactions of Lithium Alkoxyacetylides .....	836
24.3.4.1.2	Method 2: Substitution Reactions of 1-Alkoxy-2-stannylacetylenes .....	837
24.3.4.1.3	Method 3: Elimination Reactions of 1,1-Dichloro-2-(organosulfanyl)ethenes .....	837
24.3.4.1.4	Method 4: Elimination of Hydrogen Chloride from 1,2-Dichloro-2-(phenylselanyl)ethene .....	838
24.3.4.2	Applications of Product Subclass 4 in Organic Synthesis .....	839
24.3.5	<b>Product Subclass 5: 1-Nitrogen-Functionalized 2-(Organooxy)acetylenes</b> B. Witulski and C. Alayrac	
24.3.5	<b>Product Subclass 5: 1-Nitrogen-Functionalized 2-(Organooxy)acetylenes</b>	841
24.3.5.1	Synthesis of Product Subclass 5 .....	841
24.3.5.1.1	Method 1: Generation of 2-Aminoacetylen-1-ols .....	841
24.3.6	<b>Product Subclass 6: 1-Phosphorus-Functionalized 2-(Organooxy)acetylenes</b> B. Witulski and C. Alayrac	
24.3.6	<b>Product Subclass 6: 1-Phosphorus-Functionalized 2-(Organooxy)acetylenes</b> .....	843
24.3.6.1	Synthesis of Product Subclass 6 .....	843
24.3.6.1.1	Method 1: Substitution Reactions of (Chloroethynyl)phosphonates .....	843
24.3.6.1.2	Method 2: Substitution Reactions of Lithium Alkoxyacetylides .....	844
24.3.6.1.3	Method 3: Reaction of Potassium Alkoxyacetylides with Tetraphenyl- phosphonium Chloride .....	845
24.3.6.1.4	Method 4: Sulfuration of 1-Alkoxy-2-phosphinoacetylenes .....	845
24.3.6.2	Applications of Product Subclass 6 in Organic Synthesis .....	845
24.3.6.2.1	Method 1: Synthesis of (Oxovinylidene)phosphoranes .....	846
24.3.6.2.2	Method 2: Synthesis of Aminophosphoranes .....	846
24.3.6.2.3	Method 3: Synthesis of Silyl- or Gernyl(thiophosphoryl)ketenes .....	846
24.3.6.2.4	Method 4: Cycloaddition Reactions .....	847
24.3.7	<b>Product Subclass 7: Bis(organochalcogeno)acetylenes</b> T. Murai	
24.3.7	<b>Product Subclass 7: Bis(organochalcogeno)acetylenes</b> .....	849
24.3.7.1	Synthesis of Product Subclass 7 .....	849

24.3.7.1.1	Bis(organosulfanyl)acetylenes .....	849
24.3.7.1.1.1	Method 1: Reaction of Electrophilic Acetylenic Species with Organosulfanyl Compounds .....	849
24.3.7.1.1.2	Method 2: Reaction of Metal Acetylides with Organosulfanyl Compounds .....	851
24.3.7.1.1.3	Method 3: Elimination from 1-Chloro-1,2-bis(organosulfanyl)ethenes .....	853
24.3.7.1.1.4	Method 4: Oxidation of 1,2-Bis(organosulfanyl)acetylenes .....	854
24.3.7.1.2	1-(Organoselanyl)-2-(organosulfanyl)acetylenes .....	854
24.3.7.1.2.1	Method 1: Reaction of 1-Chloro-2-(organosulfanyl)acetylenes with Organoselenols .....	854
24.3.7.1.3	1-(Organosulfanyl)-2-(organotellanyl)acetylenes .....	855
24.3.7.1.3.1	Method 1: Reaction of Diorgano Ditellurides with 1,1-Dichloro-2-(organosulfanyl)ethenes .....	855
24.3.7.1.4	Bis(organoselanyl)acetylenes .....	855
24.3.7.1.4.1	Method 1: Reaction of Sodium Acetylide with Elemental Selenium and Alkyl Halides .....	855
24.3.7.1.4.2	Method 2: Reaction of Lithium Acetylides with Bis(selenocyanato)alkanes .....	856
24.3.7.1.4.3	Method 3: Reaction of (Organoselanyl)acetylides with Areneselenenyl Halides .....	856
24.3.7.1.5	Bis(organotellanyl)acetylenes .....	856
24.3.7.1.5.1	Method 1: Reaction of Dimetal Acetylides with Elemental Tellurium and Alkyl Halides or Organotellanyl Compounds .....	857
24.3.7.1.5.2	Method 2: Reaction of Acetylene with Dialkyl Ditellurides .....	857
24.3.8	<b>Product Subclass 8: 1-Nitrogen-Functionalized 2-(Organochalcogeno)acetylenes</b> T. Murai	
24.3.8	<b>Product Subclass 8: 1-Nitrogen-Functionalized 2-(Organochalcogeno)acetylenes</b> .....	859
24.3.8.1	Synthesis of Product Subclass 8 .....	859
24.3.8.1.1	<i>N,N</i> -Dialkyl-2-(organosulfanyl)acetylen-1-amines .....	859
24.3.8.1.1.1	Method 1: Reaction of 1-Chloro-2-(organosulfanyl)acetylenes with Amines or Metal Amides .....	859
24.3.8.1.1.1.1	Variation 1: Reaction of Phenyl(2-tosylethynyl)iodonium Trifluoromethanesulfonate with Metal Amides .....	860
24.3.8.1.1.2	Method 2: Reaction of Metal 2-(Diorganoamino)acetylides with Sulfur and Alkyl Halides or Sulfur Electrophiles .....	861
24.3.8.1.2	2-(Organoselanyl)acetylen-1-amines .....	861
24.3.8.1.2.1	Method 1: Reaction of Phenyl 2,2,2-Trifluoroethyl Selenide with Lithium Dialkylamides .....	861

