Introduction

1. An "ideal" transcendence measure
W. Dale Brownawell 1
2. Galois orbits on abelian varieties and zero estimates
Daniel Bertrand 21
3. Small solutions of congruences with prime modulus
Wolfgang M. Schmidt 37
4. Newton polyhedra and solutions of congruences
Kamel A. Atan and J.H. Loxton 67
5. On prime factors of sums of integers II
C.L. Stewart and R. Tijdeman 83
6. An introduction to continued fractions
A.J. van der Poorten 99
7. Search for the three-dimensional approximation constant
G. Szekeres 139
8. Inverse problems for Mahler's measure
David W. Boyd 147
9. Large Newman polynomials
David W. Boyd 159
