

## C O N T E N T S

Calvin D. Ahlbrandt, Don B. Hinton, Roger T. Lewis:

Inversion in the unit sphere for powers of the Laplacian ..... 1

John V. Baxley:

Nonlinear second order boundary value problems:  
an existence-uniqueness theorem of S.N. Bernstein ..... 9

Paul Binding and Patrick J. Brown:

A definiteness result for determinantal operators ..... 17

C. Bennewitz and W. N. Everitt:

On second-order left-definite boundary value problems ..... 31

Richard C. Brown:

A von Neumann factorization of some self-adjoint extensions  
of positive symmetric differential operators and its  
application to inequalities ..... 68

L. Collatz:

Inclusion theorems for solutions of differential equations  
with aid of pointwise or vector monotonicity ..... 93

M. S. P. Eastham:

The Liouville-Green asymptotic theory for second-order  
differential equations: a new approach and some extensions ....110

W. D. Evans, R. T. Lewis and A. Zettl:

Non-self-adjoint operators and their essential spectra .....123

W. N. Everitt and F. Neuman:

A concept of adjointness and symmetry of differential  
expressions based on the generalized Lagrange identity and  
Green's formula .....161

W. N. Everitt and S. D. Wray:

On quadratic integral inequalities associated with second-order  
symmetric differential expressions .....170

A. M. Fink and Takasi Kusano:

Nonoscillation theorems for differential equations with  
general deviating arguments .....224

Charles T. Fulton and Allan M. Krall:

Self-adjoint 4-th order boundary value problem in the  
limit-4 case ..... 240

Robert M. Kauffman:

Factorization and the Friedrichs extension for ordinary  
differential operators ..... 257

Ian Knowles:

Eigenvalue problems and the Riemann zeta function II ..... 267

K. Kreith and C. A. Swanson:

Boundedness criteria for hyperbolic characteristic initial  
value problems ..... 298

Man Kam Kwong:

Matrix Riccati inequality and oscillation of second order  
differential systems ..... 311

Mam Kam Kwong and A. Zettl:

A new approach to second order linear oscillation theory ..... 328

N. G. Lloyd:

Small amplitude limit cycles of polynomial differential  
equations ..... 346

Jack W. Macki:

Regular growth and zero-tending solutions ..... 358

Angelo B. Mingarelli:

Asymptotic distribution of the eigenvalues of non-definite  
Sturm-Liouville problems ..... 375

Some remarks on the order of an entire function associated  
with a second order differential equation ..... 384

J. W. Neuberger:

Steepest descent for general systems of linear differential  
equations in Hilbert space ..... 390

Thomas T. Read:

On the spectral theory of some nonsymmetric second order  
differential operators ..... 407

R. Saxton:

The Cauchy and backward Cauchy problem for a non-linearly  
hyperelastic/viscoelastic infinite rod ..... 427

B. D. Sleeman and P. D. Smith:

Floquet theory for doubly-periodic differential equations and  
a number theory conjecture ..... 449

Tung Chin-Chu:

Poincaré's type of equations in the study of limit cycles ..... 502

Johann Walter:

Das Gesetz von Maxwell-Clausius in der phaenomeno-logischen  
Thermodynamik ..... 509
