

CONTENTS

- p. vii Foreword.
- p. 1 "Recent advances in the study of the existence of periodic orbits of Hamiltonian systems", by Antonio Ambrosetti.
- p. 23 "The direct method in the study of periodic solutions of Hamiltonian systems with prescribed period", by V. Benci.
- p. 43 "Periodic solutions of Hamiltonian systems having prescribed minimal period", by Giovanni Mancini.
- p. 73 "Duality in non convex variational problems", by Ivar Ekeland and Jean-Michel Lasry.
- p. 109 "La théorie de la seconde variation et le problème linéaire quadratique", by Pierre Bernhard.
- p. 143 "Méthodes asymptotiques dans l'étude de systèmes hamiltoniens non autonomes", by Joël Blot.
- p. 171 "Numerical research of periodic solutions for a Hamiltonian system", by Erick Gaussens.
