<i>Contributors</i>	vii
<i>Foreword</i>	ix
<i>Preface</i>	xi
Pivotal Inference and the Conditional View of Robustness (Why have we for so long managed with normality assumptions?)	1
<i>G. A. Barnard</i>	
Some Philosophies of Inference and Modelling	9
<i>Tom Leonard</i>	
Parametric Empirical Bayes Confidence Intervals	25
<i>Carl N. Morris</i>	
An Apology for Ecumenism in Statistics	51
<i>G. E. P. Box</i>	
Can Frequentist Inferences Be Very Wrong? A Conditional “Yes”	85
<i>David V. Hinkley</i>	
Frequency Properties of Bayes Rules	105
<i>Persi Diaconis and David Freedman</i>	
Purposes and Limitations of Data Analysis	117
<i>A. P. Dempster</i>	
Data Description	135
<i>C. L. Mallows</i>	
Likelihood, Shape, and Adaptive Inference	153
<i>David F. Andrews</i>	
Statistical Inference and Measurement of Entropy	165
<i>Hirotsugu Akaike</i>	
The Robustness of a Hierarchical Model for Multinomials and Contingency Tables	191
<i>I. J. Good</i>	
A Case Study of the Robustness of Bayesian Methods of Inference: Estimating the Total in a Finite Population Using Transformations to Normality	213
<i>Donald B. Rubin</i>	
Estimation of Variance of the Ratio Estimator: An Empirical Study	245
<i>C. F. Jeff Wu and L. Y. Deng</i>	

Autocorrelation-robust Design of Experiments	279
<i>J. Kiefer and H. P. Wynn</i>
