Zolotarev, V.M. Preface	
1. Hohlov, Yu. S. The estimation of the rate of convergence in the integral limit theorem in the Euclidean motion group ...	1
2. Kagan, A.M., Zinger, A.A., Contribution to the analytic theory of linear forms of independent random variables	11
3. Klebanov, L.B., Manija, G.M., Melamed, J.A. ν_p - Strictly stable laws and estimation of their parameters	23
4. Koicheva, M. The method of metric distances in the problem of estimation of deviation from the exponential distribution	32
5. Korolev, V.Yu. The accuracy of the normal approximation to the distribution of the sum of a random number of independent random variables	36
6. Kruglov, V.M., Titov, A.N. Mixtures of probability distributions	41
7. Maejima, M. Some limit theorems for summability methods of i.i.d. random variables	57
8. Nagaev, A.V., Shcolnick, S.M. Properties of mode of spectral positive stable distributions	69
9. Nevzorov, V.B. Two characterizations using records	79
10. Nikulin, V.N. On orthogonal-series estimators for probability distributions	86
11. Obretov, A., Rachev, S. Estimates of the deviation between the exponential and new classes of bivariate distributions	93
12. Omey, E., Willekens, E. On the difference between distributions of sums and maxima	103
13. Popov, V.A. On the inequalities of Berry-Esseen and V.M. Zolotarev	114
14. Radu, V. Some fixed point theorems in probabilistic metric spaces	125
15. Riedel, M. The asymptotic BIAS in a deviation of a location model	134

16. Rossberg, H.J. Cramer's decomposition theorem within the continuation theory of distribution functions	145
17. Rychlik, T., Zieliński, R. An asymptotically most BIAS-robust invariant estimator of location	156
18. Sasvari, Z., Wolf, W. Characterizing the distributions of the random vectors X_1, X_2, X_3 by the distribution of the statistic $(X_1 - X_3, X_2 - X_3)$	172
19. Sigánov, I. On stability estimates of Cramer's theorem	178
20. Szeidl, L. On the estimation of moments of regenerative cycles in a general closed central-server queueing network	182
21. Vostrikova, L. On \mathcal{F} -processes and their applications	190
22. Vsekhsyatskii, S.Yu. On some properties of ideal metrics of order ψ	204
23. Yanushkevichius, R. On \mathcal{E} -independence of sample mean and sample variance	207
