PREFACE	vii
Liège, May 2 - 3, 1980	
D. ARNAL / Simultaneous deformations of a Lie algebra and its modules	3
E. COMBET / How to connect exponential integrals to optimal process?	17
S. GUTT / Invariance of Maxwell's equations	27
G. HECTOR / On the classification of manifolds foliated by the action of a nilpotent Lie group	31
P. IGLESIAS, J.M. SOURIAU / Heat, cold and geometry	37
A. LICHNEROWICZ / Deformations of algebras associated with a symplectic manifold	69
G. PATISSIER / Differential deformations with constant coefficients	85
Leuven, February 6 - 8, 1981	
P. BAIRD / Some aspects of theoretical physics relating to harmonic maps	97
J.P. BOURGUIGNON / Stability and self-duality of Yang-Mills fields	105
H. CHALTIN / Embedded 2-spheres in $\mathbf{R}^3$	107
M. DE WILDE / Local Chevalley cohomologies of the dynamical Lie algebra of a symplectic manifold	131

C. DUVAL / The spin polarizer	137
J. EELLS / Variational theory in fibre bundles: examples	149
L. GHEYSENS / Curvatures of tubes about submanifolds	159
E.A. RUH / Almost symmetric spaces	167
B. SMYTH / Minimal surfaces and Weyl groups	173
J.C. WOOD / Some aspects of harmonic maps from a surface to complex projective space	177
