

CONTENTS

P.M. ALBERTI (Leipzig)	The n-tuple problem over normal states on certain W^* -algebras	7
Ch. BANDT (Greifswald)	Fractals in dynamical systems	12
H.-G. BOTHE (Berlin)	Three remarks concerning the Hausdorff dimension of expanding attractors	24
P. BUGIEL (Michigan)	On the convergence of iterates of the Frobenius-Perron operator associated with point transformation of Markov type	36
L.A. BUNIMOVICH (Moscow)	Rigorous results in nonequilibrium statistical mechanics	41
E. FLYTZANIS and L. KANAKIS (Thessaloniki)	Linear measure preserving transformations in Hilbert spaces	53
J. GROH (Jena)	Stochastic analysis for one-dimensional martingal diffusion	57
B. HARMAN (Liptovský Mikuláš)	Strengthening of maximal ergodic theorem	62
K. HÄSLER (Halle)	On topological transitivity of set configuration spaces	65
G. HELMBERG (Innsbruck)	On subsequences of normal sequences	70
H. ISHITANI (Mie)	A central limit theorem of mixed type for one-dimensional transformations	72

M. JABLONSKI (Kraków)	
A central limit theorem for non-stationary martingale differences.	79
A. JAMIOLKOWSKI (Toruń)	
Open quantum Markovian systems and their reconstructibility	83
B. KAMINSKI (Toruń)	
Perfect σ -algebras of Z^2 -actions with finite entropy	87
J. KOMORNIK (Bratislava)	
Conditions for asymptotic periodicity of the iteraties of Markov operators	91
Z. KOWALSKI (Wrocław)	
The generalized skew product and its applications . .	96
U. KRENGEL (Göttingen)	
Nonlinear ergodic theorems	99
R. KÜHNE (Dresden)	
Weak mixing for representations of semigroups on a Banach space	108
J. KWIATKOWSKI (Toruń)	
Spectral properties of n-symbolic Morse shifts . . .	113
F. LEDRAPPIER (Paris)	
Dimension of invariant measures	116
M. LEMAŃCZYK (Toruń)	
Some ergodic properties of Morse sequences	125
J. MALCZAK (Kraków)	
Asymptotic properties of random processes defined by a family of transformations and ergodicity	130
P. MALIČKY and B. RIEČAN (Liptovský Mikuláš)	
On the entropy of dynamical systems	135
D. MAYER (Aachen)	
On the relaxation time of Gauss' continued fraction transformation	139
R. MESIAR (Bratislava)	
On the limit properties of $T^n f/a_n$	144

M. MISIUREWICZ and K. ZIEMIAN (Warsaw)	
Rate of convergence for computing entropy of some one-dimensional maps	147
VU QUOC PHONG (Hanoi)	
Dissipative actions of semigroups with precompact orbit	160
U. QUASTHOFF (Leipzig)	
Continuous outer actions on the hyperfinite factor . . .	166
K. SCHMIDT (Coventry)	
Some solved and unsolved problems concerning orbit equivalence of countable group actions	171
L. SNOHA (Banská Bystrica)	
On functions having periodic orbits which are not potentially minimal	185
B. STELZER (Dresden)	
Random ergodic theorem and law of large numbers	190
J. THOUVENOT (Paris)	
The metrical structure of some Gaussian processes . . .	195
V. WARSTAT (Halle)	
Absence of phase transition in general one-dimensional hard rod systems with long range interactions	199
K. ZIEMIAN (Warsaw)	
On Perron-Frobenius operator and limit theorems for some maps of an interval	206
List of talks of the conference	212
List of participants of the conference and their addresses .	214
