

TABLE OF CONTENTS

1. LONG-RANGE DEPENDENCE

T.C. Sun and H.C. Ho	
<i>On central and non-central limit theorems for non-linear functions of a stationary Gaussian process</i>	3
L. Giraitis and D. Surgailis	
<i>Multivariate Appell polynomials and the central limit theorem</i>	21
M.S. Taqqu and J. Levy	
<i>Using renewal processes to generate long-range dependence and high variability</i>	73
M. Maejima	
<i>Sojourns of multidimensional Gaussian processes</i>	91
N. Kôno	
<i>Hausdorff dimension of sample paths for self-similar processes</i>	109
H. Dehling	
<i>Almost sure approximation for U-statistics</i>	119
M.S. Taqqu	
<i>A bibliographical guide to self-similar processes and long-range dependence</i>	137

2. MIXING CONDITIONS

R. Bradley	
<i>Basic properties of strong mixing conditions</i>	165
M. Peligrad	
<i>Recent advances in the central limit theorem and its weak invariance principle for mixing sequences of random variables (A survey)</i>	193
W. Philipp	
<i>Invariance principles for independent and weakly dependent random variables</i>	225
M. Denker	
<i>Uniform integrability and the central limit theorem for strongly mixing processes</i>	269
C.M. Goldie and G.J. Morrow	
<i>Central limit questions for random fields 275</i>	
N.H. Bingham	
<i>Summability methods and dependent strong laws</i>	291

3. MARTINGALE DEPENDENCE STRUCTURES

P. Gaenssler and E. Haeusler	
<i>On martingale central limit theory</i>	303
E. Eberlein	
<i>Limit laws for generalizations of martingales</i>	335

4. OTHER DEPENDENCE STRUCTURES

A.R. Dabrowski	
<i>Joint characteristic functions and associated sequences</i>	349
Ed Waymire	
<i>Infinitely divisible distributions; Gibbs states and correlations</i>	361
R.H. Burton and Ed Waymire	
<i>The central limit problem for infinitely divisible random measures</i>	383

5. MOVING AVERAGES IN STABLE RANDOM VARIABLES

- F. Avram and M.S. Taqqu
*Weak convergence of moving averages
with infinite variance* 399
- R.A. Davis and S. Resnick
*Limit theory for the sample correlation
function of moving averages* 417

6. EXTREME VALUES

- G. O'Brien
Extreme values for stationary processes 429
- J. Hüsler
*Extreme values and rare events of
non-stationary random sequences* 438
- W. Vervaat
*Stationary self-similar extremal
processes and random semicontinuous functions* 457
