

TABLE OF CONTENTS

Xavier Caicedo	1
Failure of interpolation for quantifiers of monadic type.	
Rolando Chuaqui & Leopoldo Bertossi	13
Approximation to truth and theory of errors.	
Peter Clote	32
Partition Relations in Arithmetic.	
Manuel Corrada	69
On the axiomatizability of sets in a class theory.	
Maximo A. Dickmann	76
Applications of model theory to real algebraic geometry. A survey.	
Carlos A. Di Prisco & Wiktor Marek	151
On the space $(\lambda)^K$	
Itala M.L. D'Ottaviano	157
The model extension theorems for \mathbb{I}_3 -theories	
Sergio Fajardo	174
Completeness theorems for the general theory of stochastic processes.	
James M. Henle, Adrian R.D. Mathias & W. Hugh Woodin	195
A barren extension.	
E.G.K. Lopez-Escobar	208
Proof functional connectives.	
Michael Makkai	222
Ultraproducts and categorical logic.	
Jerome I. Malitz	310
Problems in taxonomy, a floating log.	
Jeffrey Paris & A. Wilkie	317
Counting problems in bounded arithmetic.	
Ramon Pino & Jean-Pierre Ressayre	341
Definable ultrafilters and elementary end extensions.	

Alexander Prestel	351
On the axiomatization of PRC-fields.	
Cecylia Rauszer	360
Formalizations of certain intermediate logics.	
Part I.	
William N. Reinhardt & Rolando Chuaqui	385
Types in class set theories.	
Jacques Stern	395
Generic extensions which do not add random reals.
