

CONTENTS

	Foreward	7
	List of participants	9
	Programme of the conference	12
ALBRECHT, E.; VASILESCU, F.-H.	Semi-Fredholm complexes	15
ALPAY, S.	On order properties of $L(E,F)$ and operator ideals	41
CEAUȘESCU, ZOIA; SUCIU, I.	Isometric dilations of commuting contractions. II	53
CLANCEY, K.F.	Toeplitz models for operators with one dimensional self-commutators	81
COBURN, L.A.	Equivariant index, representations of compact groups and Toeplitz operators in several variables	109
CONSTANTINESCU, T.	On the structure of positive Toeplitz forms	127
GURARIE, D.; KON, M.A.	Resolvents and regularity properties of elliptic operators	151
HASLINGER, F.	Gel'fond-Leont'ev differential operators	163
HELSON, H.	Boundedness from measure theory. II	179
HERRERO, D.A.	On limits of nilpotents in L^p -spaces and interpolation of spectra	191
HOLBROOK, J.A.	The size of an operator	233
JANAS, J.	$H^2(\mu)$ space for symmetric measure μ on \mathbb{C}^n	243
KUMMERER, B.	Markov dilations of completely positive operators on W^* -algebras	251
NIKOL'SKIÏ, N.K.	Commutators and semicommutators of some Toeplitz algebras	261

PASNICU, C.	Weighted shifts as direct summands mod C_2 of normal operators	275
PUTINAR, M.	Spectral theory and sheaf theory. I	283
RIEDEL, N.	The weak Dixmier property implies the Dixmier property	299
SALINAS, N.	Smooth extensions and smooth joint quasitriangularity	303
SCHMÜDGEN, K.	On a class of representations of Heisenberg commutation relation $PQ-QP=-iI$	333
STOCHEL, J.	The Bochner type theorem for *-definite kernels on abelian *-semigroups without neutral elements	345
STOCHEL, J.; SZAFRANIEC, F.H.	Bounded vectors and formally normal operators	363
SZ.-NAGY, B.; FOIAŞ, C.	Toeplitz-type operators and hyponormality	371
TIMOTIN, D.	Remark on the Bartle-Graves theorem	389
UPMEIER, H.	Jordan algebras and operator theory: a survey	395
