CONTENTS

Preface iii

Contributors vii

The Picard-Severi Base Number 1
S. C. Kothari and J. C. Wilson

Picard Groups of Blowings-up of Henselian Rings 11
William J. Gordon

Global Methods in Local Deformation Theory 19
Jonathan Wahl

The Grauert-Riemenschneider Theorem and Some Homological Conjectures in Commutative Algebra 27
Paul Roberts

Invariant Subrings of Finite Groups Which Are Complete Intersections 37
Kei-ichi Watanabe

Algebraic Structures on Minimal Resolutions of Gorenstein Rings 45
Andrew R. Kustin and Matthew Miller

A Differential Characterization of Flat Ideals in Commutative Rings 67
Sarah Glaz

An Introduction to Theories of Regular Functions on Linear Associative Algebras 75
Herbert H. Snyder

Derivations and Small C_4 95
Richard N. Draper and Klaus Fischer

The Syzygy Problem 105
E. Graham Evans and Phillip A. Griffith

Equimultiplicity, Reduction, and Blowing up 111
Joseph Lipman

Strong Holomorphic Equivalence of Holomorphic Mappings 149
Gary A. Harris

On the Composition of Power Series 159
Joseph Becker

Symbolic Powers and Weak d-Sequences 173
Craig Huneke

On the Rees Algebras of Cohen-Macaulay Local Rings 201
Shiro Goto and Yasuhiro Shimoda

Rings with Noetherian Completions 233
Edward L. Green

A Formula for $\varprojlim^1$ 257
Saul Lubkin

Some Questions about the Ring of Formal Power-Series 275
Paul Eakin and Avinash Sathaye

The Krull Intersection Theorem and Other Topological Properties 287
Jon L. Johnson
