
Contents

Part I Invited Papers

Combined Relaxation Methods for Generalized Monotone Variational Inequalities

Igor V. Konnov 3

Abstract Convexity and the Monge–Kantorovich Duality

Vladimir L. Levin 33

Optimality Conditions and Duality for Multiobjective Programming Involving (C, α, ρ, d) type-I Functions

Dehui Yuan, Altannar Chinchuluun, Xiaoling Liu, Panos M. Pardalos . . 73

Part II Contributed Papers

Partitionable Variational Inequalities with Multi-valued Mappings

Elisabetta Allevi, Adriana Gnudi, Igor V. Konnov 91

Almost Convex Functions: Conjugacy and Duality

Radu Ioan Boț, Sorin-Mihai Grad, Gert Wanka 101

Pseudomonotonicity of a Linear Map on the Interior of the Positive Orthant

Alberto Cambini, Laura Martein 115

An Approach to Discrete Convexity and Its Use in an Optimal Fleet Mix Problem

Riccardo Cambini, Rossana Riccardi, Ümit Yüceer 133

A Unifying Approach to Solve a Class of Parametrically-Convexifiable Problems	
<i>Riccardo Cambini, Claudio Sodini</i>	149
Mathematical Programming with (Φ, ρ)-invexity	
<i>Giuseppe Caristi, Massimiliano Ferrara, Anton Stefanescu</i>	167
Some Classes of Pseudoconvex Fractional Functions via the Charnes-Cooper Transformation	
<i>Laura Carosi, Laura Martein</i>	177
Equilibrium Problems Via the Palais-Smale Condition	
<i>Ouayl Chadli, Zaki Chbani, Hassan Riahi</i>	189
Points of Efficiency in Vector Optimization with Increasing-along-rays Property and Minty Variational Inequalities	
<i>Giovanni P. Crespi, Ivan Ginchev, Matteo Rocca</i>	209
Higher Order Properly Efficient Points in Vector Optimization	
<i>Ivan Ginchev, Angelo Guerraggio, Matteo Rocca</i>	227
Higher-order Pseudoconvex Functions	
<i>Ivan Ginchev, Vsevolod I. Ivanov</i>	247
Sufficient Optimality Conditions and Duality in Nonsmooth Multiobjective Optimization Problems under Generalized Convexity	
<i>Giorgio Giorgi, Bienvenido Jiménez, Vicente Novo</i>	265
Optimality Conditions for Tanaka's Approximate Solutions in Vector Optimization	
<i>César Gutiérrez, Bienvenido Jiménez, Vicente Novo</i>	279
On the Work of W. Oettli in Generalized Convexity and Nonconvex Optimization – a Review and Some Perspectives	
<i>Joachim Gwinner</i>	297
Local and Global Consumer Preferences	
<i>Reinhard John</i>	315
Optimality Conditions for Convex Vector Functions by Mollified Derivatives	
<i>Davide La Torre</i>	327
On Arcwise Connected Convex Multifunctions	
<i>Davide La Torre</i>	337
A Sequential Method for a Class of Bicriteria Problems	
<i>Laura Martein, Valerio Bertolucci</i>	347

Decomposition of the Measure in the Integral Representation of Piecewise Convex Curves	
<i>Mariana Nedelcheva</i>	359
Rambling Through Local Versions of Generalized Convex Functions and Generalized Monotone Operators	
<i>Huynh Van Ngai, Jean-Paul Penot</i>	379
Monotonicity and Dualities	
<i>Jean-Paul Penot</i>	399
On Variational-like Inequalities with Generalized Monotone Mappings	
<i>Vasile Preda, Miruna Beldiman, Anton Bătuțorescu</i>	415
Almost Pure Nash Equilibria in Convex Noncooperative Games	
<i>Tadeusz Radzik, Wojciech Połowczuk</i>	433
A Spectral Approach to Solve Box-constrained Multi-objective Optimization Problems	
<i>Maria Cristina Recchioni</i>	449
