

## TABLE OF CONTENTS

Scientific committee and co-sponsors	ix
Scientific contents of the course	xi
Acknowledgement	xii
<u>Opening session</u>	
Invited lecture :	
Risk Theory, a Tool for Management?	
G.W. de Wit	3
<u>Main lectures</u>	
Economic Ideas in Risk Theory	
H.U. Gerber	25
Simulation in Insurance	
E. Pitacco	37
Application of the Problem of Moments to Various Insurance Problems in Non-life	
R. Kaas and M.J. Goovaerts	79
Application of Martingales in Risk Theory	
F. Delbaen and J. Haezendonck	119
Applications of Operations-Research Techniques in Insurance	
A.F. Shapiro	129
Recent Research on the Risk Return Relationship in Financial Economics	
P.P. Boyle	145
General Regression in Multidimensional Credibility Theory	
F. De Vylder	165
Ruin Theory under the Submartingale Assumption	
F. Moriconi	177

A rigorous Proof of a Property of the Premium Principle of Zero Utility in the Case of Additivity V. Mammitzsch	189
Bayesian Credibility with a Noninformative Prior S.A. Klugman	195
<u>Short communications</u>	
Separation Theorems in Proportional Reinsurance F. Pressacco	209
A new Treatment of the Engineering Aspects of the "Zero-Infinity Dilemmas" of Industrial Risk Management D.H. Critchley	217
On a Functional-Differential Equation connected with the Premium Principle of Zero Utility H. Sitter	235
Markov Processes between Moving Barriers - Moments of the first Hitting Time of Retaining or Absorbing Barrier W. Ettl	239
Some Mathematical Aspects of Combining Proportional and Non-Proportional Reinsurance L. Centeno	247
The Moments of Compound Interest Functions when Interest fluctuates as a Compound Markov Chain C.M. Ramsay	267
Pension Funding and random Rates of Return D. Dufresne	277
Bayes' Criterion, the Minimax Principle and Statistical Decision Theory H.M. Fisunoğlu	293
Large Claims - M.I. Gomes and D.D. Pestana	301
Some Numerical Methods for Calculating Semilinear Credibility Estimators M. Van Wouwe, F. De Vylder and M. Goovaerts	325
Weak Convergence of Risk Processes J. Garrido	349
On the Exposed to Risk Theory L. Sigalotti	361

Probability Bounds on Compound Distributions with given Moments on Claim Severities M. Vandebroek, D. Gysels and M. Goovaerts	367
Additivity and Premium Calculation Principles B. Heijnen and M.J. Goovaerts	373
Computing Moments of Compound Distributions R. Kaas and M.J. Goovaerts	381
Portfolio Valuation in Life Insurance A.R. Bacinello	385
Risk Assessment of Merger, Acquisition, and Consolidation of Financial Services B. Chan	401
Extending Arrow-Pratt Risk Premiums H. Schlesinger	407
On Optimal Deductibles W.-R. Heilmann	421
Solvency Margin and Profit in Life Insurance E. Pitacco	435
Statistical Methods in General Insurance P. Carroll	447
Modelling Motor Insurance Claim Frequencies K. Stroinski	453
General Bounds on Ruin Probabilities R. Kaas, M. Goovaerts and R. De Ridder	459
Strict Liability and Insurance under Loss Misestimation R. Yaksick	465
Index	481
