

CONTENTS

| | |
|---|-----|
| Foreword | ix |
| Preface | xi |
| Dissipative Mechanisms | 1 |
| Stuart S. Antman and Reza Malek-Madani | |
| Does Rank-One Convexity Imply Quasiconvexity? | 17 |
| J.M. Ball | |
| Metastable Harmonic Maps | 33 |
| Haim Brezis | |
| Bifurcation of Constrained Problems in Thermoelasticity | 43 |
| M.C. Calderer | |
| The Compressible Reynolds Lubrication Equation | 61 |
| Michel Chipot and Mitchell Luskin | |
| Twinning of Crystals I | 77 |
| Jerry L. Ericksen | |
| Quasiconvexity and Partial Regularity in the Calculus of Variations | 95 |
| L.C. Evans | |
| Introduction to Pattern Selection in Dendritic Solidification | 103 |
| Nigel Goldenfeld | |
| Some Results and Conjectures in the Gradient Theory of Phase Transitions .. | 135 |
| Morton E. Gurtin | |
| The Stability and Metastability of Quartz | 147 |
| R.D. James | |
| Continuation Theorems for Schrodinger Operators | 177 |
| Carlos E. Kenig | |
| Twinning of Crystals II | 185 |
| David Kinderlehrer | |
| Simulation of Pseudo-Elastic Behaviour in a System of Rubber Balloons | 213 |
| Wolfgang Kirsch, Ingo Müller and Peter Strehlow | |
| Asymptotic Problems in Distributed Systems | 241 |
| J.-L. Lions | |

| | |
|---|-----|
| Stability of Nonlinear Waves | 259 |
| Tai-Ping Liu | |
| The Nash-Moser Technique For an Inverse Problem in Potential Theory Related to Geodesy | 269 |
| C. Madera, C. Pagani, and S. Salsa | |
| Variational Stability and Relaxed Dirichlet Problems | 277 |
| Umberto Mosco | |
| A Contribution to the Description of Natural States for Elastic Crystalline Solids | 295 |
| Mario Pitteri | |
| Nonlocal Problems in Electromagnetism | 311 |
| Robert C. Rogers | |
| Hyperbolic Aspects in the Theory of the Porous Medium Equation | 325 |
| Juan Vazquez | |
| Green's Formulas for Linearized Problems with Live Loads | 343 |
| Giorgio Vergara-Caffarelli | |
| Some Aspects of Adiabatic Shear Bands | 353 |
| T.W. Wright | |
| Information About Other Volumes in this Program | 373 |
