

TABLE OF CONTENTS

V. BARBU. The time optimal control of variational inequalities. Dynamic programming and the maximum principle.	1
A. BENSOUSSAN. Some singular perturbation problems arising in stochastic control.	20
G. DA PRATO. Some results on stationary Bellman equation in Hilbert spaces.	32
W.H. FLEMING. A stochastic control approach to some large deviation problems.	52
C. GOMEZ - J.P. QUADRAT - A. SULEM. Towards an expert system in stochastic control.	67
P.L. LIONS. Optimal control and viscosity solutions.	94
J-L. MENALDI - M. ROBIN. Some control problems of degenerate dif- fusions with unbounded cost.	113
U. MOSCO. On some stochastic optimal impulse control problems.	139
E. ROFMAN. Approximation of Hamilton-Jacobi-Bellman equation in deterministic control theory. An application to energy production systems.	152
R. VINTER. Dynamic programming for optimal control problems with terminal constraints.	190
