CONTENTS OF VOLUME II

425 Reflections on the Scientific Spirit of Jack Carl Kiefer *Jerome Sacks*

435 The Asymptotic Contributions of Jack Kiefer to Statistics *Ronald Pyke*

475 Rates of Growth for Weighted Empirical Processes *Kenneth S. Alexander*

495 The Structure of Some Vapnik-Červonenkis Classes *R. M. Dudley*

509 Maximal Inequalities for Empirical Processes *David Pollard*

513 An Asymptotically Optimal Histogram Selection Rule *Charles J. Stone*

521 Sequential Medical Trials with Ethical Cost *Herman Chernoff and A. John Petkau*

539 Estimating a Monotone Density *P. Groeneboom*

557 Stochastic Approximation and Sequential Search for Optimum *T. L. Lai*

579 On the Optimality of Sequential Tests with Parabolic Boundaries *Hans Rudolf Lerche*

599 Corrected Diffusion Approximations and Their Applications *David Siegmund*

619 Run Orders of Factorial Designs *Ching-Shui Cheng*

635 Computing *D*-Optimum Weighing Designs: Where Statistics, Combinatorics, and Computation Meet *Zvi Galil*

651 Schur-Optimal Continuous Block Designs for Treatments with a Control *Alessandra Giovagnoli and Henry P. Wynn*

667 Model Robust Design in Regression: Bayes Theory *Jerome Sacks and Donald Ylvisaker*

681 On Some Multivariate Distributions and Random Orthogonal matrices *Morris L. Eaton*

693 On Admissible Estimation of Parametric Functions for Mixed Linear Models *Witold Klonecki and Stefan Zontek*

729 On Nonidentifiability Problems Among Some Stochastic Models in Reliability Theory *Prem S. Puri*

749 A Simple Analysis of Third-Order Efficiency of Estimates *Peter J. Bickel, F. Götze, and W. R. van Zwet*

769 On Second-Order Asymptotics for Differentiable Functionals *J. Pfanzagl*

789 On the Asymptotic Performance of the Log Likelihood Ratio Statistic for the Mixture Model and Related Results *Jayanta Kumar Ghosh and Pranab Kumar Sen*

807 A Failure of Likelihood Asymptotics for Normal Mixtures *J. A. Hartigan*

811 Neyman-Le Cam Tests Based on Estimating Functions *I. V. Basawa*

827 On Estimating a Parameter and Its Score Function *C. A. J. Klaassen and W. R. van Zwet*

841 Asymptotic Inference When the Amount of Information Is Random *Robert B. Davies*

865 Asymptotic Theory of Confidence Sets *R. J. Beran and P. W. Millar*

CONTENTS OF VOLUME I

1 The Neyman-Pearson Theory After Fifty Years *E. L. Lehmann*

15 The Frequentist Viewpoint and Conditioning *James Berger*

45 Does an Estimator's Distribution Suffice? *Colin R. Blyth and Pramod K. Pathak*

53 Bayesian Statistics as Honest Work *Persi Diaconis*

65 Data Analysis: In Search of an Identity *Peter J. Huber*

79 Improving Crucial Randomized Experiments—Especially in Weather Modification—by Double Randomization and Rank Combination *John W. Tukey*

109 Preliminary Analysis of Grossversuch IV Hail Damage on Experimental Days *Shyrl M. Dawkins, Jerzy Neyman, and Elizabeth L. Scott*

123 Econometrics and the Law: A Case Study in the Proof of Antitrust Damages *R. S. Daggett and D. A. Freedman*

173 Probabilistic Risk Assessment in the Nuclear Industry: Wash-1400 and Beyond *T. P. Speed*

201 Nail Finders, Edifices, and Oz *Leo Breiman*

215 On Inference for Demographic Projection of Small Populations *C. C. Heyde*

225 Maximal Segmental Match Length Among Random Sequences from a Finite Alphabet *Samuel Karlin and Friedemann Ost*

245 Twelve-Month Prognosis Following Myocardial Infarction: Classification Trees, Logistic Regression, and Stepwise Linear Discrimination *Richard A. Olshen, Elizabeth A. Gilpin, Hartmut Henning, Martin L. LeWinter, Daniel Collins, and John Ross, Jr.*

269 Identification of Aggregated Markovian Models: Applications to the Nicotinic Acetylcholine Receptor *Donald R. Fredkin, Mauricio Montal, and John A. Rice*

291 Monoclonal Antibody 791T/36 for Tumor Detection and Drug Targeting *R. W. Baldwin and V. S. Byers*

307 Mathematical Modeling for Monoclonal Antibody Therapy of Leukemia *Robert O. Dillman and James A. Koziol*

321 The Significance of Cell Variation in Understanding Cancer *H. Rubin*

331 The Requirement for Survival Measurements at Low Doses *B. Palcic, J. W. Brosing, G. Y. K. Lam, and L. D. Skarsgard*

343 Mechanisms of Radiation-Induced Neoplastic Cell Transformation *Tracy Chui-Hsu Yang and Cornelius A. Tobias*

373 The Roles of Ionizing Radiation in Cell Transformation *Cornelius A. Tobias, Norman W. Albright, and Tracy Chui-Hsu Yang*

397 Extension of the Time-Independent Repair-Misrepair Model of Cell Survival to High-LET and Multicomponent Radiation *Norman W. Albright and Cornelius A. Tobias*
