

## CONTENTS

Preface	v
Geometrical Methods of the Theory of Frechet Spaces <i>Czesław Bessaga</i>	1
An Introduction to Locally Convex Inductive Limits <i>Klaus D. Bierstedt</i>	35
Borel Spaces <i>S.K. Berberian</i>	134
Quotient Bornological Spaces <i>L. Waelbroeck</i>	198
Weakly Compact Operators on $C(K)$ and $C^*$ -Algebras <i>Hans Jarchow</i>	263
Eigenvalue Distributions of Operators on Banach Spaces with Applications to Integral Operators <i>Albrecht Pietsch</i>	300
The Commutation Relation of Quantum Mechanics <i>Béla Szőkefalvi-Nagy</i>	323
Introduction to "New Generalized Functions" and Multiplications of Distributions <i>J.F. Colombeau</i>	338
