SCIENTIFIC PROGRAM 10
LIST OF PARTICIPANTS 20
A. K. Aleškevičiene, On the local time of a random walk 27
J. Beirlant, Strong approximations of the empirical and quantile processes of uniform spacings . . 77
H. Bergström, Weak convergence of convolution powers of probability measures on certain Banach spaces 91
I. Berkes, Exchangeability and limit theorems for subsequences of r.v.'s 109
R. C. Bradley, Counterexamples to the central limit theorem under strong mixing conditions 153
E. Csáki - A. Földes, On the narrowest tube of a Wiener process 173
E. Csáki - A. Földes, How big are the increments of the local time of a simple symmetric random walk? 199
M. Csörgő - P. Révész, Three strong approximations of the local time of a Wiener process and their applications to invariance 223
M. Csörgő - P. Révész, Quantile processes for composite goodness-of-fit 255
S. Csörgő, Adaptive estimation of the parameters of stable laws 305

P. Deheuvels, Strong approximation in extreme value theory and applications 369
M. Denker - U. Rösler, A note on the asymptotic normality of rank statistics 405
J. Durbin, Boundary crossing probabilities for Gaussian processes and applications to Kolmogorov-Smirnov statistics when parameters are estimated 427
E. Eberlein, A lemma concerning weak limit theorems for partial sums of ϕ -mixing sequences of random variables 449
M. S. Ginovian, On the asymptotical estimation of the maximum likelihood of parameters of the spectrum of a stationary Gaussian time series . 457
E. Godehardt, Limit theorems for undirected, completely labelled random multigraphs: extensions of the results of P. Erdős and A. Rényi . 499
S. S. Gupta - S. Panchapakesan, Edgeworth expansions in statistics: some recent developments . 519

CONTENTS

Volume II

C. C. Heyde, On limit theorems for gene survival . . 573
L. Horváth, Parameter estimation and testing composite hypotheses from censored data 587
Z. J. Jurek, s-self-decomposable probability measures as probability distributions of some random integrals 617
N. Kusolitsch, On the first "long" path and the number of "long" paths in certain directed random graphs 631
N. Kusolitsch - T. Nemetz, Erdős-Révész-type asymptotic bounds on the length of longest paths in certain random graphs 649
H. Liero, A strong law of the kernel estimate of a regression function 667
P. Lukács, On the inhomogeneous and random collisions on the line 697
D. M. Mason, A unified approach to the asymptotic distribution of linear statistics 711
J. D. Mason, A comparison of the properties of operator-stable distributions and operator--self-similar processes 751
J. Mijnheer, On the rate of convergence to a stable limit law 761
T. F. Móri, Asymptotic properties of the empirical strategy in favourable stochastic games 777
T. F. Móri - G. J. Székely, How to win if you can? . 791

F. Móricz, Strong laws of large numbers for orthogonal sequences of random variables 807
L. Mutafčiev, Limit distributions related to the weight Stirling numbers of the first and second kind 823
W. Philipp, Invariance principles for sums of mixing random elements and the multivariate empirical process 843
M. L. Puri - M. Seoh, Berry-Esséen theorems for signed linear rank statistics with regression constants 875
B. L. S. Prakasa Rao - M. Sreehari, Remarks on the rate of convergence in the invariance principle for random sums 907
M. Rosenblatt, A two-dimensional smoothing spline and a regression problem 915
W. Schlee, On the estimation of functions, integrals and derivatives by smoothed functiograms 933
B. W. Silverman, Some remarks on roughness penalty density estimators 957
J. Steinebach, Between invariance principles and Erdős-Rényi laws 981
W. Stute, Parameter estimates derived from U-statistics 1007
R. L. Taylor, Laws of large numbers for dependent random variables 1023
A. Telcs, Local impurities in random walk with internal states 1043
K. Urbanik, Limit theorems in quantum mechanics . . .1069

A. Vetier, Sinai billiard in potential field (construction of stable and unstable fibers) . . . 1079
W. Woess, Chaotic random walks on certain Abelian groups 1147