<b>24.3.9</b>	<b>Product Subclass 9: 2-Phosphorus-Functionalized 1-(Organochalcogeno)acetylenes</b>

<b>24.3.10.1.5</b>	Method 5: Flash Pyrolysis	872
<b>24.3.10.1.5.1</b>	Variation 1: From 2,3-Diaminocyclopropenones	872
<b>24.3.10.1.5.2</b>	Variation 2: From 1,2,4-Triazine-3,5,6-triamines	873
<b>24.3.10.1.6</b>	Method 6: Dimerization of Alkyl Isocyanides	873
<b>24.3.10.1.7</b>	Method 7: 1,2-Diisocyanoacetylene by UV Photolysis	874
<b>24.3.10.2</b>	Applications of Product Subclass 10 in Organic Synthesis	875
<b>24.3.10.2.1</b>	Method 1: Synthesis of <i>N,N,N',N'</i> -Tetraethyldichalcogenooxalamides	875
<b>24.3.10.2.2</b>	Method 2: Synthesis of Bis(dialkylamino)cyclopropene Derivatives	875
<b>24.3.10.2.2.1</b>	Variation 1: Bis(dialkylamino)cyclopropenethiones	875
<b>24.3.10.2.2.2</b>	Variation 2: Bis(dialkylamino)cyclopropenimines	876
<b>24.3.10.2.3</b>	Method 3: Synthesis of Bis(dialkylamino)cyclobutene Derivatives	876
<b>24.3.10.2.3.1</b>	Variation 1: Tris- or Tetrakis(dimethylamino)cyclobutenes	876
<b>24.3.10.2.3.2</b>	Variation 2: Spiro-Annulated Products	877
<b>24.3.10.2.4</b>	Method 4: Synthesis of Heterocyclic Compounds	878
<b>24.3.10.2.4.1</b>	Variation 1: <i>N,N,N',N'</i> -Tetramethylpyrazolediamines	878
<b>24.3.10.2.4.2</b>	Variation 2: 2,6-Diazabicyclo[2.2.2]oct-7-ene-3,5-diones	878
<b>24.3.10.2.4.3</b>	Variation 3: 2-Thia-1-phosphabicyclo[3.2.0]hepta-3,6-diene-6,7-diamines	879
<b>24.3.10.2.4.4</b>	Variation 4: 1,3-Diphospha-Dewar Benzenes	879
<b>24.3.10.2.5</b>	Method 5: Synthesis of Metal Complexes	880
<b>24.3.10.2.5.1</b>	Variation 1: Tricarbonyliron Complexes of Cyclopentadienones	880

