List of participants xi

Welcome xvii

Padé approximation and Rational interpolation **1**

Integral approximants for functions of higher monodromic dimension
G. A. Baker Jr. 3

Asymptotics of Hermite-Padé Polynomials and related convergence results
H. Stahl 23

Rational approximation **55**

On the behavior of zeros and poles of best uniform polynomial and rational approximants
R. Grothmann and E. B. Saff 57

Once again: the Adamjan–Arov–Krein approximation theory
J. Meinguet 77

Diagonal Padé approximants, rational Chebyshev approximants and poles of functions
R. Kovacheva 93

On the use of the Carathéodory–Féjer method for investigating '1/9' and similar constants
A. P. Magnus 105

Multidimensional and Multivariate problems **133**

Simultaneous rational approximation to some q-hypergeometric functions
M. G. de Bruin 135

Minimal Padé-sense matrix approximations around $s = 0$ and $s = \infty$
M. Van Barel and A. Bultheel 143

$(\text{Padé})_y$ of $(\text{Padé})_x$ approximants of $F(x, y)$
C. Chaffy 155

Different techniques for the construction of multivariate rational interpolants
A. Cuyt and B. Verdonk 167

Rational approximants of hypergeometric series in $\mathbb{C}^n$
C. H. Lutterodt 191

Orthogonal polynomials and the Moment problem 211

Some orthogonal systems of ${}_{p+1}F_p$-type Laurent polynomials
E. Hendriksen 213

The moment problem on equipotential curves
F. Marcellán and I. Pérez-Grasa 229

Difference equations, continued fractions, Jacobi matrices and orthogonal polynomials
D. R. Masson 239

Multipoint Padé approximation and orthogonal rational functions
O. Njåstad 259

L-Polynomials orthogonal on the unit circle
W. J. Thron 271

Continued fractions 279

Schur's algorithm extended and Schur continued fractions
W. B. Jones 281

Some recent results in the analytic theory of continued fractions
H. Waadeland 299

Best a posteriori truncation error estimates for continued fractions $K(a_n/1)$ with twin element regions
W. B. Jones and W. M. Reid 335

Convergence acceleration for Miller's algorithm
P. Levrie and R. Piessens 349

Convergence acceleration 371

A new approach to convergence acceleration methods
C. Brezinski 373

Applications 407

General T-fraction solutions to Riccati differential equations
S. C. Cooper, W. B. Jones and A. Magnus 409

A simple alternative principle for rational τ-method approximation
M. R. da Silva and M. J. Rodrigues 427

Evaluation of Fermi-Dirac integral
S. Paszkowski 435

An application of operator Padé approximants to multireggeon processes
M. Pindor 445

Index 453
