

# Contents

<b>Re-injecting the Structure in NMPC Schemes</b> <i>M. Almir, F. Boyer</i> .....	1
<b>Recent Advances on the Algorithmic Optimization of Robot Motion</b> <i>J.E. Bobrow, F.C. Park, and A. Sideris</i> .....	21
<b>A Spring Assisted One Degree of Freedom Climbing Model</b> <i>J.E. Clark, D.E. Koditschek</i> .....	43
<b>Fast Direct Multiple Shooting Algorithms for Optimal Robot Control</b> <i>M. Diehl, H.G. Bock, H. Diedam, and P.-B. Wieber</i> .....	65
<b>Stability Analysis of Bipedal Walking with Control or Monitoring of the Center of Pressure</b> <i>D. Djoudi, C. Chevallereau</i> .....	95
<b>Multi-Locomotion Control of Biped Locomotion and Brachiation Robot</b> <i>T. Fukuda, M. Doi, Y. Hasegawa, and H. Kajima</i> .....	121
<b>On the Determination of the Basin of Attraction for Stationary and Periodic Movements</b> <i>P. Giesl, H. Wagner</i> .....	147
<b>Task-Level Control of the Lateral Leg Spring Model of Cockroach Locomotion</b> <i>J. Lee, A. Lamperski, J. Schmitt, and N. Cowan</i> .....	167
<b>Investigating the Use of Iterative Learning Control and Repetitive Control to Implement Periodic Gaits</b> <i>R.W. Longman, K.D. Mombaur</i> .....	189

<b>Actuation System and Control Concept for a Running Biped</b> <i>T. Luksch, K. Berns, and F. Flörchinger</i> .....	219
<b>Dynamical Synthesis of a Walking Cyclic Gait for a Biped with Point Feet</b> <i>S. Miossec, Y. Aoustin</i> .....	233
<b>Performing Open-Loop Stable Flip-Flops – An Example for Stability Optimization and Robustness Analysis of Fast Periodic Motions</b> <i>K. Mombaur</i> .....	253
<b>Achieving Bipedal Running with RABBIT: Six Steps Toward Infinity</b> <i>B. Morris, E.R. Westervelt, C. Chevallereau, G. Buche, and J.W. Grizzle</i> .....	277
<b>Velocity-Based Stability Margins for Fast Bipedal Walking</b> <i>J.E. Pratt, R. Tedrake</i> .....	299
<b>Nonlinear Model Predictive Control and Sum of Squares Techniques</b> <i>T. Raff, C. Ebenbauer, R. Findeisen, and F. Allgöwer</i> .....	325
<b>Comparison of Two Measures of Dynamic Stability During Treadmill Walking</b> <i>M. Schablowski, H.J. Gerner</i> .....	345
<b>Simple Feedback Control of Cockroach Running</b> <i>J. Schmitt</i> .....	361
<b>Running and Walking with Compliant Legs</b> <i>A. Seyfarth, H. Geyer, R. Blickhan, S. Lipfert, J. Rummel, Y. Minekawa, and F. Iida</i> .....	383
<b>Self-stability in Biological Systems – Studies based on Biomechanical Models</b> <i>H. Wagner, P. Giesl</i> .....	403
<b>Holonomy and Nonholonomy in the Dynamics of Articulated Motion</b> <i>P.-B. Wieber</i> .....	411
<b>Dynamic Stability of a Simple Biped Walking System with Swing Leg Retraction</b> <i>M. Wisse, C.G. Atkeson, and D.K. Kloimwieder</i> .....	427