24.3.10.2.5.2	Variation 2:	Cyclobutenylidene Complexes of Pentacarbonyl tungsten	880
24.3.10.2.5.3	Variation 3:	<i>N,N,N',N'</i> -Tetraethyl-3-methoxyindene-1,2-diamine as a Ligand of Tricarbonylchromium	881
24.3.11	<b>Product Subclass 11: 1-Nitrogen-Functionalized 2-Phosphorus-Functionalized Acetylenes and Bis(phosphorus-functionalized) Acetylenes</b> B. Witulski and C. Alayrac		
24.3.11	<b>Product Subclass 11: 1-Nitrogen-Functionalized 2-Phosphorus-Functionalized Acetylenes and Bis(phosphorus-functionalized) Acetylenes</b> 883		
24.3.11.1	Synthesis of Product Subclass 11 885		
24.3.11.1.1	Method 1:	Synthesis of 1-Amino-2-(phosphoryl)acetylenes	885
24.3.11.1.1.1	Variation 1:	From (Chloroethynyl)phosphonates	885
24.3.11.1.1.2	Variation 2:	From 1-Amino-2-(phosphino)acetylenes	886
24.3.11.1.2	Method 2:	Synthesis of 1-Amino-2-(thiophosphoryl)acetylenes	887
24.3.11.1.3	Method 3:	Synthesis of 1-Amino-2-(selenophosphoryl)acetylenes	887
24.3.11.1.4	Method 4:	Synthesis of 1-Amino-2-(phosphorimidoyl)acetylenes	888
24.3.11.1.5	Method 5:	Synthesis of (Aminoethynyl)triphenylphosphonium Salts	888
24.3.11.1.6	Method 6:	Synthesis of 1-Amino-2-(phosphino)acetylenes	889
24.3.11.1.7	Method 7:	Synthesis of Bis(phosphoranyl)acetylenes	890
24.3.11.1.7.1	Variation 1:	Bis[bis(dialkylamino)difluorophosphoranyl]acetylenes	890
24.3.11.1.7.2	Variation 2:	Bis[triphenyl(phenylethynyl)phosphoranyl]acetylene	890
24.3.11.1.8	Method 8:	Synthesis of Bis(phosphorylated) Acetylenes	891
24.3.11.1.8.1	Variation 1:	Ethyne-1,2-diylbis(phosphonates) by the Ionin–Petrov Method	891
24.3.11.1.8.2	Variation 2:	Bis(diorganophosphoryl)acetylenes by Oxidation Reactions	892
24.3.11.1.9	Method 9:	Synthesis of Bis(thiophosphoryl)acetylenes	893
24.3.11.1.9.1	Variation 1:	By Substitution Reactions	893
24.3.11.1.9.2	Variation 2:	By Sulfuration Reactions	893
24.3.11.1.10	Method 10:	Synthesis of Bis(diorganoselenophosphoryl)acetylenes	894
24.3.11.1.11	Method 11:	Synthesis of Bis(phosphorimidoyl)acetylenes	894
24.3.11.1.12	Method 12:	Synthesis of Bis(dihalophosphino)acetylenes	895
24.3.11.1.12.1	Variation 1:	By Substitution with Fluorine Atoms	895
24.3.11.1.12.2	Variation 2:	By Substitution with Chlorine Atoms	895
24.3.11.1.13	Method 13:	Synthesis of Bis[(dialkylamino)phosphino]acetylenes	896
24.3.11.1.13.1	Variation 1:	From Acetylene	896
24.3.11.1.13.2	Variation 2:	From Bis[bis(diethylamino)phosphino]acetylene	897
24.3.11.1.14	Method 14:	Synthesis of Bis(phosphino)acetylenes	897
24.3.11.1.14.1	Variation 1:	Bis(phosphino)acetylenes from Acetylene	897
24.3.11.1.14.2	Variation 2:	Bis(dibutylphosphino)acetylene from (Dibutylphosphino)acetylene	898
24.3.11.1.14.3	Variation 3:	Bis(phosphino)acetylenes from (Diphenylphosphino)acetylene	899
24.3.11.1.14.4	Variation 4:	Bis(phosphino)acetylenes from Tetrachloroethene	899
24.3.11.1.14.5	Variation 5:	Bis(phosphino)acetylene from 1,4-Diphosphabutatriene	900

