

## CONTENTS

Preface	iii
Contributors	vii
Conference Participants	x
PART ONE	
A Survey of Some Problems and Recent Results for Parameter Estimation and Optimal Control in Delay and Distributed Parameter Systems <i>H. Thomas Banks</i>	3
A Model Riemann Problem for Volterra Equations <i>James M. Greenberg, Ling Hsiao and Richard C. MacCamy</i>	25
An Example of Boundary Layer in Delay Equations <i>Jack K. Hale and Luis Magalhães</i>	45
Some Results on the Liapunov Stability of Functional Equations <i>Ettore F. Infante</i>	51
Some Synthesis Problems for Integral Equations <i>Jacob J. Levin</i>	61
On Volterra Equations with Locally Finite Measures and $L^\infty$ - Perturbations <i>Stig-Olof Londen</i>	79

Contents	v
A Nonlinear Conservation Law with Memory <i>John A. Nohel</i>	91
Functional Equations as Control Canonical Forms for Distributed Parameter Control Systems and a State Space Theory for Certain Differential Equations of Infinite Order <i>David L. Russell</i>	125
Exponential Dichotomies in Evolutionary Equations: A Preliminary Report <i>Robert J. Sacker and George R. Sell</i>	167
On Weighted Measures and a Neutral Functional Differential Equation <i>Olof J. Staffans</i>	175
PART TWO	
A Parameter Dependence Problem in Functional Differential Equations <i>Dennis W. Brewer</i>	187
Approximation of Functional Differential Equations by Differential Systems <i>Stavros N. Busenberg and Curtis C. Travis</i>	197
Integrable Resolvent Operators for an Abstract Volterra Equation <i>Ralph W. Carr</i>	207
Asymptotic Expansions of a Penalty Method for Computing a Regulator Problem Governed by Volterra Equations <i>Goong Chen and Ronald Grimmer</i>	217
Integrodifferential Equations with Almost Periodic Solutions <i>Constantin Corduneanu</i>	233
Weighted $L^1$ -Spaces and Resolvents of Volterra Equations <i>G. Samuel Jordan</i>	245
A Volterra Equation with Time Dependent Operator <i>Thomas R. Kiffe</i>	255
Formation of Singularities for a Conservation Law with Damping Term <i>Reza Malek-Madani</i>	263
On Obtaining Ultimate Boundedness for $\alpha$ -Contractions <i>Paul Massatt</i>	273

Cosine Families, Product Spaces and Initial Value Problems with Nonlocal Boundary Conditions <i>Samuel M. Rankin, III</i>	281
Theory and Numerics of a Quasilinear Parabolic Equation in Rheology <i>Michael Renardy</i>	287
On Periodic Solutions in Systems of High Order Differential Equations <i>Sherwin J. Skar, Richard K. Miller and Anthony N. Michel</i>	311
Differentiability Properties of Pseudoparabolic Point Control Problems <i>Luther W. White</i>	323
