

CONTENTS

E. BOHL (KONSTANZ)	On two models of the Belousov-Zhabotinskii-reaction.	8
E. BOHL, E. JÄGER (KONSTANZ)	On the bifurcation diagram of the Gierer-Meinhardt model of morphogenesis	14
M. FRITSCHÉ (JENA)	Two dimensional Runge-Kutta methods as higher order characteristic methods	19
M. FRÖHNER (KARL-MARX-STADT)	Galerkin technique and the method of lines for a convection-diffusion equation.	25
E. GRIEPENTROG (GREIFSWALD)	Stability of differential-algebraic equations and implicit Runge-Kutta methods	31
R. D. GRIGORIEFF (BERLIN-WEST)	Discrete Green's function for finite difference approximations of compact form	38
W. HACKBUSCH (KIEL)	Solution of parabolic problems by multi-grid methods	45
E. HAIRER (GENÈVE), CH. LUBICH (INNSBRUCK)	An extension of ODE-methods to Volterra integral equations.	55
E. HAIRER, G. WANNER (GENÈVE)	Extrapolation methods for differential and differential-algebraic equations.	64
M. HOLODNIOK, I. SCHREIBER, M. KUBICEK, M. MAREK (PRAGUE)	Periodic solutions in two coupled reaction cells with Brusselator kinetics	72
P. J. VAN DER HOUWEN (AMSTERDAM)	Discretization of hyperbolic differential equations with periodic solutions.	75
R. JELTSCH (AACHEN), J. H. SMIT (STELLENBOSCH)	Bounds for the accuracy of difference methods for hyperbolic differential equations.	80

H. KRETZSCHMAR, R. KREUL (KARL-MARX-STADT)	
Stability of double-layered difference schemes with a non-selfadjoint operator	89
M. KUBICEK, M. HOLODNIOK (PRAGUE)	
Bifurcations of periodic solutions in ordinary differential equations. Numerical algorithms and applications	94
R. LEHMANN (HALLE)	
Computable error estimates in the finite element method	102
F. V. LUBYSHEV (UFA)	
Difference approximation and regularization in optimal control problems for elliptic equations.	106
Y. D. MAMEDOV (BAKU)	
On approximate methods for solving mixed type systems of differential equations.	110
R. MÄRZ (BERLIN)	
On feasibility and stability of one-leg methods for normal DAE's	114
H.-D. NIEPAGE (BERLIN)	
Multistep methods for differential inclusions under Caratheodory conditions.	121
D. A. QUINNEY (KEELE)	
The numerical computation of travelling wavespeeds in reaction diffusion equations.	127
TH. REIHER (BERLIN)	
The behaviour of the space and time error in the solution of parabolic equations.	132
R. SCHERER, H. TÜRKE (KARLSRUHE)	
Classification, symmetry and stability of the Runge-Kutta methods.	138
M. SCHLEIFF (HALLE)	
A mathematical model of sedimentation.	145
S. SCHOLZ (DRESDEN)	
On global error estimations for stiff differential equations.	149
H. SCHWETLICK, J. CLEVE (HALLE)	
Higher order predictors in path following methods.	153

M. N. SPIJKER (LEIDEN)	
The relevance of algebraic stability in implicit Runge-Kutta methods.158
K. STREHMEL (HALLE)	
Stability of linear implicit one-step methods for retarded differential equations.165
H. TOPARKUS (JENA)	
On two-dimensional Runge-Kutta methods for the Darboux problem: expansion of the local solution by Lie series . .	.175
J. G. VERWER (AMSTERDAM)	
On the convergence of method of lines approximations to partial differential equations.181
R. WEINER, J. BRUDER (HALLE)	
Partitioned adaptive Runge-Kutta methods for the solution of nonstiff and stiff differential equations. . .	.189
Lectures not appearing in the proceedings197
