

CONTENTS

Preface	vii
Polynomials, bilinear forms, and representations of Lie algebras ROGER BROCKETT	1
A note on the topology of spaces of Hamiltonian transfer functions CHRISTOPHER I. BYRNES and TYRONE E. DUNCAN	7
On polynomial matrices and finitely generated torsion $K[z]$ -modules G. CONTE and A. M. PERDON	27
A note on the analyticity of the Riccati metric DAVID F. DELCHAMPS	37
Analytic similarity of matrices SHMUEL FRIEDLAND	43
A frequency domain treatment of disturbance decoupling and output stabilization M. L. J. HAUTUS	87
An approach to detectability and observers M. L. J. HAUTUS and EDUARDO D. SONTAG	99
Moduletheoretic characterization of system equivalence in time domain DIEDERICH HINRICHSSEN and DIETER PRÄTZEL-WOLTERS	137
On families of linear systems: degeneration phenomena MICHIEL HAZEWINDEL	157
Geometric structure and moving frames for the generalized Toda lattices ROBERT HERMANN	191
Controllability of nonlinear hypersurface systems L. R. HUNT	209

Linear discrete-time systems defined over a commutative Banach algebra with applications to two-dimensional systems EDWARD W. KAMEN	225
On the $GL(n)$ action on linear systems: the orbit closure problem AMR S. KHADR and CLYDE F. MARTIN	239
On the geometry of linear passive systems P. S. KRISHNAPRASAD	253
The Lie algebraic structure of a class of finite dimensional nonlinear filters CHANG-HUAN LIU and STEVEN I. MARCUS	277
Some comments on lumped-distributed networks and differential-delay systems J. MURRAY	299
On extremal solutions of the algebraic Riccati equation LEIBA RODMAN	311
