

# Contents

|    |   |    |
|----|---|----|
| 1. | R.A. BAILEY   |    |
|    | Block structures for designed experiments   | 1  |
| 2. | C. BUTLER and L.R. MATTHEWS   |    |
|    | An application of graph colouring on the railways   | 19 |
| 3. | N. CHRISTOFIDES   |    |
|    | The travelling salesman problem — a survey  | 29 |
| 4. | ANDREW CLIFF and PETER HAGGETT  |    |
|    | Graph theory and geography: some combinatorial and other applications                           | 51 |
| 5. | J.H. VAN LINT   |    |
|    | Coding, decoding and combinatorics  | 67 |
| 6. | D.J.A. WELSH  |    |
|    | Problems in computational complexity  | 75 |
| 7. | R.B. MALLION  |    |
|    | Some chemical applications of the eigenvalues and eigenvectors of certain finite, planar graphs | 87 |
