

CONTENTS

<i>Preface</i>	vii
<i>Participants</i>	viii
Boolean Methods in Fourier Approximation <i>G. Baszenski and F. -J. Delvos</i>	1
Ill-Posed Problems in Multivariate Approximation <i>E. W. Cheney</i>	13
On Multivariate Vertex Splines and Applications <i>Charles K. Chui and Mingjun Lai</i>	19
On the Theory and Application of Exponential Splines <i>Wolfgang Dahmen and Charles A. Micchelli</i>	37
Interpolation of Scattered Data by Radial Functions <i>Nira Dyn</i>	47
Shape Preserving Surface Interpolation <i>Ferruccio Fontanella</i>	63
Recent Advances in the Approximation of Surfaces from Scattered Data <i>Richard Franke</i>	79
Metaharmonic Splines for Solving the Exterior Dirichlet Problem for the Helmholtz Equation <i>Willi Freeden</i>	99
Approximation by Harmonic Functions <i>Werner Haussmann</i>	111
A Short Survey on Cardinal Interpolation by Box Splines <i>Kurt Jetter</i>	125
Unisolvent Interpolation in \mathbb{R}^n and the Simplicial Polynomial Finite Element Method <i>Alain J. Y. Le Méhauté</i>	141
On Interpolation Systems and H-reducible Interpolation Problems <i>J. Lorente and V. Ramírez</i>	153

Attenuation Factors and Multivariate Periodic Spline Interpolation <i>Henni G. ter Morsche</i>	165
Coordinate Free Scattered Data Interpolation <i>Gregory M. Nielson</i>	175
Approximation by Positive Elements of Subalgebras of Real-Valued Functions <i>João B. Prolla</i>	185
Numerical Generation of Nested Series of General Triangular Grids <i>María-Cecilia Rivara</i>	193
Composite Finite Elements of Class C^2 <i>Paul Sablonnière</i>	207
Triangulation Methods <i>Larry L. Schumaker</i>	219
Constrained Surface Construction <i>Florencio I. Utreras</i>	233
Polynomial Reproducing Formulas and the Commutator of a Locally Supported Spline <i>Joseph D. Ward</i>	255
On Inequalities Arising from Best Local Approximations in Rectangles <i>Felipe Zó</i>	265
A Bibliography of Multivariate Approximation <i>Richard Franke and Larry L. Schumaker</i>	275
