

## CONTENTS

Contributors	ix
Introductory Address by F.A. Wedgwood	1
<u>General Papers</u>	
Mathematical modelling in NDT - what it is and what it does by J.M. Coffey	7
The rôle of mathematical modelling in validation by D. Firth	23
<u>Ultrasonics</u>	
Recent developments in ultrasonic modelling for crack detection and characterisation by J.D. Achenbach	35
Mathematical aspects of scattering from rough cracks by J.R. Willis	57
Ultrasonic wave propagation and scattering using explicit finite difference methods by L.J. Bond, M. Punjani and N. Saffari	81
Numerical modelling of ultrasonic scattering by K.J. Langenberg, U. Aulenbacher, G. Bollig, P. Fellingner, H. Morbitzer, G. Weinfurter, P. Zanger and V. Schmitz	125
A mathematical model of the operation of an ultrasonic probe by M.G. Silk, K.F. Bainton and M.J. Hillier	175
Ultrasonic propagation in anisotropic welds and cast materials by J.A. Ogilvy	191
An integrated model of ultrasonic NDT and its practical application by R.K. Chapman	209
Development of models to predict the ultrasonic scattered pulse shape by M. Blakemore and D. Firth	233

Electromagnetics

- A three-dimensional finite element model for eddy currents in non-ferrous metals by P.C. French and L.J. Bond 255
- Developments in the AC field method of NDT by R. Collins and D.H. Michael 279
- The magnetic force on a spherical magnetic particle in the leakage field of a surface-breaking slot by C. Edwards and S.B. Palmer 299

Geophysics

- Evaluating the Earth Non-destructively by J.A. Hudson 313

Poster Session Contributions

- Pulse-echo methods and the Born approximation by R. Stacey and J.P. Weight 335
- Modelling ultrasonic inspection on a microcomputer by R.K. Chapman 341
- Ultrasonic testing of concrete by P.L. Domone and R.B.J. Casson 347
- Boundary element analysis of acoustic wave scattering by W.S. Hall and W.H. Robertson 357
- Index 363
