

TABLE OF CONTENTS

| | |
|---|-----|
| A. Borel, <i>A vanishing theorem in relative Lie algebra cohomology</i> | 1 |
| W. Borho, <i>Nilpotent orbits, primitive ideals and characteristic classes</i> | 17 |
| J.-L. Brylinski, <i>Some examples of Hochschild and cyclic homology</i> | 33 |
| M. Goresky & R. MacPherson, <i>On the topology of algebraic torus actions</i> | 73 |
| J.C. Jantzen, <i>Restricted Lie algebra cohomology</i> | 91 |
| V.G. Kac & D.H. Peterson, <i>On geometric invariant theory for infinite-dimensional groups</i> | 109 |
| L. Le Bruyn & C. Procesi, <i>Etale local structure of matrix invariants and concomitants</i> | 143 |
| G. Lusztig, <i>Fourier transforms on a semisimple Lie algebra over \mathbb{F}_q</i> | 177 |
| I.G. Macdonald, <i>Commuting differential operators and zonal spherical functions</i> | 189 |
| G.D. Mostow & S.S.T. Yau, <i>Some surfaces covered by the ball and a problem in finite groups</i> | 201 |
| I. Piatetski-Shapiro, <i>Invariant theory and Kloosterman sums</i> | 229 |
| V.L. Popov, <i>On actions of \mathbb{C}_a on \mathbb{A}^n</i> | 237 |
| R.W. Richardson, <i>Normality of G-stable subvarieties of a semisimple Lie algebra</i> | 243 |
| J.L. Tits, <i>Unipotent elements and parabolic subgroups of reductive groups, II</i> | 265 |