24.3.11.2	Applications of Product Subclass 11 in Organic Synthesis	900
24.3.11.2.1	Method 1: Diels–Alder Reactions	900
24.3.11.2.2	Method 2: Synthesis of Triazoles by Addition to Azides	901
24.3.11.2.3	Method 3: Synthesis of Pyrazoles by [3 + 2]-Cycloaddition Reactions with Diazoalkanes	901
24.3.11.2.4	Method 4: Synthesis of 1,3-Diphosphaallylium Salts	902
24.3.11.2.5	Method 5: Synthesis of Metal Complexes from Bis(diphenylphosphino)acetylene	902
<b>24.4</b>	<b>Product Class 4: 1-Heteroatom-Functionalized Alk-1-yne</b>	
<b>24.4.1</b>	<b>Product Subclass 1: 1-Haloalk-1-yne and Alk-1-yn-1-ols</b> B. Witulski and C. Alayrac	
<b>24.4.1</b>	<b>Product Subclass 1: 1-Haloalk-1-yne and Alk-1-yn-1-ols</b>	905
24.4.1.1	Synthesis of Product Subclass 1	906
24.4.1.1.1	Method 1: Halogenation of Alk-1-yne	906
24.4.1.1.1.1	Variation 1: By Reaction with <i>N</i> -Halosuccinimides	906
24.4.1.1.1.2	Variation 2: Bis(trimethylsilyl) Peroxide and Metal-Promoted Transfer of Halides	907
24.4.1.1.1.3	Variation 3: Straus Reaction	908
24.4.1.1.1.4	Variation 4: Bromination Reaction with Triphenylphosphine and Carbon Tetrabromide	909
24.4.1.1.1.5	Variation 5: Iodination with a Polymer-Supported Bis(acyloxy)iodate(II) Reagent	910
24.4.1.1.1.6	Variation 6: Iodination with Bis(2,4,6-collidine)iodonium Hexafluorophosphate	911
24.4.1.1.1.7	Variation 7: Iodination with Molecular Iodine	911
24.4.1.1.2	Method 2: Halogenation of Metal Acetylides	912
24.4.1.1.2.1	Variation 1: Halogenation with Molecular Bromine or Iodine	912
24.4.1.1.2.2	Variation 2: Chlorination of Lithium Acetylides with <i>N</i> -Chlorosuccinimide	913
24.4.1.1.2.3	Variation 3: Iodination of Sodium Acetylides with Bis(pyridine)iodonium Tetrafluoroborate	914
24.4.1.1.3	Method 3: Halodecarboxylation of Propynoic Acids	915
24.4.1.1.3.1	Variation 1: With <i>N</i> -Halosuccinimides and Tetrabutylammonium Trifluoroacetate	915
24.4.1.1.3.2	Variation 2: With Bis(2,4,6-collidine)iodonium or Bis(2,4,6-collidine)-bromonium Hexafluorophosphate	915
24.4.1.1.4	Method 4: Direct Transformation of Trimethylsilylalkynes into Haloalkynes	916
24.4.1.1.5	Method 5: Dehydrohalogenation of 1,1-Dihaloalkenes	916
24.4.1.1.5.1	Variation 1: Dehydrohalogenation under Phase-Transfer Conditions	917
24.4.1.1.5.2	Variation 2: Dehydrohalogenation in Organic Solvents	917
24.4.1.1.6	Method 6: Dehalogenation of Oligohaloalkenes with a Metal	918
24.4.1.1.7	Method 7: Functionalization of Metal Haloacetylides	919

24.4.1.1.8	Method 8:	Synthesis of 1-Haloalk-1-yne from Carbonyl Compounds	920
24.4.1.1.8.1	Variation 1:	Synthesis of 2-Aryl-1-bromoacetylenes from Hydrazones	920
24.4.1.1.8.2	Variation 2:	Synthesis of 1-Chloroalk-1-yne from Dihydroisoxazolones	920
24.4.1.1.8.3	Variation 3:	Synthesis of 1-Chloroalk-1-yne from Esters	921
24.4.1.1.8.4	Variation 4:	One-Pot Conversion of Aldehydes into 1-Haloalk-1-yne with Dihalomethylphosphonates	921
24.4.1.1.8.5	Variation 5:	One-Pot Conversion of Aldehydes into 1-Haloalk-1-yne with Dihalomethylenetriphenylphosphoranes	922
24.4.1.1.9	Method 9:	Base-Induced Rearrangement of (Z)-(2-Halovinyl)iodonium Salts	923
24.4.1.1.10	Method 10:	Synthesis of 1-Fluoroalk-1-yne by Electrical Discharge	924
24.4.1.1.11	Method 11:	Synthesis of 1-Haloalk-1-yne by Vacuum Pyrolysis	925
24.4.1.1.12	Method 12:	Synthesis of 1-Fluoroalk-1-yne by Photolysis	925
24.4.1.1.13	Method 13:	Photochemical Synthesis of Alk-1-yn-1-ols	926
24.4.1.2		Applications of Product Subclass 1 in Organic Synthesis	927
24.4.1.2.1	Method 1:	Cadiot–Chodkiewicz Coupling	927
24.4.1.2.2	Method 2:	Cross Coupling of 1-Haloalk-1-yne with Metalated Ethenes	928
24.4.1.2.3	Method 3:	Cross-Coupling Reactions of 1-Haloalk-1-yne with Alkylzinc–Copper Reagents	928
24.4.1.2.4	Method 4:	Synthesis of Stereochemically Defined Vinylboronates by Hydroboration of 1-Haloalk-1-yne	929

