<i>Preface to the first edition</i>	vii
<i>Preface to the fourth edition</i>	ix
Introduction	1
1 The great automatic grammatizator <i>Need anything be innate?</i>	6
2 Animals that try to talk <i>Is language restricted to humans?</i>	23
3 Grandmama's teeth <i>Is there biological evidence for innate language capacity?</i>	47
4 Predestinate grooves <i>Is there a pre-ordained language 'programme'?</i>	66
5 A blueprint in the brain? <i>Could any grammatical information conceivably be innate?</i>	91
6 Chattering children <i>Are children following 'rules' when they learn to speak?</i>	110
7 Puzzling it out <i>Exactly how do children learn language?</i>	135
8 Celestial unintelligibility <i>Why do linguists propose such bizarre grammars?</i>	165

## CONTENTS

9	The white elephant problem <i>Do we need a grammar in order to speak?</i>	183
10	The case of the missing fingerprint <i>How do we understand speech?</i>	199
11	The Cheshire Cat's grin <i>How do we plan and produce speech?</i>	237
