

CONTENTS

Preface	
List of Participants	
T. Arakawa, On certain automorphic forms of $Sp(1, q)$	1
W. L. Baily, Jr., Arithmetic Hilbert modular forms	49
E. Freitag, Holomorphic tensors on subvarieties of the Siegel modular variety	93
P. B. Garrett, Pullbacks of Eisenstein series; applications	114
M. Harris, Arithmetic vector bundles on Shimura varieties	138
H. Hijikata, Some supercuspidal representations induced from parahoric subgroups	160
M. L. Karel, Special values of elliptic modular forms	179
H. Klingen, On Eisenstein series and some applications	226
S. S. Kudla, Seesaw dual reductive pairs	244
M. Kuga, Chemistry and GTFABV's	269
Y. Morita, Analytic representations of SL_2 over a p -adic number field, II	282
T. Oda, Distinguished cycles and Shimura varieties	298
M. Ohta, Hilbert modular forms of weight one and Galois representations	333
I. Satake, On numerical invariants of arithmetic varieties of \mathbb{Q} -rank one	353
Y.-s. Tai, Pluri-canonical differentials of Hilbert modular varieties	370
R. Tsushima, An explicit dimension formula for the spaces of generalized automorphic forms with respect to $Sp(2, Z)$	378