#### 24.4.2 **Product Subclass 2: 1-(Organooxy)alk-1-yne and 1-(Heterooxy)alk-1-yne**

B. Witulski and C. Alayrac

24.4.2		<b>Product Subclass 2: 1-(Organooxy)alk-1-yne and 1-(Heterooxy)alk-1-yne</b>	933
24.4.2.1		Synthesis of Product Subclass 2	935
24.4.2.1.1	Method 1:	Synthesis of Alk-1-ynyl Carbamates by Elimination	935
24.4.2.1.2	Method 2:	Synthesis of Alk-1-ynyl Carboxylates from Alk-1-ynyliodonium Salts	936
24.4.2.1.3	Method 3:	Synthesis of Alk-1-ynyl Ethers from 1-Alkoxy-2-haloacetylenes	937
24.4.2.1.4	Method 4:	Synthesis of Alk-1-ynyl Ethers by Dehydrohalogenation	938
24.4.2.1.4.1	Variation 1:	From Alkoxides and Trichloroethene	938
24.4.2.1.4.2	Variation 2:	Dehydrohalogenation of 2-Halovinyl Ethers	939
24.4.2.1.4.3	Variation 3:	From Chloroacetaldehyde Dialkyl Acetals	940
24.4.2.1.4.4	Variation 4:	From 2,2,2-Trifluoroethyl Ethers	942
24.4.2.1.4.5	Variation 5:	From Acetates	942
24.4.2.1.5	Method 5:	Synthesis of Alk-1-ynyl Sulfonates from Alk-1-ynyliodonium Salts	943
24.4.2.1.6	Method 6:	Synthesis of Dialkyl Alk-1-ynyl Phosphates	944
24.4.2.1.6.1	Variation 1:	From Alk-1-ynyliodonium Salts	944
24.4.2.1.6.2	Variation 2:	From Lithium Alk-1-ynolates	945
24.4.2.1.7	Method 7:	Synthesis of 1-Siloxyalk-1-yne	946
24.4.2.1.7.1	Variation 1:	From Alk-1-ynyl 4-Toluenesulfonates	946

