

Table of Contents

Amann, H. Semilinear Parabolic Systems Under Nonlinear Boundary Conditions	1
Angenent, S.B. The Shadowing Lemma for Elliptic PDE	7
Ball, J.M. and Carr J. Coagulation-Fragmentation Dynamics	23
Becker, L., Burton, T.A. and Zhang, S. Functional Differential Equations and Jensen's Inequality	31
Canada, A. Method of Upper and Lower Solutions for Nonlinear Integral Equations and an Application to an Infectious Disease Model	39
Chossat, P., Demay, Y., and Iooss, G. Competition of Azimuthal Modes and Quasi-Periodic Flows in the Couette-Taylor Problem	45
Chow, S-N. and Lauterbach, R. On Bifurcation for Variational Problems	57
Cushman, R. and Sanders, J.A. Nilpotent Normal Form in Dimension 4	61
Diekmann, O. Perturbed Dual Semigroups and Delay Equations	67
Ferreira, J.M. On Operators Which Leave Invariant a Half-Space	75
Fiedler, B. Global Hopf Bifurcation in Reaction Diffusion Systems with Symmetry . . .	81
Fitzgibbon, W.E. Longtime Behavior for a Class of Abstract Integrodifferential Equations	105
Fusco, G. Describing the Flow on the Attractor of One Dimensional Reaction Diffusion Equations by Systems of ODE	113
Hale, J.K. Asymptotic Behavior of Gradient Dissipative Systems	123
Henry, D.B. Generic Properties of Equilibrium Solutions by Perturbation of the Boundary	129
Lunel, S.M.V. Complex Analytical Methods in RFDE Theory	141

Mawhin, J. Qualitative Behavior of the Solutions of Periodic First Order Scalar Differential Equations with Strictly Convex Coercive Nonlinearity . . .	151
Magalhães, L.T. The Spectrum of Invariant Sets for Dissipative Semiflows	161
Marcati, P. Approximate Solutions to Conservation Laws via Convective Parabolic Equations: Analytical and Numerical Results	179
Mischaikow, K. Conley's Connection Matrix	179
Mora, X. and Sola-Morales J. Existence and Non-Existence of Finite-Dimensional Globally Attracting Invariant Manifolds in Semilinear Damped Wave Equations	187
Nishiura, Y. and Fujii, H. SLEP Method to the Stability of Singularly Perturbed Solutions with Multiple Internal Transition Layers in Reaction-Diffusion Systems . .	211
Nussbaum, R.D. Iterated Nonlinear Maps and Hilbert's Projective Metric: A Summary .	231
Oliva, W.M. Jacobi Matrices and Transversality	249
Rocha, C. Examples of Attractors in Scalar Reaction-Diffusion Equations	257
Sattinger, D.H. and Zurkowski, V.D. Gauge Theory of Backlund Transformations, I	273
Souganidis, P.E. Recent Developments in the Theory of Nonlinear Scalar First and Second Order Partial Differential Equations	301
Staffans, O. Hopf Bifurcation for an Infinite Delay Functional Equation	313
Stech, H.W. A Numerical Analysis of the Structure of Periodic Orbits in Autonomous Functional Differential Equations	325
Tartar, L. Oscillations and Asymptotic Behaviour for two Semilinear Hyperbolic Systems	341
Terman, D. An Application of the Conley Index to Combustion	357
Ulrich, K. Path Continuation - A Sensitivity Analysis Approach	373

Ushiki, S. and Lozi, R. Confinor and Anti-confinor in Constrained "Lorenz" System	385
Vanderbauwhede, A. Invariant Manifolds in Infinite Dimensions	409
van Moerbeke, P. Linearizing Completely Integrable Systems on Complex Algebraic Tori . .	421
Vegas, J.M. On Some Dynamical Aspects of Parabolic Equations with Variable Domain .	451
Walther, H-O. Bifurcation from Homoclinic to Periodic Solutions by an Inclination Lemma with Pointwise Estimate	459
Williamson, F. Approximate Methods for Set Valued Differential Equations with Delays .	471
Wisniewski, H.S. Bounds for the Chaotic Behavior of Newton's Method	481
List of Participants	511
