Preface 7
Zur Tagung 11
List of participants 12
Program of the Sessions 15

P. L. Butzer: Jacob Lionel Bakst Cooper - in memoriam 19
A. J. W. Hill: A testimony from a friend 25

I Operator Theory

T. Ando: Fixed points of certain maps on positive semidefinite operators .. 29
M. Wolff: A remark on the spectral bound of the generator of semigroups of positive operators with applications to stability theory 39
G. Lumer: Local operators, regular sets, and evolution equations of diffusion type 51
P. Masani: An outline of the spectral theory of propagators 73
M. Z. Nashed: On generalized inverses and operator ranges 85

II Functional Analysis

J. Musielak: Modular approximation by a filtered family of linear operators 99
C. Bennett, R. Sharpley: Interpolation between H^1 and L^∞ 111
C. Ciesielski: The Franklin orthogonal system as unconditional basis in $Re H^1$ and VMO 117

III Abstract Harmonic Analysis

H. Ombe, C. W. Onneweer: Bessel potential spaces and generalized Lipschitz spaces on local fields 129
P. Lambert: On the minimum norm property of the Fourier projection in L^1-spaces 139
H. G. Feichtinger: Banach spaces of distributions of Wiener's type and interpolation 153
W. R. Bloom: Approximation theory on the compact solenoid 167

IV Fourier Analysis and Integral Transforms

J. Szabados: Bernstein and Markov type estimates for the derivative of a polynomial with real zeros 177
E. Görlich, C. Markett: Projections with norms smaller than those of the ultraspherical and Laguerre partial sums 189
F. Móricz: The regular convergence of multiple series 203

B. Muckenhoupt: Norm inequalities relating the Hilbert transform to the Hardy-Littlewood maximal function 219
M. Wehrens: Best approximation on the unit sphere in $\mathbf{R}^k$ 233

V Best Approximation

H. Berens: Ein Problem über die beste Approximation in Hilberträumen .. 247
U. Westphal: Über Existenz- und Eindeutigkeitsmengen bei der besten Ko-Approximation 255
L. Bijvoets, W. Hogeveen, J. Korevaar: Inverse approximation theorems of Lebedev and Tamrazov 265
R. Beatson, Ch. K. Chui: Best multipoint local approximation 283

VI Approximation by Linear Operators

P. Erdös, P. Vértesi: On the Lebesgue function of interpolation 299
W. Dickmeis, R. J. Nessel: A uniform boundedness principle with rates and an application to linear processes 311
P. C. Sikkema: Slow approximation with convolution operators 323
E. Görlich: A remark on asymptotically optimal approximation by Faber series 335

VII Strong and Müntz Approximation

L. Leindler: Strong approximation and generalized Lipschitz classes 343
V. Totik: Strong approximation and the behaviour of Fourier series 351
D. Leviatan: On the rate of approximation by Müntz polynomials satisfying constraints 365

VIII Number Theory and Probability

P. D. Lax, R. S. Phillips: The asymptotic distribution of lattice points in Euclidean and non-Euclidean spaces 373
V. Paulauskas: On the approximation of indicator functions by smooth functions in Banach spaces 385
M. Roeckerath: On the o-closeness of the distribution of two weighted sums of Banach space valued martingales with applications 395

IX Splines and Numerical Integration

W. Schempp: Approximation und Transformationsmethoden III 409
J. B. Kioustelidis: Uniqueness of optimal piecewise polynomial L_1 approximations for generalized convex functions 421
N. S. Murthy, C. F. Osgood, O. Shisha: The dominated integral of functions of two variables 433

E. L. Stark: Bernstein-Polynome, 1912–1955 443

New and unsolved problems 463

Errata 474
Alphabetical list of papers 476
Mathematics subject classification numbers 478
Key words and phrases 481