24.4.2.1.7.2	Variation 2: By Oxygenation of Acetylides .....	946
24.4.2.1.7.3	Variation 3: From Ester-Derived Ynolates .....	947
24.4.2.1.7.4	Variation 4: From ( <i>Z</i> )-2-Halovinyl Silyl Ethers .....	948
24.4.2.1.7.5	Variation 5: From Silylated $\alpha$ -Diazo Carbonyl Compounds .....	949
24.4.2.2	Applications of Product Subclass 2 in Organic Synthesis .....	950
24.4.2.2.1	Method 1: Synthesis of Stereochemically Defined Metalated Vinyl Ethers	950
24.4.2.2.2	Method 2: Addition Reactions to Carbonyl Compounds .....	952
24.4.2.2.3	Method 3: Enyne Metathesis .....	952
24.4.2.2.4	Method 4: Metal- or Acid-Promoted Cycloisomerization of 1-Siloxyalk-1-ynes .....	953
24.4.2.2.5	Method 5: Aromatic Annulation Reactions .....	953
24.4.3	<b>Product Subclass 3: 1-(Organosulfanyl)-, 1-(Organoselanyl)-, and 1-(Organotellanyl)alk-1-ynes</b> V. A. Potapov and B. A. Trofimov	
<hr/>		
24.4.3	<b>Product Subclass 3: 1-(Organosulfanyl)-, 1-(Organoselanyl)-, and 1-(Organotellanyl)alk-1-ynes</b> .....	957
24.4.3.1	(Organosulfanyl)-, (Organoselanyl)-, and (Organotellanyl)acetylenes .....	958
24.4.3.1.1	Synthesis of (Organosulfanyl)-, (Organoselanyl)-, and (Organotellanyl)acetylenes .....	958
24.4.3.1.1.1	Method 1: Synthesis from Metal Acetylides and Chalcogen Electrophiles	958
24.4.3.1.1.2	Method 2: Synthesis from Ethynylmagnesium Halides and Organochalcogeno Halides .....	960
24.4.3.1.1.3	Method 3: (Organotellanyl)acetylenes from Acetylene, Diorgano Ditellurides, and Iodomethane .....	961
24.4.3.1.1.4	Method 4: Dehydrohalogenation Reactions .....	962
24.4.3.1.1.5	Method 5: (Organosulfanyl)acetylenes from 1,2-Bis(organo-sulfanyl)- ethenes and 1-(Organooxy)-2-(organo-sulfanyl)ethenes .....	963
24.4.3.1.2	Applications of (Organosulfanyl)-, (Organoselanyl)-, and (Organotellanyl)- acetylenes in Organic Synthesis .....	964
24.4.3.1.2.1	Method 1: The Mannich Reaction .....	965
24.4.3.1.2.2	Method 2: Syntheses Based on the Reactions of Metal (Organosulfanyl)- acetylides .....	965
24.4.3.1.2.3	Method 3: Syntheses Based on the Addition and Cycloaddition Reactions of (Organochalcogeno)acetylenes .....	966
24.4.3.1.2.4	Method 4: Oxidation of (Organosulfanyl)acetylenes to (Organosulfinyl)- and (Organosulfonyl)acetylenes .....	968
24.4.3.2	Dialk-1-ynyl Sulfides, Selenides, and Tellurides .....	968
24.4.3.2.1	Synthesis of Dialk-1-ynyl Sulfides, Selenides, and Tellurides .....	969
24.4.3.2.1.1	Method 1: Synthesis from Metal Acetylides and Chalcogen Halides .....	969
24.4.3.2.1.2	Method 2: Dialk-1-ynyl Selenides and Tellurides from Selenium and Tellurium Amides and Alk-1-ynes .....	969
24.4.3.2.1.3	Method 3: Dialk-1-ynyl Sulfides by Dehydrohalogenation Reactions .....	970

<b>24.4.3.2.1.4</b>	<b>Methods 4: Additional Methods</b> .....	<b>971</b>
<b>24.4.3.2.2</b>	<b>Applications of Dialk-1-ynyl Sulfides, Selenides, and Tellurides in Organic Synthesis</b> .....	<b>972</b>
<b>24.4.3.2.2.1</b>	<b>Method 1: Synthesis of Heterocyclic Compounds from Dialk-1-ynyl Sulfides</b> .....	<b>972</b>
<b>24.4.3.3</b>	<b>1-(Alkylsulfanyl)- and 1-(Arylsulfanyl)alk-1-yne and Their Selenium and Tellurium Analogues</b> .....	<b>973</b>
<b>24.4.3.3.1</b>	<b>Synthesis of 1-(Alkylsulfanyl)- and 1-(Arylsulfanyl)alk-1-yne and Their Selenium and Tellurium Analogues</b> .....	<b>973</b>
<b>24.4.3.3.1.1</b>	<b>Method 1: Synthesis from Metal Acetylides, Elemental Chalcogens, and Haloalkanes</b> .....	<b>973</b>
<b>24.4.3.3.1.1.1</b>	<b>Variation 1: From Alkali Metal Acetylides in Liquid Ammonia</b> .....	<b>974</b>
<b>24.4.3.3.1.1.2</b>	<b>Variation 2: From Lithium Acetylides in Organic Solvents</b> .....	<b>974</b>
<b>24.4.3.3.1.1.3</b>	<b>Variation 3: Generation of Acetylides in Potassium Hydroxide/Nonhydroxylic Solvent Systems</b> .....	<b>975</b>
<b>24.4.3.3.1.1.4</b>	<b>Variation 4: Generation of Acetylides under Phase-Transfer Conditions</b> ...	<b>976</b>
<b>24.4.3.3.1.2</b>	<b>Method 2: Synthesis from Metal Acetylides and Electrophilic Chalcogen Species</b> .....	<b>976</b>
