CONTENTS

PREFACE v

PART I - SELECTED PAPERS 1

The Robustness of LISREL Unweighted Least Squares Estimation Against Small Sample Size in Confirmatory Factor Analysis Models
I. Balderjahn 3

Structural Equation Modeling with EQS on a Microcomputer
P.M. Bentler 11

Loglinear Models and Entropy Clustering Methods for Qualitative Data
H.-H. Bock 19

Graphic Representation of Categorical Proximities: A Maximum Likelihood Method
I. Böckenholt 27

Maximum Likelihood and Classification: A Comparison of Three Approaches
P.G. Bryant and J.A. Williamson 35

Discrete and Hybrid Models for Proximity Data
J.D. Carroll and S. Pruzansky 47

Aggregation of Weighted Fuzzy Opinions
W. Cholewa 61

Analysis of Residuals and Regional Representation in Nonmetric Multidimensional Scaling
F. Critchley 67

Agreement Versus Shared Information: Formalizing Concepts to Compare Objects
W.H.E. Day 79

Principal Component Analysis and Restricted Multidimensional Scaling
J. de Leeuw and J. Meulman 83

Alternating Least Squares Optimal Variable Weighting Algorithms for Ultrametric and Additive Tree Representations
G. De Soete, J.D. Carroll and W.S. DeSarbo 97

Confirmatory Methods in Cluster Analysis
T. Eckes 105

On Scaling of Qualitative Data
B. Elpelt and J. Hartung 113

Two-Mode Hierarchical Clustering as an Instrument for Marketing Research
E. Espejo and W. Gaul 121

The Use of Data-Analysis Techniques: A Structural Analysis with Non-Metric Indicators
F. Förster 129

Growing Classification and Regression Trees on Network Data
O. Frank 137

The LISREL-Approach of Causal Analysis as an Instrument of Critical Theory Comparison within Management Science
W. Fritz 145

Use of Three-Dimensional Biplots for Diagnosis of Models
K.R. Gabriel and C.L. Odoroff 153

Software for Formal Concept Analysis
B. Ganter, K. Rindfrey and M. Skorsky 161

Conceptual Measurement and Many-Valued Contexts
B. Ganter, J. Stahl and R. Wille 169

Advanced Definitions of Similarity and their Use in Classification and Related Fields
D. Gernert 177

The Optimal Scaling Method Using ALS for Variables with Complex Information Levels
J. Hansohm 185

Canonical Decomposition with Linear Equality and Inequality Constraints on Parameters
W. Hartmann 191

Goodness-Criteria and Mean Heterogeneity
G. Herden 201

Comparing Partitions
L. Hubert and P. Arabie 209

Principal Cluster Analysis
A. Ibrahim and Y. Schektman 217

Diagnostics and Robust Estimation in 2^d Contingency Tables
P. Ihm 225

Online-Retrieval with Universal Decimal Classification?
G. König 233

Clustering Algorithms for the Within-Class Scatter Criterion with a Restricted Number of Elements per Cluster
M. Körkel 241

Classification Procedures for Ordered Categorical Data
J. Krauth 249

The Discriminant Analysis of Multivariate Time Series
M. Krzyško 257

A Concept for Integrated Data Analysis on Microcomputers
H. Locarek 265

On Drawing Concept Lattices with a Computer
P. Luksch, M. Skorsky and R. Wille 269

Maximal Association as a Tool for Classification
F. Marcotorchino 275

Divisive vs Agglomerative Average Linkage Hierarchical Clustering
D.W. Matula 289

Attitudinal Differences Between Students and Faculty Members
B. Miebach 303

What's the Real Number of Clusters
J.-L. Molliere 311

Specific Clustering Algorithms for Large Data Sets and Implementation in SPAD Software
A. Morineau and L. Lebart 321

On Selecting the Set of Regressors
P. Müller 331

A Cluster-Based Strategy for Determining Nearest Neighbours
F. Murtagh 339

Classification, Artificial Intelligence and Cognitive Psychology
W. Nedobity 345

Classification with a Variety of Categorical Data
S. Nishisato 353

ISP as Tool for EDA-Experts
R. Ostermann and P.O. Degens 361

Stability of the Attitude towards Guest Workers in West Germany: A Structural Equation Model
A. Pfeifer and P. Schmidt 369

About Horseshoes in Multiple Correspondence Analysis
J.L.A. van Rijckevorsel 377

Searching for and Exploiting Structure in Higher Dimensional Density Estimation
T.W. Sager 389

Subgradient Methods for Analyzing Qualitative Data
M. Schader and U. Tüshaus 397

A Simultaneous Testprocedure for the Selection of Loglinear Models
K. Schiller 405

Clusterwise Linear Least Squares Versus Least Absolute Deviations Regression:
A Numerical Comparison for a Case Study
H. Späth 413

Cluster Analysis of Large Data Sets
H. Stahl 423

Preconcepts and Set Representation of Contexts
J. Stahl and R. Wille 431

Multiple Discriminant Analysis for Predictor Variables Measured
at Various Scale Levels
Y. Takane 439

A Unification of Optimization-Based Numerical Classification Algorithms
M.P. Windham 447

Hierarchical Cluster Analysis with Messy Data
D. Wishart 453

Visual Exploratory Data Analysis: A Preliminary Report
F.W. Young 461

Probabilistic Multidimensional Preference Analysis:
Considerations of Power
J.L. Zinnes and D.B. MacKay 471

PART II - SCIENTIFIC PROGRAM 479

Survey 480

Conference Schedule 483

List of Speakers 497
